Hawaii is said to have more telephones in use in proportion to the population than any other locality in the world.

The British Association for the Advancement of Science has granted a thousand pounds sterling toward the expenses of an Antarctic expedition.

A motor engine has been constructed by an English firm of fire engine builders. Engines of this kind have been in use in the United States for some time and have been successful.

The Nathorst expedition, which has been searching along the coast of Greenland for Andree, arrived September 12 at Malmo, Sweden. No trace of the aeronaut was found, but a new series of inlets were discovered and valuable ethnographic material has been obtained.

Prof. Knight and his party have returned after visiting the fossil lands of Northern Wyoming. The expedition left on July 21, and returned September 1. In addition to the discovery of fossils, photographs were taken for the first time, and after great difficulties, of the Upper Platte canon and of Bate's Hole. The expedition has been so successful in every way that the Chicago & Northwestern Railroad is now planning for next season a similar undertaking from the western terminus at Casper, Wyo.

"Dr. T. D. Crothers is of the opinion," says Modern Medicine, "that many cases of inebriety are produced by dietetic errors, bad habits of eating, etc., the deranged digestion finding its relief in alcohol, and this in turn aggravating the conditions and producing the drink habit. Many cases originate in dietetic delusions; in some of the sea systematic starvation exists, due to the peculiar notions held in regard to food. The treatment of this form of inebriety consists essentially in the elimination of toxins and proper nutrition."

A surprising history is presented in Bulletin 57 of the Department of Agriculture, of one of America's greatest contributions to the food supply of the world, Indian corn. Under the effects of cultivation, the recognized varieties have increased from the few known by the early explorers to more than 500. The variations in size are interesting, especially as regards the height of the stalk. This runs from a foot and a half for some kinds of popcorn to 22 feet for a Tennessee variety, and 30 feet or more for varieties grown in the West Indies.
