SNAKES OF ARIZONA.

THE TERRITORY NOTABLE FOR ODD REPTILES.

Natural Breeding Ground for Them—Illustrations of the Power of the Serpent to Fascinate—Experience with a Coach-Whip Snake.

The Smithsonian Institution authorities say that more varieties of poisonous snakes are found in Arizona than in any other part of the United States.

The best authority on Arizona snakes is believed to be Graham Peck, who has been studying them for years.

"No other region in the United States is so much of a natural breeding ground for the rattlesnake as is southern Arizona," said he to a correspondent of the New York Sun.

"The rocks of the mountains and foothills are of a heavy yellow and gray color and the soil is so like the mass of a rattler that a snake can move slowly along and hardly be perceived by a person fifty feet away.

There are literally tens of thousands of rattlers in the sage brush and chaparral along the edge of southern Arizona wastes. They grow to enormous size and it is common to read of the capture of rattlesnakes five and six feet long, with fourteen and fifteen rattles.

"Log-snake snakes are quite plentiful in the mountainous parts of Arizona. After all the talk about serpents hissing, this is the only specimen of the ophidian family which I have ever heard utter a sound.

"Many writers on reptiles in America say that thunder snakes are common in Texas, New Mexico and Arizona. They are really uncommon in the territory. They are a prairie reptile and are often encountered by prairie travelers, especially before and after thunderstorms.

"Flashes of lightning and claps of thunder, which are terrifying to bipeds and quadrupeds, seem to have a charm for these members of the ophidian family. Whenever a thunderstorm comes up these snakes come crawling out of holes, from behind rocks and rotten stumps and enjoy the fun while it lasts.

"The coach whip is remarkable for its tremendous length and surprising speed. It is cream or clay colored, very much like the hard-baked prairie over which it glides, is very long and its scales are arranged in such a manner that they closely resemble the platted leather of a whip.

"Not endowed with poison, it has tremendous power of constriction. It forms its body into coils which are capable of crushing sheep, dogs and coyotes.

"When I was in Lower California in 1890 I was told by a Mexican peon that he had a 10-year-old boy squeezed to death by a coach whip a few years before. The man said that on another occasion his wife was attacked by a coach whip which threw its coils about her quicker than she could see.

"She was too frightened to do more than scream and fall to the ground, when her daughter came running up and quickly released her by merely unwrapping the snake's tail. Strange as this may seem, it is a very easy way to release a victim in the coach whip snake's grasp, for while the reptile's constricting powers are abnormal a child may unwrap the coils by beginning at the tail."

"Do you believe that snakes have the power to charm animals?" "Yes, there is a certain power to fascinate in a snake's eyes and movements. I saw only the other day a typical illustration of the power of a snake to fascinate.

"Over in the pine woods I saw a ground squirrel fascinated by a black gopher snake. The forked tongue darted out of the snake's mouth almost as regularly and rapidly as the needle of a sewing machine rises and falls. The squirrel seemed to watch it spellbound. The snake crept slowly nearer.

"When the gopher snake was within two or three inches from the squirrel it gave a leap and threw three coils about the squirrel. Instantly the spell was gone. The fascination or charm there had been over the little animal was no doubt broken the very moment the serpent's coils were about the squirrel, for the animal gave three convulsive, terrified chirps and realized that its death moment had come.

"I believe implicitly that all snakes have a certain degree of power to fascinate their victims to death. Black snakes, gopher snakes and racers have the power to a large degree. Rattlesnakes have the most fascinating power among all the poisonous serpents in the Southwest.

"The indications of charming among poisonous snakes are deceiving sometimes. Poisonous snakes fang their prey once only. The poison does not kill at once.

"The victim flutters to a branch, it may be, or runs a short distance and stops. The snake watches it. The poison does its deadly work, and the bird falls.

"Any one who comes up, not having seen the attack, might be readily deceived into imagining that it was the glance of the snake and not the poison that caused the victim to fall."

FRUIT GROWING IN JAPAN. Sweet Oranges, Persimmons and Figs Raised in Abundance.

Japan is generally looked upon as a land of flowers rather than of fruit, but it has an abundance of both. It will never be, perhaps, a great producer of fruits for export, but the raising of fruits throughout the country is becoming more and more of an industry, although there is only the home market.

Consul General Bellows, of Yokohama, says, in a recent report, that fruit growing has not hitherto been an important industry in Japan, and that there have been very few farms on which fruit formed the staple crop, but the Japanese are now paying much attention to fruit growing. What he has to say about the fruits of Japan is of interest.

THE NEW WOMAN.

English as She's Met. It is little wonder that foreigners despair of learning to speak our language. One of the greatest difficulties is the way in which the same syllable sounds in different contexts.

"You'll get run into," responded the automobilist, as he pushed the starting lever hard over, knocked the other down and ran up his spine.

"You'll get run in, too," said the policeman, as he stepped from behind a tree and grabbed the reckless driver before he could get away.

Just then another scorcher came along, without his initials on his vehicle, so the policeman had to run in two.

No Compulsion. Landlord—Sorry, pardner, that there ain't no bath room, but you see I am figurin' on puttin' one in next year.

