The purchase of evaporated loganberries for the Commissary Department of the U. S. Army, Navy and other government posts, is announced by the Salem Capital Journal as a probability now being considered. Manager Paulus has been working on this idea for some time with the Oregon Senators and Congressmen and has recently received the promise that the fruit will be given a fair test to find out its adaptability to government uses. Resolutions passed by the fruit growers at their annual session have been forwarded to Washington and are now under advisement by Congressmen who have presented the situation to the federal commissary officers.

Ernest Berry is the proud possessor of a new "Indian" motorcycle. It seems, according to reports, that Ernest had some trouble in getting the darned thing home. In the first place he attempted to ride it home from Portland and got as far as Oswego when something went wrong. He left it there, returning for it in a few days. The next attempt he reached Dundee where he broke a chain. The next stop was his home. He decided that the machine needed some repairs and as he had expended a good deal to get the thing home, he decided to fix it himself. This proved to be more than he anticipated, for when he had it apart he discovered there was more to it than he thought

and could not put it together again. The machine was then taken to the garage where it was put in running order. Hope you don't have any more trouble, Ernest.
