

# BLAME IT ON THE STARS

**ARIES** (21 Mar-19 April): For better or worse, you're ten pounds of energy in an eight pound bag. Those lusting for the pain and tragedy only hilarious mistakes can bring, should give their impulses free rein. Everyone else would be smart to use their brain cells constructively. Avoid whistling for things you really don't want to come and ignoring visits from the past. Old wine, new bottle.

**LIBRA** (23 Sept.-23 Oct.): Confusion clears. What is becomes distinct from what isn't. Good juju for partnership and money matters, a good time to take a long, hard look at your associations. What do they, and don't they, satisfy? What do they, and don't they, further? You reconsider someone you abandoned, seeing them in new light. With luck, they'll forgive you. Good luck.

**TAURUS** (20 April-20 May): Your emotional ducks are anything but in a row. They are, in fact, running loose. It's lunacy to chase them. Instead, shower love and appreciation on those you love and appreciate. Recognize the positive effect you have on other people as a gift, something you can give. In spiritual (and quantum) terms, this is the process called priming the pump.

**SCORPIO** (24 Oct.-22 Nov): Your plate is full. Work and love, love and work; great potential for success, significant chance for blunder. A relationship of the heart may deepen into full-blown partnership, benefits all round. The winds of work fill your sails, expect snotty gusts from the sidelines. Don't hunt elephants with a fly swatter and make no decision based on greed.

**GEMINI** (21 May-21 June): Oh my. One would do well to seek clarity. One would do even better to open a vein before imagining there is any advantage to taking advantage or that manipulation is a sincere form of flattery. You're a better person than this. Examine motives, exorcise fear and insecurity, count blessings. If you're romantically challenged, expect your cup to be filled.

**SAGITTARIUS** (23 Nov.-21 Dec.): A heavy load on the job mustn't be allowed to distract you from the real work. Coming to terms with how your life managed to spin out of control and land you in the unsatisfactory spiritual muck in which you're mired. This month should provide some answers. Do something with them. Exactly when do you think life starts? Only this day.

**CANCER** (22 June-22 July): It's about money, dear. And the schizoid relationship between success and dreams. If what you're doing doesn't further the path, it can't possibly pay enough or put you in line for the sort of raise that really counts. You've encountered a wall. You didn't build it but it's yours. Before climbing over it or bashing your head on it, sit and figure why it's there.

**CAPRICORN** (22 Dec.-19 Jan): A good month to examine the myth of control. Wild cards in the deck, idiots standing on your toes. Seize the moral high ground and avoid behaving in ways you wouldn't want to read about in the papers. Think seriously and say yes to anything that sounds fun. Get to know yourself better. Good character is the only thing you take with you.

**LEO** (23 July-22 August): Out with the old, in with the new. Or just out with the old. Reformation, reevaluation, transformation. It never hurts to reinvent yourself, refine the process, sand off the rough edges of who you are, grease the skids of who you're becoming. Matters settle in your favor, new players arrive; the game, as usual, is afoot. Laugh at setbacks, court the world.

**AQUARIUS** (20 Jan-18 Feb.): Check the current and go with the flow. You're different enough without trying, so don't try. Neither is it necessary to always lead. Let others get their own ducks in a row and help them if you can. You'll have a chance to find out how loyal old friends can be. Don't scrimp when it comes to saying thank you. Alone is not the same as lonely.

**VIRGO** (23 August-22 Sept.): You've had better months. Life comes at you from all sides and the pond of your karma is choppy. Problems arise, not all of them yours. Avoid taking charge against opposition, remember your opinions are fallible, don't attack anything. Patience, forbearance and diligence. The future is unknowable, only fools pretend to know it. Borrow no trouble.

**PISCES** (19 Feb.-20 Mar): If you're not enjoying what you're doing, why do it? Unless there's a dandy answer, reshuffle the cards and deal again. Without love, all work becomes a job. If the work isn't the right work, what you're selling is your time, your life and your soul. For what? With what sort of tomorrow in mind? Stand naked in the wind and dance new magic.

The best test of truth is the power of the thought to get itself accepted in the competition of the market. We should be eternally vigilant against attempts to check the expression that we loathe.  
Oliver Wendell Holmes, Jr.
