

BLAME IT ON THE STARS

ARIES (21 Mar-19 April): To say your energy levels are high would be world class understatement. You sparkle, you hum, you click and whirl. The world thinks you're cute as a speckled pup and even you will have a hard time making a mess of things. If you want a down side, you'll need to invent it. Sometime in the gaiety, look in the mirror and remember who you are. It's evidently enough.

LIBRA (23 Sept-23 Oct): So much for the quiet life. Wild rides on the roller coaster of love, attention from all quarters, the opportunity to make bad wagers. Keep a close watch on that heart of yours. What you see isn't always what's there. Welcome interesting strangers, take pleasure with friends, look closely at all investments. The wind is in your sails and the ship belongs to you.

TAURUS (20 April-20 May): Remember what happens when you get too busy to think? How much fun it wasn't? Take time to ask yourself what you're doing and why. Routine maintenance of the spirit. Avoid channeling your energy into power coups. If you must lead, do it silently. The value of the work is the work. You already know how to throw your weight around. Learn something new.

SCORPIO (24 Oct-22 Nov): A trek through the mysterious forests of yourself. Looking for a little truth and beauty. Resist the urge to hole up and curse the demands of friends. Your relationships define and reflect you; to receive, one must give. Be your own best friend. Listen to your needs, dicker with your wants, be the person you'd be if you could. Take long walks and don't stay out late.

GEMINI (21 May-21 June): First the good news: there is no bad news. You ricochet happily between friends and work, celebrating the marriage of who you are and what you do. Let the universe impose its own order on your schedule. Random acts of compassion, communing with your higher self, staying out till the cows come home. It's all part of the work which is, you recall, to be a fullblown human.

SAGITTARIUS (23 Nov-21 Dec): Yes, another adventure. Or perhaps several, in different realms. Offer your heart, build an impossible structure, get to the bottom of things. Change and motion, righteous persistence, expanding circles. Look truth in the face. Check your emotional skin for old wounds that haven't healed. Question what it was that hurt you and why you're nursing the pain.

CANCER (22 June-22 July): Very interesting. People are attracted to you, you respond by dumping old garbage on their head and explaining in detail how they don't measure up. It's doubtful this will work out. Go for Plan B: look where you've been, where you're going and the most pleasant way to get there. Accept the responsibilities that are yours, accept the irresponsibility of others.

CAPRICORN (22 Dec-19 Jan): The universe throws rose petals at your feet. Very good juju. Romance, excitement, money, fame. All things being relative, of course. Feel free to feel good about yourself, accept praise and patronage. Avoid distrust. Sometimes life is just good. Sometimes there aren't any catches. Okay, maybe a slap or two to remind you there are limits. Smiling will stretch them.

LEO (23 July-22 August): A good month to reexamine the difference between pleasure and excitement. Your emotional pond gets quieter when you look at things as they are rather than how you'd like them to be. It's a good month for building, fine tuning your work, and copping to your mistakes. If you must be angry at something, be upset by how much work is involved with being perfect.

AQUARIUS (20 Jan-18 Feb): You speak with clarity and force, professionally and personally. Good prospects for work. Your love life is more like mudwrestling in a thunder storm. Not necessarily bad, just brutal and ugly. Balance the chaos with order in your domestic scene. Feather your nest, organize your sock drawer, weed out your files. Maintain your balance and prepare yourself.

VIRGO (23 August-22 Sept): You tap dance in the spotlight of your karma. Increase, respect, applause. We all have a message to deliver, something to bring to the table. You're a welcome guest this month. Your responsibility is to behave as if tomorrow is what we make of today. The only real strength comes from virtue and the only real power has nothing to do with force. Laugh and sing.

PISCES (19 Feb-20 Mar): Don't romance a coworker and don't bet more than you can lose. Other than that, it's a good month, filled with warm and fuzzy connections with those closest to you. You're one of the world's great flirts and you're so good at it this month you're a public hazard. Follow the counsel of your own experience. There are many truths, not all of them useful at the same time.
