

BLAME IT ON THE STARS

ARIES (21 Mar-20 April) It's all about work: work completed, work in progress, work to come. And the relationships you can blow if you forget other people and their ideas are as important as you and your own. Things need to be turned around. Turn them with no more force than necessary. Work for the joy that's in it, laugh with the world not at it, lead without followers.

LIBRA (23 Sept-22 Oct) Pressure is energy impeded. Turbulence, cross currents, and interference patterns in the sphere of home and close relationships. Think before speaking and make no decisions larger than when to take out the garbage. The harmony you're looking for isn't in the material world. Sing duets with your muse and dance by yourself.

TAURUS (21 April-20 May) Change from within and without. Energies can approach the giddy level, focus them on appropriate objects. Everything that's green isn't grass and your inner bull may wander into lean romantic pastures. In the long run, those who make good are those who do good. Set examples for yourself and live up to them. The world is far from blind.

SCORPIO (23 Oct-22 Nov 22) The unusual flows to you like iron filings to a magnet. Off the wall encounters that make great sense after the fact. The company of the various is an energy source and charging batteries is a good thing. Celebrate the death of old habits, bury outdated beliefs, expect clarity and act on it. Argue your positions calmly.

GEMINI (21 May-20 June) The winds of change are inflating the dirigible of your karma. Large juju, some of it in cash. Power is never misplaced. It can, of course, be badly handled. Go gently, with humility and the desire for greatest good. Remind yourself what's not important, look even deeper than usual. If you're going to fly, you might as well be an eagle.

SAGITTARIUS (23 Nov-21 Dec) Happy solar return. Your winter sap is rising, all ten fingers in the sockets of your karma. Expect the light to shine inward. What isn't yours drops away, the path is clearer, the horizon no longer fuzzy. Invoke your inner elf and listen to her advice. The world is a shadow play of your possibilities as a spirit. Get with it.

CANCER (21 June-22 July) The world has engaged you on an intimate level. A time of lovely high tides. Money matters come to fruit, love slops over the top of your bowl, romance can play havoc with your concentration. Lie down and take the grapes being offered, offer bonbons in return. Trust your inner adult and let your mind run free. Life is an act of creation.

CAPRICORN (22 Dec-19 Jan) Feelings of being on the verge continue. Trust them. Avoid your usual paranoia, accept positive energy at face value, and dance with the playful. Continue to prepare your vessel for what you sense is on its way. Take spiritual stock without brooding, examine your intents, and get rid of psychic baggage. Travel light, travel fast.

LEO (23 July-22 August) At last, a month firing on all eight cylinders. You're juggling well, your vision is clear and focused, your objectives are in sight. The bobbed of your karma is on top of the hill and you're in for a long overdue ride. Real power lies in understanding who you are and what is yours to do. Real honor lies in honesty, integrity and selfless love.

AQUARIUS (20 Jan-18 Feb) Your pond is less choppy, the sun comes out. Once again, you're pleasant to be around. Your fears of having made a mess of your life give way to an appreciation of the order beneath the chaos. No, life's not perfect. It can still be no end of fun. Be conscious of the impression you make and don't get moody. No one has the time.

VIRGO (23 August-22 Sept) Much energy inside and out, much potential for accomplishing the amazing. Backing for new projects is likely as is resolving draining issues at home. Your ducks are in a row but could be scattered by the sort of absurd impulses you're known for. Play your cards with care, wait for a good hand, and don't criticize the bets of others.

PISCES (19 Feb-20 March) To be any better, you'd need to be twins. An uncommon fusion of the inner and outer worlds, the poetry of your soul set to music, lunacy transformed into inspired madness. Expect success with your work and find solitude in the company of friends. Make your place in the world and practice the magic of compassion.
