

BLAME IT ON THE STARS

ARIES: (21 Mar-20 April) Energies center at home. Power is afoot, be careful of irritating it. Avoid being thin skinned, imagine no imaginary affronts, maintain the status quo. Know what security you need and guard it well, live the day as if there were a tomorrow. Embrace the duties of the host, influence the influential, butt heads with nothing, and watch your wallet.

LIBRA: (23 Sept-22 Oct) If you wish to cast a shadow, you must first stand up. Toot your own horn melodiously, take care of business, and avoid what you can't afford. Laziness only seems like energy saving, quarreling seldom settles things, neglecting responsibility leads to powerlessness. Focus on your work, engage significant people, and stand for something right.

TAURUS: (21 April-20 May) Avoid hamstringing yourself with worry and behaving like an idiot who needs to be worried about. Put off decisions that involve signatures and pour your energy into friends and family. On the inside of your eyelids, write: love is a verb. Learn something, ask questions of leprechauns, stay in touch. Whenever possible, flit about and pollinate friendships.

SCORPIO: (23 Oct-22 Nov) Your plans and goals involve other people and deserve firm foundations. Just for fun, try listening to people who know what they're talking about. Hope, but avoid wishing. Dream, but stay alert. Ask large questions of yourself and accept no easy answers. There are no escapes, only journeys. Pack lightly, respect the natives, and consult your map.

GEMINI: (21 May-20 June) To get any better you'd have to be twins. And you are. The good news first, then the better news. Dissonance fades, your waveform dances with itself, kisses and hugs all around. As if by magic, cash comes down the chute and you have the chance to spend like a lunatic. Stop it. Realize the fun of intelligent effort toward realizable goals. Evaluate worth.

SAGITTARIUS: (23 Nov-21 Dec) Strong winds are blowing. Pound in the tent pegs of your personal affairs, don't ignore details, plot ways to increase your cash flow. Remind yourself who you are and what you do well enough to feel good. Reaffirm your talents, fall in love intelligently, let your mind roam free. Cooperate with fellow travelers but don't carry their baggage.

CANCER: (21 June-22 July) If you feel like being stupid, listen to your emotions instead of your head and whine a lot. Step up to the game. You know the work that needs to be done, follow no one but yourself. Change something, jump the fence and get on with it. Touch base, reconnect, put your finger in a friendly socket. Fear nothing but your reluctance to admit who you are.

CAPRICORN: (22 Dec-19 Jan) This month's magic ritual is the posture of detached engagement. In the world but not of it, that sort of thing. Deepen bonds, open your soul, and don't confuse people with objects. Rely on yourself, expect from others no more than they can give, separate friends from acquaintances. Follow only those who are headed where you want to go.

LEO: (23 July-22 August) You've had better months. The magic is working of course. The magic always works. Now it's just so far under the surface you forget it's there. Don't forget it's there. Face limitations, cop to weakness, rebuild the honesty in your life. Remember; if you do everything for yourself, the universe does nothing for you. Seize the moral high ground and wait.

AQUARIUS: (20 Jan-18 Feb) Time to rediscover yourself. Since all you seem to be doing is working, that must be the arena. Stop selling yourself short. In the great brunch of life, you're not chopped liver. Avoid criticizing others for not being who you want them to be, work smarter, watch your diet and take care of your health. Be someone you'd want to be with.

VIRGO: (23 August-22 Sept) Smooth sailing. Energy comes from outside sources, unless you dynamite your social and professional network by being a primadonna, flying off the handle, and embracing stupid ideas and wrong people. It's always a crapshoot. Feel free to be inspired, share all you have, and practice tolerance. Listen, accept help, and work for the joy that's in it.

PISCES: (19 Feb-20 March) A good month to listen to your dreams. A messy one if you get lost in shallow pleasures and hypnotic details or forget the difference between excitement and real fun. Hone your talents, shift your perspective and ride with change. You were going someplace, remember? Pick your mountain and check your gear. Love as if your heart depended on it.
