HOROSCOPES

By Soup Can Sam, Staff Astrologist

Virgo (Aug. 23-Sept. 22)

You will be surprised by the lengths people will go to make you happy in the coming weeks. You will also be surprised at how happy you will be with no effort at all. Count your blessings: These are two brilliant extremes to have to live with.

Libra (Sept. 23-Oct. 22) Your back is against the wall, but cornered marmots don't turn tail and run! No sir! They get all fuzzy and angry-cute, and it is adorable! Nonetheless, marmots can pack a fierce bite. Flash your pearly whites a little more this coming month and you will find more people will be smiling back.

Scorpio (Oct. 23-Nov. 21) Someone in your workplace has taken a shine to you, so be gentle with the emotional tension going around, and if you're offered cake, EAT THE CAKE! And you will enjoy this and it will make someone happy. That's all you have to do.

Sagittarius (Nov. 23-Dec. 23) This month, familiarize yourself with the female anatomy. It's pretty interesting, and apparently it holds the secret to achieving peace, love and the pursuit of happiness. Women, as the stars will tell you, are not from Venus and men are not from Mars. Politicians, however, do come from wormholes.

Capricorn (Dec. 24-Jan. 19) Why burden four wheels when two are perfect for the job? Like Freddie said, get on your bikes and ride! (Not that there's anything wrong with four, three or six wheels.)

Aquarius (Jan. 20-Feb. 18) There's a disturbance in your fifth house, likely caused by a moon concentration that's crowding your stellar space, (dude). It will take a few days for the celestials to shake loose, but when they do, you will want to be healthy and in shape for the freedom coming your way. There will not be Kleenex where you're headed next week.

Pisces (Feb. 19-March 20) You can no longer trust the pigeons in your neighborhood. Stay alert.

Aries (March 21-April 19) Travel loudly and abundantly this month. And the month after, and so on and so forth. Movement and adventure will take care of most of your problems. You will, however, have to return. Or not.

Taurus (April 20-May 20) Suns and moons are calling on you to take a stand — against sitting! This is the year for working upright, for getting off your bum and putting your life back in balance! It's going to be fun!

Gemini (May 21-June 20) Kale is waiting for you, perky and funky fresh.

Cancer (June 21-July 22) You're instincts are better than you give them credit. Trust them next time you're tempted by a pair of wedge heels.

Leo (July 23-Aug. 22) Come down on your own and leave your body alone.
