

The Bicycle Technology class was a big hit. We were able to purchase 14 bicycles, parts and tools. In the fall, Mr. Kem's class took daily rides in a class called Outdoor Adventure. In the winter, they are doing Bicycle Maintenance and will be doing Outdoor Adventure again in the spring. We have many areas adjacent to our school where this is an appropriate activity.

It has taken all summer and fall to get our Welding stations in place. Mr. Mathas is starting our Welding class on January 29. We have 3 industry volunteers who will be helping to kick-off this program.

By 4th quarter, we will have our new 3d printer up and running.

Thank you again to the Morris Family Foundation for their generosity and helping us to make school that much more meaningful to students.

Sincerely,

A handwritten signature in cursive script, reading "Dianne Gorman".
