

A Hair Dressing

Nearly every one likes a fine hair dressing. Something to make the hair more manageable; to keep it from being too rough, or from splitting at the ends. Something, too, that will feed the hair at the same time, a regular hair-food. Well-fed hair will be strong, and will remain where it belongs—on the head, not on the comb!

The best kind of a testimonial—

Indianapolis Banking Facilities.
There are in Indianapolis, where the National Editorial association convenes in June, seven national banks with a total capital of \$5,000,000 and total deposits of \$33,400,000. The total assets and undivided profits are \$2,725,000. In addition there are six trust companies with a total capital of \$2,475,000; the surplus and undivided profits, \$1,210,000, and total deposits, \$10,300,000. All the banks of Indianapolis are in excellent condition, earning fair dividends and entirely worthy of all confidence.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Friendship's Tribute.
"Didn't the wedding go off nicely?" exclaimed Miss Sweeten, enthusiastically. "Yes," said Miss Tartan, "except that poor dear Fan needn't have been quite so prompt in making her responses. She hadn't the slightest reason to fear that Jack would repent and back out when she had him actually at the altar."

A Farmer's Irrigation.
Under above caption in a recent issue of The Furrow, the following article appeared:
"There is at least one man in the rain belt region of the United States who has solved the drought problem, and in overcoming his drought nightmare he has somewhat unexpectedly discovered that every year brings a drought, to a greater or less extent. 'I have put in, as you see,' he said to me, 'a simple plan of irrigating some of my land from a little stream running through the place which I thought would give me crop insurance during dry years; but it has taught me that never a year goes by that there is not some period or periods of greater or less extent that a watering does not greatly increase the crop. I can observe accurately, because I have my irrigated crops growing practically alongside those which get only rainfall for their watering.'"

"This farmer's discovery of the efficiency and ease of irrigating was in a measure accidental. A little stream which showed a capacity—in July—of about six cubic feet per second, or say, 2,500 gallons a minute, which is a much smaller stream than the figures would indicate to the untrained, runs with a slight fall through a piece of rich bottom land and at one point near its lower end had been dammed by the boys to form a bathing pool. Several years ago, while in the midst of a destructive drought which was burning up the crops even on the usually moist bottom land, the farmer raised this dam by throwing in earth with the help of a plow and scoops, and crudely flooded several acres of cabbage, melons and some recently planted late corn. The result was so satisfactory and the idea of overcoming nature so fascinating, that the next year, after the spring high water season, more substantial dam was put in at the head of the field which enabled the flooding of the entire bottom, with a little rough surveying to find the levels. The yield is stated to have been enormous, and while the farmer's tendency has been to over-irrigate, he is learning more than he ever knew before about the great productive capacity of land which has enough water at the right time, and also the great response which comes from heavily manured soil when well supplied with water. His dam is a cheap affair, built entirely by labor on the farm, and largely reconstructed each year. It has no storage capacity, the irrigation depending entirely upon the regular flow."

With the loss of no time or labor and at considerably less expense could this farmer have secured the same, and even better, results by turning his water to the use of a pump. The pump would have started, both nights and Sundays, too, just the same as interest and just as safely. It requires no attention whatever, and need not be rebuilt every year as does the dam. It does more than merely to furnish water for irrigating purposes. Pure water for the house and barn is also supplied. Every enterprising farmer should investigate this—ram subject if it is only with the view of supplying water to the house to make it easier for his wife.

Nothing but the Truth.
Mr. Ashtitt—What age would you rather have lived in—Miss Thirtieth?
Miss Thirtieth—In the thirtieth year, I think.

IN THE NATIONAL HALLS OF CONGRESS

Tuesday, June 5.
Washington, June 5.—Before the senate had begun business in earnest today Senator Hale took the floor to urge the importance of all possible promptness in the disposition of the appropriation bills.
This, he said, "is absolutely necessary if we are going to adjourn before the end of this month, and do the very best we may it will be the very last days of the month before we are possibly get through."
He gave notice that immediately after the close of the routine morning business today he would move to take up the naval appropriation bill, and he suggested that this bill should be followed by other appropriation bills, even to the exclusion of conference reports. He called attention to the fact that there are six of the big appropriation bills still unacted on by the senate.

