

BLAME IT ON THE STARS

ARIES (21 Mar-19 April): Follow your instincts and avoid marching to anyone's drum but your own. It's your movie. Beware of scripts written by someone else. You're tempted to be cranky and short tempered. Rise above it. Focus your attention on work. It's a long game and only fools get lost in what was. Balance what is with what you want it to be.

LIBRA (23 Sept-23 Oct): You're as happy as you want to be. The challenge is to balance fierce independence with love and companionship. It's easier now than usual and you'd be wise to embrace both just for practice. Expect interference patterns in the wave form of your life. Everything is a gift. Be grateful for what you have and want only what's yours.

TAURUS (20 April-20 May): You're chomping at your bit and pulling your leash. Good. Complacency is the mother of stagnation. Frustrations are opportunities blurred by dull thinking. The path may not be clear until you take a step in some direction. No fault, no error, no blame. The future is building, one decision at a time. Life is an adventure, not a nap.

SCORPIO (24 Oct-22 Nov): It's about love and the parameters of partnership. The marriage of you don't give enough to you want too much. Yes, that one. Avoid denial like the mental plague it is. You? Selfish and thoughtless? Stranger things have happened. The missing element may be appreciation: the deep and simple joy of actively treasuring the truly precious.

GEMINI (21 May-21 June): Inner strength under action, pushing upward. You expand your rules of engagement. Avoid getting in anyone's face: it's neither necessary nor productive. Work alone then bring all you have to the table. Dust off your philosophical underpinnings and live by your own rules. Allow life to amaze and delight you and share the fun.

SAGITTARIUS (23 Nov-21 Dec): Deal with fiscal challenges by forgetting about the money. Worry coupled with overconfidence is a hellish mix. Give yourself the advice you give others: look at the good stuff and begin some noble adventure. It's the old know yourself routine: if you know who you are and be it, the winds of the universe are at your back. Nice universe.

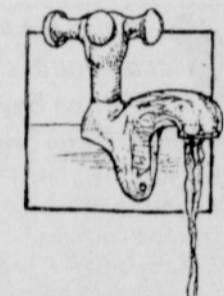

CANCER (22 June-22 July): Power is never misplaced; it can, however, be used inappropriately. Chances are good you won't. Externalize your dreams and be who you are, as long as being who you are contributes to the common good. The idea of progress cheapens the process of fulfillment. Work for the joy that's in it, celebrate yourself, and be certain the check's in the mail.

CAPRICORN (22 Dec-19 Jan): In terms of romance, you're an absolute rascal. Real potential for the sort of pleasure that falls one click short of wallowing. Unless, of course, you mope around nursing wounds sustained in some old melodrama. Engage interesting people and be one, acknowledge your imperfections, cut your fellow humans some slack and watch your wallet.

LEO (23 July-22 August): The sort of month a Leo deserves. The world takes notice, your influence grows naturally, you're up to your eyeballs with love. You can, of course, blow them all by impatience and lack of focus. Go deeper and stay there longer. Feed yourself with your vision of who you are, feed others with your love of the best that's in them. Burn steadily.

AQUARIUS (20 Jan-18 Feb): It's good to feel bullet proof as long as you know you're not. A high energy time: finances and deals and interhuman communication. Communication should have as its goal understanding. No one promised the world was perfect. Your assignment, should you take it now or put it off till later, is to not go nuts when people are stupid.

VIRGO (23 August-22 Sept): To have a bad month, you'll really need to try. Work begun will prosper, work completed will be recognized. You have wisdom; share it. You have more than you need; give it. Be bold, be honest, be compassionate, resting sure in the knowledge that work is always rewarded. Play well with others, embrace pleasure, invoke higher forms of love.

PISCES (19 Feb-20 Mar): A Pisces not dreaming is a Pisces asleep. The present molds itself to our vision of the future, magic is the practice of mystery. Believe in what you want, want only those things you believe in. And they say life is complicated. Expect a visit from someone who needs help. Treat them as if they were yourself. What could be simpler? Or, for that matter, more fun?
