That awful word

NEGLECT

Do you really understand what neglect really means when referring to your eyes? The organs of vision are too delicate to be trifled with. They need immediate scientific care as soon as they show a tendency to weakness.

My profession is to remedy eye-weakness and eye-strain. I may be in a position to bring you relief—permanent relief—if you give me an opportunity. Don't imagine that I merely sell glasses. I do sell glasses, but before I prescribe them for you, I ascertain if you really need them. When in McMinnville step into my optical parlors and we will talk the matter over and see if I can help you.

Dr. H. E. Morris
