

# LATE RULINGS ON THE PARCEL POST

Sec. 474. Admissible articles which, from their form or nature, might damage other mail matter or equipment or injure the person of any postal employee shall be accepted when packed in accordance with the following conditions:

2. In case of articles liable to break, the inner bag, box, envelope or wrapping shall be surrounded by sawdust, excelsior, cotton or other similar substance.

3. Admissible liquids and oils, in packages not exceeding the limit of weight of fourth-class matter (see Sec. 454), shall be accepted for mailing when intended for delivery at the office of mailing or on a rural route starting therefrom when inclosed in a glass or metal container securely closed and heavily wrapped, provided it is not necessary to transport them over stream or electric railways.

4. Admissible liquids and oils, pastes, salves or other articles which liquefy shall be accepted for mailing, regardless of distance, when they conform to the following conditions:

(a.) When in strong glass bottles holding 4 ounces or less, the total quantity sent in one parcel shall not exceed 24 ounces

liquid measure. Each bottle shall be wrapped in paper or other absorbent substance and then all placed in a box made of cardboard or other suitable material and packed in a container made of double faced corrugated pasteboard of good quality. The corners of the container must fit tightly and be reinforced with tape so as to prevent the escape of any liquid if the contents should be broken, and the whole parcel shall be securely wrapped with strong paper and tied with twine. Single bottles of liquid holding 4 ounces or less may also be packed as prescribed in the follow paragraphs (b) and (c):

(b.) When in glass bottles holding more than 4 ounces, the total quantity sent in one parcel shall not exceed 16 ounces, liquid measure. The bottle must be very strong and must be inclosed in a block or tube of metal, wood, papier-mache or similar material; and there must be provided between the bottle and the block or tube a cushion of cotton, felt or other absorbent. The block or tube, if of wood or papier-mache, must be at least one-eighth of an inch thick for bottles holding 8 ounces or less, and at least three-sixteenths of an inch thick for bottles holding more than 8 ounces. The block or tube must be rendered water-tight by an application on the inside of paraffin or other suitable substance and must be closed by a screw-top cover with sufficient screw threads to require at least one and one-half complete turns before it will come off. The cover must be provided with a washer, so that no liquid could escape if the bottle should be broken. Any number of bottles separately packed as herein prescribed may be included in a single package if the limit of weight and size for fourth-class matter be not exceeded.

(c.) Bottles containing liquid may also be packed in strong and tight receptacles of wood, metal or waterproof corrugated pasteboard. Space must be left all around the bottles, which must be filled with bran, sawdust or other absorbent material in sufficient quantity to absorb all the liquid if the bottle should get broken.

(d.) When in a metal container, the weight limit of the parcel is the same as for other fourth-class matter. The container must be securely sealed and inclosed in a strong box.

(e.) When in parcels weighing more than twenty pounds, mailable liquids in securely-sealed glass bottles or metal cans shall be accepted for mailing to offices in the first and second zones when packed in strong boxes and surrounded with sawdust or other suitable substance to protect the contents from breakage. All such packages to be marked "Fragile—This side up", or with similar inscription, and to be transported outside of mail bags.

(f.) All packages containing liquid must be marked "Fragile"

5. Pastes, salves, etc., not easily liquefiable shall be accepted for mailing when inclosed in water-tight containers and placed in a strong pasteboard or wooden box.

6. Manufacturers or dealers intending to transmit articles in considerable quantities should

submit to the postmaster at the mailing office for approval a specimen parcel showing the manner of packing.

7. Sharp-pointed or sharp-edge instruments or tools shall be capped or incased so that they can not cut through their covering. Blades shall be bound so that they will remain firmly attached to each other or within their handles or sockets. Plowshares, stove castings, pieces of machinery, etc., shall have all points, edges, and corners thoroughly protected with excelsior or similar material and be wrapped in burlap, cloth or tough paper, or be properly boxed to prevent damage to mail or equipment, when intended for other than local delivery.

8. Ink powders, flour, pepper, snuff, or other similar powders not explosive, or any similar pulverized dry substance not poisonous, shall be accepted when inclosed in the manner prescribed herein for liquids, or when inclosed in cases made of metal, wood, papier-mache or similar material, in such manner as to render impossible the escape of any of the contents.

9. Candles, confectionery, yeast cakes, soap in hard cakes, etc., shall be inclosed in boxes and so wrapped as to prevent injury to other mail matter.

10. Mailable hides and pelts (Secs. 472 and 477 1-2) shall be thoroughly wrapped to prevent grease soaking through the package and damaging other mail matter.

11. Unloaded pistols or guns may be sent in the mails, but the postmaster at the mailing office shall carefully examine such packages and shall receive them only when sure they are harmless. Cartridges or loaded shells are not mailable.

12. Fragile articles, such as millinery, toys, musical instruments, etc., and articles consisting wholly or in part of glass, or contained in glass, shall be securely packed and the parcel stamped or labeled "Fragile." Parcels so labeled shall be handled with the greatest possible care.

## A LETTER TO THE REPUBLICAN VOTERS

A few days ago I called your attention to the necessity of placing log boom companies under state Regulation and I have been asked why this should be done, and in answer to this question the principal reasons are:

At present the boom company on the Siuslaw could shut down every mill and logging camp on the river by refusing to accept logs, their charges are unreasonable, they have a monopoly on boomage ground; but by having them declared to be common carriers, the service could be regulated as well as their charges, so that each may be reasonable.

The old ring which has taught the plain people so many better lessons is against me, and I don't expect to place myself under obligations to them.

I hope that my friends who have not registered will swear in their votes on election day. I wish to thank the Siuslaw people for their kindness to me in the past, and I trust that I have merited your confidence.

Sincerely yours,  
M. VERNON PARSONS.  
(Paid Adv.)

Dr. O. R. Gullion, the eye, ear, nose and throat specialist, whose coming was tentatively announced several weeks ago, will be in Florence May 21st, to remain one week. Dr. Gullion will make his headquarters at Dr. Edwards' office. He will be ready to treat grown persons as well as children.

The Sausalito arrived in port Saturday noon with Capt. Weibust in command.