Washington, June 5.—In many particulars today was a "red letter" day in the house, not only in the number of bills passed, but in the general character of the legislation enacted. What bills are to cause endless trouble, the naturalization bill, passed under suspension of the rules, the speaker and the gentleman in charge of the bill, Bonye, of Colorado, doing team work of a superior kind.
The house refused to pass a bill leasing to a private firm or corporation the right to mine coal on the island of Batavia, in the Philippine group, although it was stated that such a lease would decrease the amount paid by the government for coal very considerably.
For two hours the house worked under suspension of the rules. The rest of the day was taken up with the passage of bills by unanimous consent.

Monday, June 4.
Washington, June 4.—Arthur Pue Gorman, United States senator from Maryland, died suddenly at his residence in this city at 9:05 o'clock this morning. While Senator Gorman had been ill for many months, he had shown some improvement lately. Heart trouble was the immediate cause of death.

Washington, June 4.—The senate adjourned today immediately upon receiving the announcement of Senator Gorman's death. No business whatever was transacted, even the reading of the journal being dispensed with. There was an unusual number of senators present, and all were impressed by the solemnity of the occasion. Appropriate resolutions were adopted and a committee to attend the funeral was appointed, as follows: Rayner, Allison, Morgan, Hale, Aldrich, Teller, Gallinger, Elkins, Martin, Tillman, Clay, Spooner, Keam, Bailey, Blackburn, Clark, of Montana, and Overman.
After the senate adjourned the desk and chair formerly occupied by Senator Gorman were draped in black, in accordance with the custom in such cases. The house also appointed a committee to attend the funeral.

The house adjourned when the announcement of the death of Mr. Gorman was made.
The house passed a bill creating a United States District court for China. The judge is to receive an appointment for 15 years at a salary of \$8,000 and expenses when on circuit. The district attorney is to receive \$4,000 and expenses and the marshal \$3,000 and expenses.

Saturday, June 2.
Washington, June 2.—The greater part of the day was spent by the senate in discussing the resolution directing the purchase of Panama canal supplies in America, unless the price was extortionate and unreasonable. Mallory's motion to strike out the word "extortionate" was lost, 39 to 19. Carmack sought to limit the government's action to a preference for goods of home manufacture, other conditions being equal. It was lost, 39 to 17. Becraft wanted no higher prices paid for American goods than the American manufacturer charged abroad for the same article. This went down, 37 to 15. Culberson wanted goods purchased in the cheapest markets; lost, 38 to 16. An amendment proposed by Pettus limiting the purchase to the lowest responsible bidder was adopted.
The bill was passed, 39 to 16.

Save Life on North Coast.
Washington, June 5.—Senator Piles offered the following amendments to the sundry civil bill: Appropriating \$30,000 for a lifesaving station at Neah bay, Washington, authorizing a life saving station at Cape Flattery, \$30,000, appropriating \$50,000 to establish three life saving stations between Cape Flattery and Grays harbor; appropriating \$30,000 for a lighthouse on Eliza island, Bellingham bay; appropriating \$255,000 for a revenue cutter for Puget sound, and \$10,000 for two steam vessels for the revenue service.

Canon Favors Wadsworth Bill.
Washington, June 4.—Speaker Cannon today expressed himself as favoring the Lorimer-Wadsworth plan to amend the Beveridge meat inspection bill so that the government will pay the expenses of the inspection. He also favors the court review provision. The speaker holds that, with the government paying for the inspection, the cattle raiser need not fear a reduction in the price he receives for his beef to packers and the consumer need not fear that he will have to pay the bill.

Puts Cost on Government.
Washington, June 4.—The Wadsworth substitute for the Beveridge beef inspection amendment to the agricultural appropriation bill, has been completed and printed for the information of the house committee on agriculture. The substitute is said to follow the lines of the Beveridge amendment with the vital exception that it places the cost of inspection upon the government. It also provides a court review. Details will not be given.

of representatives, when Murphy, of Missouri, rose to present what he designated a privileged resolution. The conference reports on the rate and the statehood bills had been made and ordered printed, when the Missouri congressman presented a resolution rescinding the action of the house sending the statehood bill to conference and providing for a vote on the senate amendments.
Payne, of New York, leader of the majority, instantly made the point that the resolution was not privileged. The speaker, with smiling face, held that the resolution was not privileged, as the papers in the case were with the senate.

