HOROSCOPES

By Soup Can Sam, Staff Astrologist

Gemini (May 20-June 20)

The rash of recent news reports about bizarre, cannibalistic crimes has most of us perking up to the possibility of a zombie apocalypse. You're always one to follow the latest trends, but I'd advise against taste-testing human flesh. This being Portland, they'll probably have a soy-based substitute in stores soon.

Cancer (June 21-July 22) Admit it — your mental wheels are getting a bit rusty. You can tell yourself you're an intellectual all you want, but every evening you spend watching "Toddlers & Tiaras" is minus points. Remember the library? It's like a free, slow Netflix. If you put "Waking Life" on hold now, you'll be contemplating the nature of consciousness by Thanksgiving.

Leo (July 23-Aug. 22) If you play your cards exactly right, your career could have the longevity of Betty White's, the influence of Oprah's, and the notoriety of Saddam Hussein's. But if you mess it up now, you'll die unknown and unappreciated, with a small chance of being posthumously celebrated a la Edgar Allan Poe.

Virgo (Aug. 23-Sept. 22) Pay attention to your dreams. That one where you were in a weird place that kind of looked like your office, but it was surrounded by

lava, and you were with your cousin Patrick and your friend from middle school, and you were playing mini golf and talking about Mitt Romney? Yeah, that was important.

Libra (Sept. 23-Oct. 22) Say yes. Just do it. You have GOT to stop refusing social invitations, no matter how daunting the prospect of putting on pants. If you don't start rallying, you'll see those invitations dwindle to nothing. So grit your teeth, peel off the Snuggie, and prepare to face the world.

Scorpio (Oct. 23-Nov. 21) Is nothing sacred? Does anything have meaning? Are you the guinea pig in a sick alien experiment, and everyone you love is a hologram? I'm sorry about this doozy of an existential crisis, Scorp. It will pass, but for now all you can do is sit back and endure the dark, pulsing indifference of the universe.

Sagittarius (Nov. 23-Dec. 23) Drew Barrymore just got hitched for the third time, but your romance is headed for rough waters. The only way you'll be able to salvage it is to spend some time apart. It's about time you visited your parents anyway — make like E.T. and phone home.

Capricorn (Dec. 24-Jan. 19) Own up and apologize, or risk retribution. Always a solid standby for all that ails ya!

Aquarius (Jan. 20-Feb. 18) Wow! You look fantastic today. Have you lost weight? You're positively glowing. I bet it's all that money, power and authority that's barreling your way right now like a speeding locomotive.

Pisces (Feb. 19-March 20) Self-deprivation never resulted in good hair. Or, for that matter, a delicious Sunday brunch. Splurging just a little will make you feel ready to take on the world, one overpriced organic candle at a time.

Aries (March 21-April 19) Treat your exes well, or risk becoming fodder for the title track of their debut reggae-infused country album. You'd hate to be known as the one that "You're the Reason Our Kids Are So Ugly" was written about.

Taurus (April 20-May 20) Lately, you just can't catch a break. There's tension at home, uncertainty at work, and then there are those pesky Facebook stocks that you bought. You'll solve a lot of your problems by laying low for a while — no confrontation will end well for you this month
