WILDLIFE ON THE EDGE
June 1994

This will be a productive Summer for Ticks. Exuberant with life after their warm, relaxing winter, scores of these blood sucking little rascals will have a heyday running amok through our local undergrowth and latching affectionately onto unguarded appendages. Beware.

The Redwinged Blackbird, a havoc-wrecker to farmers, is also a beautiful and distinctive bird to observe closehand, with its red and yellow shoulder pads and gurgling song.

Now the swamp waters will be swarming with wriggling little tadpoles. Frantically jerking around, eating and growing. It is fascinating to watch the growth process; a gallon jar of tadpoles on a shady windowsill can be a wonderful learning experience - at least better than TV.

When I am working on a problem, I never think about beauty. I think only how to solve the problem. But when I have finished, if the solution is not beautiful, I know it is wrong.
Buckminster Fuller
