About 3 o'clock on last Sunday morning the barn of W. F. Coulter at McMinville, was discovered to be on fire by Mrs. Coulter, who had been awakened by a noise in the barn. She gave the alarm, and Mr. Coulter succeeded in getting three horses and a cow out of the barn. There were several tons of hay, and other feed and other articles of value in the barn, which were burned. The building was insured for \$300 and contents for \$150. It is not known how the fire, which started in the stairway, originated, but it is supposed that it was set on fire. The barn was built but a few years, and the loss by the fire is severely felt by Mr. Coulter.

The "good roads" movement is steadily gaining ground. It is being talked up by almost every one. The general expression is in favor of good roads, and that a united effort should be made to make the roads good. Farmers, and every one who travel over the roads in the miserable condition they are now in, and especially those who have heavy hauling to do, are more than ever convinced that some systematic method of road making should be adopted for improvement of the public highways. The benefits to be derived by communities having good roads are innumerable. It draws trade to towns having them. The farmer can store his grain and other products at home, or in a barn, and haul to the market by the wagon, being able to

Lord Russell of Killowen, who has time to the great dignity of Lord Chief Justice of England by distinguished work as a lawyer, has written for The Statesman of February 12th an striking paper on "The Bar as a Profession." This paper, published by the Standard and cleared up by the Standard, made the author, when he explains Mr. Charles Russell, a leader of the bar.

Of a somewhat Lord Russell says: "The desirable thing is to have something to say; and as to the manner of saying it, Daniel Webster spoke truly in his celebrated oration in honor of John Adams when he said, 'Clarity, force, and earnestness are the qualities which produce conviction.'"

Regarding the necessary qualifications for law: "Love of the profession for its own sake, and physical health to endure its trials, clear-headed common sense and ability to wait are the main considerations to be taken into account in determining a student of the bar as a profession. If the youthful aspirant possesses these, success is, happily speaking, certain. He has to remember that while he is fighting for the interests of his client, there are other interests even greater than those; the interests of truth and honor; and he must never forget, as Sir Alexander Cockburn well expressed it, 'that in the battle his weapon must always be the sword of the soldier, and never the dagger of the assassin.'"

For the next issue of the Companion, the Washington's Birthday number, Justice Oliver Wendell Holmes, the able inheritor of a great name, has written an interesting supplement to Lord Russell's article, presenting the subject from an American point of view. Appended to the article is a brief register by Lord Russell and a final comment by Mr. Justice Holmes.

Each issue of the Companion contains one or more articles of exceptional value, written by the ablest and best known men and women of the age.

A. C. Miller, of Kings Valley, was in Corvallis, says the Gazette, on business, before the county court. Mr. Miller is a strong advocate of good roads and is not favorably impressed with the Oregon road laws. He made the statement that one cent on each bushel of wheat raised in Kings Valley, for the past two years would have created a fund sufficient to build a Macadamized road from Hoskins to the Willamette river. With such a road grain could be stored in private granaries and marketed during any month in the year, thus saving the cost of storage. He thinks if road taxes were paid in cash and the highways improved under contracts let by the county court the effect would be beneficial.

I have just received about 300 bushels No. 1 Bluestem wheat. Parties wanting this kind of wheat for seed, had better engage it while it is to be had, for there is very little of it to be had, suitable for seeding purposes. Call and inspect. Also inquire of parties who are used to this kind of wheat, what they think of it, and you will take it for a change in preference to the valley wheat.

Respectfully yours,
J. W. Exon, Dayton.