Friday, June 1.
Washington, June 1.—The senate today passed the bill regulating the liability of railroad companies for injury to employees, but Daniel gave notice of a motion to reconsider which, if it prevails, will have the effect of again bringing the question before the senate for consideration.
The remaining time of the opening session was devoted to a speech by Morgan in support of the assertion of American control in the life of Pines and to a discussion of the resolution prescribing a policy for the government in the purchase of supplies for the Panama canal. Stone opposed the amendment as useless, and attacked the president as weak and wavering in policy. After a protracted executive session the senate adjourned until tomorrow.

Washington, June 1.—A blackboarded desk in the hall of the house of representatives covered with June flowers brought a shock to almost every member when the house convened today. It told, with a pathos all of its own, the story of the passing of Robert Adams, Jr., late a congressman from the Second Pennsylvania district, from the scenes of a busy, active life.

Washington, June 1.—The senate committee on privileges and elections today voted that Smoot, of Utah, was not entitled to his seat. The report of the committee will be ready for the senate next Friday.
Thursday, May 31.
Washington, May 31.—The senate today passed the Knox immunity bill and the omnibus lighthouse bill, and with practically no debate passed the military academy bill, and was only prevented from passing the employers' liability bill by a motion at 2 p. m. to go into executive session.

Washington, May 31.—The Democrats of the house resumed their filibustering tactics today, and demanded roll calls on every possible parliamentary point. Notwithstanding these tedious delays, the house passed the diplomatic and consular appropriation bill, carrying an appropriation of \$2,734,869. A number of amendments were adopted, chief among which were changing the salary of ambassador to Japan from \$17,500 to \$12,000 and fixing the salaries of the ministers to Belgium (John Barrett), The Netherlands and Luxembourg at \$10,000 per year, instead of \$12,000, as fixed by the bill when originally reported.
The legislative, executive and judicial appropriations for the post-office appropriation bill were sent to conference.

Will Need More Money.
Washington, May 30.—What members of the house committee on appropriations regard as an absolute disregard of the law authorizing the construction of the new building for the department of agriculture is revealed in the hearings before that committee on the sundry civil appropriation bill. In 1903 congress appropriated \$1,500,000 for this building. It was the general understanding that this was for the erection of a complete building for the accommodation of the entire department.

It was with some astonishment that the members learned last week that "somebody" had ordered the construction of two wings of what may be some day a completed building and that the \$1,500,000 appropriation for a complete structure. The wings, when completed, will, according to testimony given before the committee, be inadequate to house the department force, and congress will be called upon to appropriate another couple of millions to fill the space between the two wings.

Oppose Wickesham's Confirmation.
Washington, June 4.—Senators Nelson and McCumber are preparing to make a long filibuster in executive session to defeat the confirmation of Judge Wickesham, of Alaska. They are compiling pamphlets and documents bearing on the case in any manner whatsoever, and propose having them read at length to consume time. One senator said today that if this filibuster keeps up Wickesham will get every vote in the senate save those of Nelson and McCumber. Their play for time is decidedly unpopular.

Nebraska Barks at Drydock.
Seattle, June 5.—The battleship Nebraska, building at Moran Bros., tried twice this morning to get back to her dock and each time was swung away from the slip by a heavy wind and a strong ebb tide. Once she came near ramming the company's dry dock and the second time narrowly escaped crashing into the Pacific Coast company's coal bunkers. Then the attempt was given up and the boat taken out to a city buoy. The battleship was taken out Saturday for a preliminary trial spin.

No Mail for Seward Peninsula.
Seattle, June 5.—Because of the fact that the postal department made no arrangements for the forwarding of mail from Seattle to Nome this year, no mail will be forwarded to the Seward peninsula for some time. Last year the government paid 4 cents a pound on mail from Seattle to Nome and St. Michael. The steamship companies advanced the rate to 8 cents this year. The department has asked for bids for the contract, to be opened June 19.

BAD BEEF SLEW SOLDIERS.

General Miles Says Disclosures Are Not New to Him.
Kansas City, June 5.—General Nelson A. Miles, who is here on his way to Colorado to address the State university students, said tonight:

"The disclosures about beef and other packing house products now being exploited are no news to me. I knew it seven years ago. I told what I knew then. Had the matter been taken up at that time thousands of lives would have been saved. The adulteration of food products is the colossal crime of the times."
"I believe that 3,000 United States soldiers lost their lives because of adulterated, impure, poisonous meat. There is no way of estimating the number of soldiers whose health was ruined by eating impure food. I know only of its harvest among the soldiers and can only guess how many lives it has cost the republic."

