HOROSCOPES

By Soup Can Sam, staff astrologist

Cancer (June 21-July 22)

Rethink your berry intake. There is a bounty out there waiting for you — plucked, picked or piled up — there's a fruit out there for you!

Leo (July 23-Aug. 22) After a thorough scouring of the cosmic synapses, it is decided that you should avoid life's fast lane this month. It's time to just set the cruise control and take your time to get where you're going.

Libra (Sept. 23-Oct. 22) It's summertime, it's summertime. Like you didn't know that. Avoid the obvious this month. It might just pay off.

Scorpio (Oct. 23-Nov. 22) Face it — balance is not your strong suit. It's not even in your wardrobe this summer. You will fall down, you will get back up, you will fall down again, get back up again ... maybe there's some equilibrium here after all.

Sagittarius (Nov. 23-Dec. 23) The winds of change are getting stronger by the minute. Catch a current and see where it takes you.

Capricorn (Dec. 24-Jan. 19) No softball shit this month. Bring it.

Aquarius (Jan. 20-Feb. 18) According to the Greek legend, Sisyphus was banished to an eternity of pushing a great boulder up a hill, only to have it roll back down everyday. On

the bright side, at least he had a full-time job.

Pisces (Feb. 19-March 20) What are your plans? Forget them. Someone will come along and fuck it all up anyways.

Aries (March 21-April 19) The water sign shows that you may be stranded, prevent an unfortunate situation. Carry your own TP.

Taurus (April 20-May 20) Another state legislative session is in the books... too bad it was a paint-by-numbers kind of book.

Gemini (May 21-June 22) Don't get caught up in formalities this month. No shirt, no shoes... no problem. Just kick back barefoot and enjoy the tan.
