

BLAME IT ON THE STARS

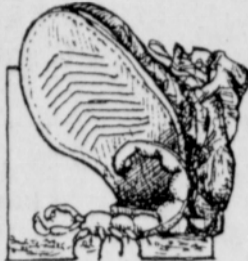

ARIES (21 Mar-19 April): Whatever you're doing, do it better. Focus the little gray cells on eliminating the inefficient. This will help you in your efforts to not blame everyone else for the state you're in. Darkness creeps in from the edges, banish it by laughing at yourself, recreate reality by changing your perceptions of it. Nothing to it but to do it. Choose to be at peace.

LIBRA (23 Sept-23 Oct): You've had better months. Swimming in a swamp comes to mind. Or perhaps jogging in a mine shaft. Get outside of whatever you're locked into, see matters as they are, look deep into the mirror. Something deserves your faith, have faith in it. Your mountains are molehills, you're being thin-skinned and are nurturing your weaknesses.

TAURUS (20 April-20 May): Something wants to change you. Let it. Decrease the distance between you and the world, engage your family on deeper levels, let yourself be led by a child. Your faith may have faltered. Renew it. Life tends to match our expectations. Expect good, get good; expect bad, get bad; expect nothing, take what you get.

SCORPIO (24 Oct-22 Nov): Ignore your friends and they become acquaintances, what's taken for granted evaporates. You really can do better. Power does not come from ramming your opinions down people's throats or disagreeing just for the joy of confrontation. If you think you're in it alone, you will be. If you must tear down something, make it a wall.

GEMINI (21 May-21 June): The ends of things lie in their beginnings. What's done is done, what's to be depends on what you do. Big doings. Beware of taking matters personally and digging in your heels while standing on sand. Better to practice high diplomacy, work to benefit others and preserve integrity on all levels. Real power is quiet and laughs often.

SAGITTARIUS (23 Nov-21 Dec): It's mostly about your work. Real potential for growth, new contacts, new forms. When the spotlight hits you, it's best to smile. Some emotions have been smoldering. Expect flames, burned fingers and completion of sorts. Time isn't money, but it's the most precious commodity you have. Don't waste it on fools.

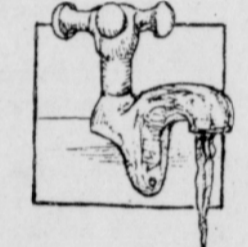

CANCER (22 June-22 July): Further neglect is not an option. Time to step up to the plate and deal with what is. Reality no longer matches some of your ideas about it, winds are blowing, bend or break. Disavow pettiness and squabbling, observe more and judge less, rule your emotions with your intellect. Open the drapes, kiss someone, work on your happy dance.

CAPRICORN (22 Dec-19 Jan): Time to look at the forest instead of the trees. Goals are only as good as your determination to reach them, but any goals are better than none. Others may not know where you're coming from or where you're going. Tell them. Dust off your belief system, use your head and rise up off your duff. There's no engine driving you but your own.

LEO (23 July-22 August): Professional matters push upward. Recognition, responsibility, cash. Something you have is more valuable than you think. It's hiding in plain sight. When mixing business and friendship, there's nothing quite like a contract. Your love life takes a turn. Several, most likely. You're on a roll and only your ego can stop you.

AQUARIUS (20 Jan-18 Feb): Money concerns arise. Have faith in your abilities to rise with them. A good time to stop underestimating yourself and venting your insecurities on those who love and respect you. Pick up your end of the stick, polish your game, keep your hands out of your wallet. Just burrow in, hunker down and do what needs to be done.

VIRGO (23 August-22 Sept): You need to grab the reins and lead your horse to water. The map you're using may have misprints, the directions others give you may be wrong. Think, then act. It wouldn't hurt to admit you need help or to try to make yourself better company. Spend quiet time with those you love, cultivate calm, listen to your voices.

PISCES (19 Feb-20 Mar): Got a chip on our shoulder, do we? Had it up to here with people too stupid to do it your way? Wondering if it's all worth the bother? Before you light the fuse that will detonate more than you think, you might consider changing your sails instead of cursing the wind. Form bonds, initiate alliances and stop whining about your reality.
