

The Designer for March contains among many other attractive features, three short stories—'The R. L. of Senator Marsh,' 'The New Dress' and 'What Happened to Miss Millicent,' the last for juvenile readers. 'What Women Are Doing' is a new and interesting department, so too, are 'Follet Table Chat' and 'In Motherland.' There are many special features in fashion designs. An expert milliner in aid of pictures and text tells how to make two fashionable spring bonnets, the able water of 'Points on Dressmaking' instructs amateur in the making of exquisite under wear. 'Fashion and Fabrics,' hints on etiquette and numerous savory recipes for cookery are also included in list of reasonable and valuable items.

In going over the famous 'Shasta Route' of the Southern Pacific Co. the traveler ever finds something new to excite his admiration and interest. Starting at Portland, and traversing the whole length of the Willamette Valley, the gem of the Northwest, Mt. Hood, Mt. Jefferson, and the Three Sisters and other snow-capped peaks are kept in sight for hours. The beautiful valleys of the Umpqua and Rogue rivers, with their orchards of pears, apricots, apples and other fruits are a delight to themselves. The crossing of the great mountain barrier reveals the grandest mountain scenery in the United States. The wonderful turnings, twistings and doublings of the railroad bring into view a grand array of towering mountains and profound gorges into which we gaze from dizzy heights. forest clad mountains slope stretching up to the line of perpetual snow, and the mountain streams dashing fiercely down deep canyons, now and then stopping for a short rest in some quiet pool. After a day's enjoyment of old Mt. Shasta, the finest peak on the continent, we drop rapidly the canyon of the Sacramento to the broad plains of the Sacramento Valley in California, and thence through vineyards and orchards to San Francisco.

CASCADE RANGE.
The report of the examination of the 'Cascade Range and Ashland Forest Reservoirs and Adjacent Regions,' by Mr. J. B. Leiberg, now in press, but not published, is a part of the Twenty-first Annual Report of the United States Geological Survey, and is edited by Mr. Henry Henscott, Geographer. The region discussed in this report is in south eastern Oregon. It contains nearly 8,000 square miles, 4,676,350 acres, comprising the central and upper areas of Rogue and Klamath river basins, and a small part of the watershed of the Upper South Umpqua River, and is divided into two nearly equal portions by the main range of the Cascades. The Eastern and western slopes have many dissimilar characteristics, the country dropping down on the west, in long spurts to the valley of Rogue River, and on the east to steep declivities to the Klamath Lakes and the great plains stretching westward from them. The mean elevation is 6,000 feet. The character of the Cascade Range is volcanic, the cones and peaks being of different ages, extinct craters abounding among them, the one containing the famous Crater Lake. The Ashland Forest Reserve consists of Siskiyou Peak, or Ashland Butte, nearly 8,000 feet above sea-level, and contains over 22,000 acres. The object of this reserve is to maintain the volume and purity of Ashland Creek, the water supply of town of Ashland. The Siskiyou Mountain range forms a connecting link between the Coast Range and Cascades.

In this region the same general conditions prevail as in Mount Rainier Reserve. The crest of the range forms a dividing line between two widely differing sets of forest conditions. Upon the west, with an ample rainfall, the forests are fairly dense, and the undergrowth luxuriant. Upon the east, where more arid conditions prevail, the forests are open, with no underbrush. The species differ measurably on the two sides. Those on the west consist largely, if not mainly, of red fir, while upon the east side the forest is largely of yellow pine. Of area examined by Mr. Leiberg 85 per cent is forested and 15 per cent not forested, the non-forested areas lying mainly in the extreme west and east and in the eastern part of the area examined. The amount of raw stream lumber found on the forested

area is estimated by him at a little less than 20,000 million, an average per acre of the forest land of 6,660 feet. Of the total stand of timber upon this area, yellow pine comprises 45 per cent; red fir 33 per cent; white fir 5 per cent; noble fir and sugar pine each 4 per cent; the remainder is of other species. West of Cascade Range, red fir is the dominant species, affording more than half of the total amount of timber, yellow pine being next with nearly one fourth of the total; east of the Cascades on the other hand, yellow pine constitutes six-sevenths of all the timber.