"I have a barrel of testimony on the subject in the way of affidavits that I collected when I made my investigation seven years ago. The investigating committee closed the case and refused to hear the 200 witnesses whom I had ready. At that time I could have secured the testimony of 100,000 men that the canned beef sold to the army was impure, adulterated and unwholesome."

WATER DELAYS TRAFFIC.

Cloudbursts on the Columbia Play Havoc with O. R. & N. Tracks.

The Dalles, Or., June 4.—As the result of a series of heavy rains yesterday afternoon, culminating in a severe cloudburst at one point, three bad land slides have occurred on the O. R. & N. roadway in consequence of which there is another blockade of traffic, although a large force has been sent to the scene of disaster, and hopes are entertained that the tracks will be cleared today.

Two of the slides took place between Quinn and Black, and are each fully 300 feet wide, with from one to seven feet of debris deposited on the tracks. The worst slide, however, occurred at a point three miles east of Black, where a heavy cloudburst came down the canyon and carried out three bents of the railroad bridge, cutting out a ditch 35 feet in width and 18 feet deep.

A force of 250 men was sent out from Quinn and Black, to the demands of the situation along the main lines, while 60 additional men were dispatched to the Columbia Southern line at Biggs, where steady showers have prevailed all day, delaying the trains, but causing no washouts of the tracks.
So far as known there were no fatalities.

TO PROTECT NIAGARA FALLS.

House Committee Regards Jurisdiction of U. S. Unquestionable.

Washington, June 5.—Chairman Burton, of the house rivers and harbor committee, has submitted a report upon the bill to protect Niagara falls. The report says in part:

"The committee regards the jurisdiction of the United States over Niagara river as unquestionable, because it is a navigable stream in the greater part of its length." The bill authorizes:
The issuance of permits to individuals, companies or corporations allowing using water to the extent to which water is now being used.
The issuance of further permits both for the diversion of water on the side of the United States and for the transmission of electricity created by water power from the Canadian side; this, in all cases, with limits of limitation that such permits shall not impair the scenic grandeur of Niagara falls, the navigability of the river or its integrity as a boundary stream.
All permits to be granted under the bill are revocable within three years by the secretary of war and shall in any event terminate at the expiration of three years.

Reforms in Turkey.

Washington, June 5.—Some commercial reforms in Turkey are reported by Vice Consul General Smith-Lyte, of Constantinople, to the Bureau of Manufacturers. The organization of a board of English merchants "there has accomplished the opening of bonded warehouses, and is demanding more facility in customs operations, suppression of the Hedjaz stamp, free access on board, free importation of foreign securities, with the exception of lottery bonds, and suppression of the difficulties in connection with the free travel."

Queues To Be Cut Off.

Pekin, June 5.—James W. Ransall, the American consul general at Tien Tsin, gave a farewell reception yesterday to Dr. Tenney, who sails from Kobe, Japan, June 26, on the steamer Tango Maru, for Seattle, accompanied by 45 Chinese students, who will be distributed among Eastern colleges. The students whom Dr. Tenney will conduct to America belong to good Chinese families and all speak English. They will have their queues cut before leaving Shanghai and will adopt foreign dress.

Big Dividend Declared.

Mexico City, June 5.—The National bank of Mexico has declared an annual dividend of 18 per cent. The net profit realized was \$5,685,325, and \$4,579,000 was distributed as dividends, while the reserve fund was increased by \$568,325. The National bank is a private bank, but is equal agent for the government, as well as doing the usual banking business. Its annual dividend is always looked upon as an index to business conditions.

Strikers Shoot Guards.

Cleveland, O., June 5.—Fifteen guards were shot in a riot with striking miners at Steubenville this evening. Frantic telegrams have been sent to the governor by the sheriff for militia. The situation is very critical and more trouble is imminent.

THE KING OF BLOOD PURIFIERS

No other remedy has given such perfect satisfaction as a blood purifier and tonic or is so reliable in the cure of blood diseases of every character as S. S. S. It is known as "The King of Blood Purifiers," and the secret of its success and its right to this title is because "IT CURES DISEASE." It is an honest medicine, made entirely of purifying, healing roots, herbs and barks, which are acknowledged to be specifics for diseases arising from an impure or poisoned condition of the blood and possessing tonic properties that act gently and admirably in the up-building of a run-down, weakened or disordered condition of the system.

