

BLAME IT ON THE STARS

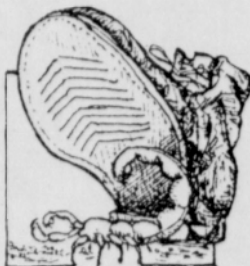

ARIES (21 Mar-19 April): A dandy time to pull in your horns. The material world rears its fiscal head, you're encouraged to hold onto what you have and do what you do more efficiently. Your nerves will be on edge; don't spread the disorder. Be graceful in the face of uncertainty, be fair in your dealings, look for strengths rather than weaknesses. Love wisely, fully and well.

LIBRA (23 Sept-23 Oct): Not the best month to spend like a drunken sailor. Take time from your busy schedule to look at reality. Seek and you'll find, doors are more likely to open if you knock. All cash flow problems respond to a) spending less or b) making more. Choose both and throw yourself into the game. Those who love comfort do well not to make themselves uncomfortable.

TAURUS (20 April-20 May): Pawing the ground and snorting, are we? Looking for a fight? Feeling unappreciated, neglected and bored? Time to get a grip. You're not being pleasant company, you're alienating allies and ignoring possible friends. Your head is not where it should be. Smell a flower, work for something rather than against it. Your biggest enemy at the moment is yourself.

SCORPIO (24 Oct-22 Nov): Time to step up to the plate. Nursing grudges and crying foul don't count. Seize the moment to have faith in yourself, reconnect with power and polish your game. Promote yourself, reinvent your work and avoid throwing money into the paper shredder. Feeling misunderstood? Practice clarity. Gently and forcibly remind the world who you are.

GEMINI (21 May-21 June): It's not as scattered and uncertain as it seems. Follow the string of your world line and have faith. Avoid hobbling yourself with insecurity, don't manifest it by not listening to others or overspending on short term escape. Do what you do impeccably, look for ways to help, don't undervalue time. Life's not a mystery; it's an experience. Be there.

SAGITTARIUS (23 Nov-21 Dec): A little housekeeping is in order, there are messes that need cleaning up. If your cup's half empty, look again. You have limitations; recognize them. You have potential; actualize it. The world reflects your perspective. Since when are you an ugly duckling? You may find romance to be the answer to a question you ought not to have asked.

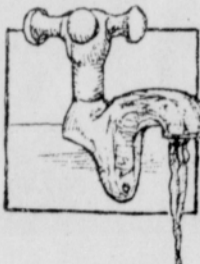

CANCER (22 June-22 July): A good time to remember love's not a noun, it's a verb. We are what we do, actions either increase or decrease our options. Close the distance between yourself and your people, make new connections, seize loose reins. Walk away from bothersome people and situations, refuse to argue, let pleasure find you. Play well rather than hard.

CAPRICORN (22 Dec-19 Jan): There is such a thing as enlightened self-interest. Rediscover it. It doesn't involve sabotaging friendships, embracing half-baked ventures or confusing possibility with fantasy. You can do better. What is it you really want? What can you do to make it yours? Conserve your energy by funneling it into enterprises larger than yourself.

LEO (23 July-22 August): The ends of things are in their beginnings. A time for laying foundations, use bedrock rather than sand. Offers arrive; screen them well. Sift reality from illusion, recognize deception and half truth in yourself and others. Nothing is furthered by imposing your will, lashing back at authority or changing what should be left alone. Mistakes now will linger.

AQUARIUS (20 Jan-18 Feb): When in doubt, make a plan. It shouldn't involve irritating people, acting without thinking or biting off more than you can chew. Build on what's there: your reputation, your respect for good work, the people who return your phone calls. Stand up, cast a shadow, leave larger footprints. The prayer that's answered fastest involves right action.

VIRGO (23 August-22 Sept): Inactivity is its own reward. Time to work positive change: revamp, modify, improve. Indecision is a decision, most often an inappropriate one. Don't worry about being wrong, worry about not being. Stand for something and speak truth without believing your perspective is holy. Move slowly and deliberately, but move at all cost.

PISCES (19 Feb-20 Mar): Deep matters play out on the surface. Life is ordered by what we believe in, what we honor, what we will and won't allow. Check your circuits for inconsistency. If you're being misunderstood, it's because you're not letting people know who you are. Do what needs to be done, give serious thought to the future, promote nothing involving ill will.
