We are reliably informed that in his report to the county Commissioners, engineer J. H. Hefty sent here to examine the condition of the bridge near the dryer, recommended the building of a new bridge, and cutting down the approaches to a 6 per cent grade thereby reducing the amount of power necessary to pull a load over these hills about one-half. In other words, a team that can pull one ton over this road as it now is, could pull two tons over the new road with the same effort. This is encouraging news to our people and we are confidently looking forward to the time