One of the greatest points in favor of S. S. S. is that it is the only blood remedy on the market which does not contain a mineral ingredient of some kind to derange or damage the system. It is the one medicine that can be taken with absolute safety by the youngest child or the oldest member of the family, and persons who have allowed their systems to get in such condition that most medicines are repulsive to the stomach will find that S. S. S., while thorough, is gentle and pleasant in its action, and has none of the nauseating effects of the different mineral mixtures and concoctions offered as blood purifiers.

As every part of the body is dependent on the blood for nourishment and strength, it is necessary that this vital fluid be kept free from germs and poisons. So long as it remains uncontaminated we are fortified against disease, and health is assured; but any impurity, humor or poison acts injuriously on the system and affects the general health. Pustular eruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased condition as a result of too much acid or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison, etc., are all deep-seated blood disorders that continue to grow worse as long as the poison remains.

But all blood diseases are not acquired; some persons are born with an hereditary taint in the blood and we see this great affliction manifested in many ways. The skin has a waxy, pallid appearance, the eyes are often weak, glands of the neck enlarged, and as the taint has been in the blood since birth the entire health is usually affected.

In all blood troubles S. S. S. has proved itself a perfect remedy and has well earned the title of "KING OF BLOOD PURIFIERS." It goes down into the circulation and removes all poisons, humors, waste or foreign matter, and makes this stream of life pure and health-sustaining. Nothing reaches inherited blood troubles like S. S. S.; it removes every particle of the taint, purifies and strengthens the weak, deteriorated blood, and supplies it with the healthful properties it needs and establishes the foundation for good health. As a tonic this great medicine has no equal, and it will be found especially bracing to weak, anemic persons. Rheumatism, Catarrh, Sores and Ulcers, Skin

S.S.S. PURELY VEGETABLE

Diseases, Scrofula, Contagious Blood Poison and all other blood troubles are cured permanently by S. S. S., and so thorough is the cleansing of the blood that no trace of the disease is left to break out in future years or to be transmitted to offspring. If you are in need of a blood purifier get "THE KING" of them all, S. S. S.—and good results are assured. Book on the blood and any medical advice desired furnished without charge to all who write.

THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask dealer or we will send post paid at 10c a package. Write for free booklet how to dye, bleach and mix colors. MONROE DRUG CO., Unionville, Missouri.

Of Course.
"Boddie, you mustn't forget to attend the official meeting this afternoon."
"What's it for?"
"We are going to double the capital stock of the company."
"To double it? Great Scott! Where is the money to come from?"
"From the public, of course. Where did you suppose?"

In Business Circles.
Biggs—Anything doing in your line of business?
Diggs—Yes. One of our bill collectors who had been working on commission starved to death last week.

Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian tube. When this tube is inflamed, it becomes swollen and its normal function is lost. It is entirely curable, and when it is entirely cured, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever. The cases of deafness are caused by Catarrh, which is nothing but an inflamed condition of the mucous lining of the Eustachian tube. We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Sold by Druggists, 75c. Hall's Family Pills are the best.

Did the Beat It Could.
The photographer was preparing to take a negative of the prize building. "Look pleasant," he said, mechanically. The intelligent animal showed its fangs still more, and the effort could scarcely be called a success.

AILING WOMEN.

Keep the Kidneys Well and the Kidneys Will Keep You Well.

Sick, suffering, languid women are learning the true cause of bad backs and how to cure them. Mrs. W. G. Davis, of Groesbeck, Texas, says: "Back-aches hurt me so I could hardly stand. Spells of dizziness and sick-headache were frequent, and the action of the kidneys was irregular. Soon after I began taking Doan's Kidney Pills I passed several gravel stones. I got well and the trouble has not returned. My back is good and strong and my general health better." 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Around the World

I have used your Fish Brand Slicers for years in the Hawaiian Islands and found them the only article that suited. I am using them in the Congo (Africa) and think a great deal of them. (Name on application.)

SWIFT'S SPECIFIC, THE GREAT BLOOD PURIFIER.
Gentlemen—S. S. S. is used as a family medicine in our home. I myself have taken and always found it what it is claimed to be. It thoroughly cleanses the system of impurities, increases the appetite, improves the digestion, and builds up the general health. I have given it to my children with fine results. It promptly restores the appetite and clears the skin of all eruptions. It is a very fine blood tonic and has my hearty endorsement.