Fires have widely ravaged this region. Of the forested area examined, in round numbers 3,000,000 acres, Mr. Leiberg estimates that 2,975,000 acres or 99.16 per cent are fire-wrecked; and that of this fire-wrecked area 687,000 acres are hadly burned. That is to say, within the last forty years, settlement clearings not included, 7,000 million feet, B. M., of merchantable mill timber has been destroyed by fire.

The paper is well illustrated by fourteen plates.

THE HOME GOLD CURE.
An Ingenious Treatment by which Drunkards Are Being Cured Daily in Spite of Themselves.

No Noxious Doses. No Weakening of Nerves. A Pleasant and Positive Cure for the Liquor Habit.

It is now generally known and understood that Drunkenness is a disease and not a habit. A body filled with poison and nerve shattered by periodical or constant use of intoxicating liquors, requires an antidote capable of neutralizing and eradicating this poison and destroying the craving for intoxicants. Sufferers may now cure themselves at home without publicity or loss of time from business by this wonderful 'Home Gold Cure' which has been perfected after many years of close study and treatment of inebriates. The faithful use according to directions of this wonderful discovery is positively guaranteed to cure the most obstinate case, no matter how hard a drinker. Our records show the marvelous transformation of thousands of drunkards into sober, industrious and upright men.

Wives cure your husbands! Children cure your fathers! This remedy is a sense a nostrum but is a specific for this disease only, and is so skillfully devised and prepared that it is thoroughly soluble and pleasant to the taste, so that it can be given in a cup of tea or coffee without the knowledge of the person taking it. Thousands of drunkards have cured themselves with this precious remedy, and so many more have been cured and made temperate men by having the 'Cure' administered by loving friends and relatives without their knowledge in coffee and tea, and believe today that they discontinued drinking of their free will. Do not wait. Do not be deluded by apparent and misleading 'improvements.' Drive out the disease at once and for all time. The 'Home Gold Cure' is sold at the report of more price of one dollar, thus placing within reach of everybody a treatment more effectual than others costing \$25 to \$50. Full directions accompany each package. Special advice by skilled physicians when requested without extra charge. Sent prepaid to any part of the world on receipt of One Dollar. Address Dept. The claim of other cough medicines to be as good as Chamberlain's are effectually set at rest in the following testimonial of C. D. Glass, an employe of Bartlett & Dennis Co., Gardiner, Me. He says: 'I had kept adding to a cold and cough in the winter of 1897, trying every cough medicine I heard of without permanent help, until one day I was in drug store of Mr. Honlehan. He advised me to try Chamberlain's Cough Remedy and offered to pay back my money if I was not cured. My lungs and bronchial tubes were very sore at this time, but I was completely cured by this remedy, and have since always turned to it when I get a cold, and soon find relief. I also recommend it to my friends, am glad to say it is the best of all cough medicines.'

We desire to give McMinnville and vicinity a better service in the line of building materials. What we need is a mill nearer our city, and better yet, a mill situated in our fair, growing city, where Lumber, etc., can be made the year round, giving employment to a larger number of men, supplying material during winter months, and, above all, keeping our money at home and distributing it among our business men and employes, instead of sending it away to build up other communities to our loss.

By careful investigation, we have been able to locate

A Change in Business.

ALARGE BODY OF EXCELLENT TIMBER, consisting of White and Yellow Fir, Cedar and Hardwood. This body of Timber is available to our city, but will require a large amount of capital to handle the enterprise, and if we can reduce our stock sufficiently to get the required capital, we will be able to give our patrons the benefit of the saving in the long haul from our present mill, which means a saving of at least \$2 a thousand on Lumber. To secure this capital, and to secure it quickly, we commenced

In fact, everything that we carry in stock will go at some figure. In addition to our stock of goods we will offer our