Tourist—I don't want to take a bath next year. Landlord—Well, of course we don't insist on your takin' one.

Definite Measurement. "Do you think the sure is growing any better?" "I'm absolutely sure of it," answered the monopolist. "Why, five years ago I made only \$100,000 a year. Today I am making that much a month."

Net On Your Life. Smith—Would you advise me to take out a policy with this new insurance company? Brown—Not on your life, old man. Smith—Why not? Brown—They give nothing but accident policies.

The Moon. In distance the moon is 240,000 miles from our earth, around which she gravitates like a satellite. Her diameter is about 2,453 miles. She has a solid surface of 14,600,000 miles and a solid continent of about 10,000 cubic miles.

Great Suggestion. Pat—Ain't that d'yo think of them volcanoes? Tim—I dunno. Let's take a d'rop of the crater.

Mrs. Emma Mitchell, 520 Louisiana street, Indianapolis, Ind., writes:

"For the past five years I have rarely been without pain, but Peruna has changed all this, and in a very short time. I think I had taken only two bottles before I began to recuperate very quickly, and seven bottles made me well. I do not have headache or backache any more, and have some interest in life."

"The coming of what is known as the 'new woman' is our country is not greeted by everyone as if she were a great blessing. But there is another new woman whom everybody is glad to see. Every day some invalid woman is exclaiming, 'I have been made a new woman by Dr. Hartman's home treatment.' It is only necessary to send name, address, symptoms, duration of sickness and treatment already received to Dr. Hartman, Columbus, Ohio, and directions for one month's treatment will be promptly forwarded.

If you do not receive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

MISSOURI NOW LEADS.

Center of Apple Production Shifts Westward from Allegany. The center of Uncle Sam's apple bin has been shifted west of the Alleghenies, and the state that leads in the growing of the national fruit is Missouri. This is the burden of a paper read by Professor W. A. Taylor, pomologist in charge of field investigation in the United States department of agriculture before the national convention of apple shippers at Rochester, N. Y.

Professor Taylor completed his paper some time ago, but just before the time of reading it he received from the census department advance sheets of statistics bearing on the apple industry of the United States, compiled from a statistics gathered by the twelfth census, the matter being brought down to June, 1900.

According to these figures the total number of bearing trees in the United States is 210,000,000, an increase of 75,000,000, or more than 40 per cent over the apple area of 1890. The commercial area of 1900 yielded 1,800 somewhat more than 175,000,000 bushels of apples.

By districts, the north Atlantic apple section has 39,500,000 trees; the south Atlantic 25,500,000; the north central, 92,000,000; the south central, 21,000,000; and the western district, including the Rocky mountain states and the Pacific slope, 13,000,000.

Out of the total number of trees in the country, the north and south central districts possess 23,205,000, or nearly three-fifths. These are divided among the leading states as follows: Missouri, 20,000,000; New York, 15,000,000; Illinois, 13,500,000; Kansas and Pennsylvania, a little less than 12,000,000 each.

Priced Land in Texas. Judging from a recent report of a sale of oil lands at Beaumont, Texas, real estate in that lively and progressive commonwealth is rising to a remarkable value. The reports speak of a parcel in the section named sold at a price of \$1,250,000 an acre. The same land could have been bought, it is said, before the strike of oil, for \$10 an acre.

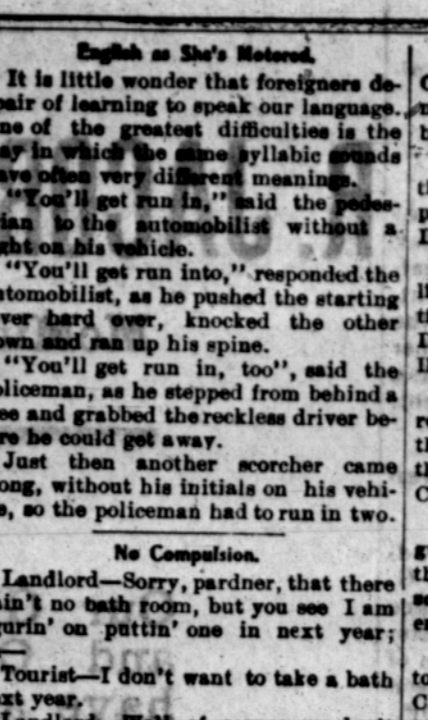

A New Attraction. A man who had been hired to write a circus announcement suddenly found himself at a loss for a fresh adjective. "See here," he said to his employer, "I don't know what to say about this panther. Have you got a thesaurus?" The manager of the circus looked at him with suspicion.

"No, sir, I have not," he said, "and I don't think I shall do anything about getting one this year. I never heard of Barnum having one, either, and he had a good show. Where are they raised anyway, I'd like to know?"

"I have used Ayer's Hair Vigor for over thirty years and will exempt my scalp free from dandruff and has prevented my hair from turning gray."—Mrs. F. A. Soule, Billings, Mont.

There is this peculiar thing about Ayer's Hair Vigor—it is a hair food, not a dye. Your hair does not suddenly turn black, look dead and lifeless. But gradually the old color comes back,—all the rich, dark color it used to have. The hair stops falling, too.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.
