

BLAME IT ON THE STARS

Aries (21 Mar-19 April): There's nothing trite about new beginnings. Same wine, better bottle. Being a natural leader has its drawbacks, as those you're pushing around would be happy to tell you if they thought for a second you'd listen. Listen. Give long thought to what works and what doesn't, avoid confusing what is with what isn't. Life's too good to be ignored.

Taurus (20 April-20 May): Spend more time seeking than hiding. You are who you are, no better no worse. Free the dancing rabbits of your spirit, find common ground, love more freely. Hold your tongue, speaking may cause pain and sadness. None of us are here to make each other unhappy. We're here to understand the roots of being human.

Gemini (21 May - 21 June): Whatever it is that's frightening you isn't real. Embrace chaos and invoke clarity, meditate in the drum factory, remind yourself who you are. Power flows through work with others, what benefits one benefits all. In a relativistic universe, all support is mutual. Plant yourself on the high ground, blow the fog away and do good work.

Cancer (22 June-22 July): Your confidence isn't misplaced. Growth in all quarters, order emerges naturally. Your compassion and understanding are the best tools in your toolbox. Listen to yourself, tell others what your heart feels, be a vessel for their friendship. Matters are furthered by joint action and they're furthered nicely. Pay respect to the life that got you here.

Leo (23 July- 22 August): You're at the center of much energy. Your vision is clear, your heart is good, your goals are worthwhile. Say yes to whimsy, come to your party, light warm fires in cold rooms. Discord may arise; partnerships, domestic arrangements, fair play. Restraint and the calm pursuit of understanding. Someone comes to render your heart young and gay.

Virgo (23 August -22 Sept): Trust your sense of optimism. Important seeds were well planted, the harvest approaches. So does love of the toe curling variety. Use the energy gained to deal with potentially nasty flair-ups with a partner of some sort. Measure your responses and resist behaving like a large child. Believe in everyone involved and act on your beliefs.

Libra (23 Sept.-23 Oct.): Personal inventory time. Niggling frustrations with work, niggling misgivings at home. Learn again what feeds you and what makes you sick. What is it you need and what is it somebody told you you want? What are you looking for and what are you no longer willing to put up with? Remember that balance is incompatible with all motion.

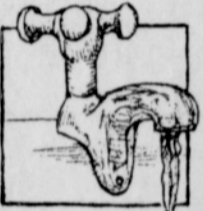

Scorpio (24 Oct - 22 Nov): You move smoothly in the world. Wrinkles are ironed out, misunderstandings are clarified, you remember how fun it is to fly. In a world of matter and form, it's good to only desire the best. It's not so good to spend like there was no tomorrow. Stuff is only stuff. Humans, on the other hand, are as desirable as they are impossible to possess.

Sagittarius (23 Nov - 21 Dec): It's unclear how things could be better. Effortless progress on many fronts. What was on the truck arrives, the check is delivered, you and another human find the joy of playing well together. Your natural flair for freedom is a wind that fills other's sails. There's nothing quite like knowing yourself and loving others just for the joy that's in it.

Capricorn (22 Dec - 19 Jan): The quiet time. Think, plan as if the future would result from it, practice the patience of the mountain. Assert your power quietly, whisper your praises and others listen more closely. No fault in being who you are, no error in letting people know you're not chopped liver. Bearing in mind there's a great potential for putting both feet in your mouth.

Aquarius (20 Jan - 18 Feb): Many balls to juggle, many small creeks to jump, many temptations to yell and scream. You won't. Optimism under confusion, the bearable lightness of believing good things often happen. And that if you're behaving like a nitwit, they happen to others. Be open to new allies, spend what you have on what you really want. Smile often.

Pisces (19 Feb - 20 Mar): You're on a roll. Think no small thoughts, take no small actions, accept no excuses. What is there to wait for really? The strength you feel is no illusion, the Zen clarity of your path is no trap. Feel the wind in your face, compose epic poetry you can dance to, dance naked to it in the moonlight. Crazy is not the same as insanity. Celebrate the difference.
