HOROSCOPES

By Soup Can Sam Staff Astrologist

Libra (Sept. 23-Oct. 23)

High tea is only as high as the table it's set upon, regardless of what's being served. Don't let others make you feel 'less than', especially for superficial reasons. Don't think yourself so above it all that you put on airs and make those around you feel inferior. Have a cucumber sandwich and chill a bit.

Scorpio (Oct. 24-Nov. 22) These last weeks of October with autumn upon us, be sure to check your pockets. Don't be letting things drop out of them on accident or on purpose. Same goes for your head.

Sagittarius (Nov. 23-Dec. 23) Now is the time to be investing... most likely in stocks, definitely in education, and always in love. Financial Advisor Soup Can Sam I am not, but some advice I'm sure you've heard before is buy low and sell high. Works in the world of romance: You have an opportunity to make out good in the future if you put what you've got into it now.

Capricorn (Dec. 24-Jan. 19) Take a nap. Tomorrow take another. Do it again next week. Your

duties can wait. You'll be so much more effective after revitalizing yourself that time will make itself up without you giving it a thought.

Aquarius (Jan. 20-Feb. 19) It's time. Ready, set, go! It might end up being a distance race rather than a sprint, so be sure to pace yourself. And drink lots of fluids.

Pisces (Feb. 20-March 20) Now that the rain has arrived, go out and enjoy the cloud cover. It's Portland, after all. You need to make it a habit to still get some fresh air no matter the weather. In the midst of it you'll feel better than when looking out from inside. And, surprisingly you'll not get nearly as wet as you think, even without using an umbrella.

Aries (March 21-April 20) There's nothing wrong with going back to the old ways. Using more paper and less gadgets could be a way to make your life more efficient.

Taurus (April 21-May 20) Penny Lane is not just a song, nor is it only a street in England. It is wherever you happen to be when you find a lucky one. Head up or tails, dirt covered or shiny, it should be picked up, rubbed in the pocket and pondered. Keep on the look

out for good things coming your way each time you see a winkin' Lincoln. You'll soon be humming a new tune.

Gemini (May 21-June 21) Sometimes roughing it makes life easier on your body. Call me crazy, but dried fruit and nuts aren't just for camping. They are good for the brain and great for getting on with it, if you know what I mean.

Cancer (June 22-July 22) Volcanoes are just mountains waiting to blow their tops. Don't ever think you are out of harms way permanently. Evaluate what chances you should and shouldn't be taking this month.

Leo (July 23-Aug. 23) Check 'other' or 'mixed' on all paperwork and surveys you fill out this coming week. If everyone in our nation were "mixed/other than," the discrimination that happens regularly might come to an end. If we're not already of mixed origine, than we need to at least pose as such socially, caring for each other as ourselves.

Virgo (Aug. 24-Sept. 22) Focus! Do not rely on the automatic setting in life. Take a moment to use your judgement, your own point of view, to hone in on what's really important. Might take some adjustments.
