Something to Think About

By F. A. WALKER

DARWINIAN THEORY

WE ARE reading a great deal these days about the Darwinian theory. The newspapers tell us that Kentucky, famed for its blue grass, its blooded horses, beautiful women and chivalrous men, is deep in the study of its involved perplexities. All the way from school houses to the Kentucky senate, the question of man's relationship with monkey is being discussed with fervor. The world is pricking up its ears, arching its eyebrows and looking askance upon the creatures, who, according to the Scriptures, were created in God's image.

Just how will all this controversy benefit you and me? Will it make us better men and women, elevate our minds to a higher sphere and give us greater power for usefulness? Power gravitates to those who can use it, not to the wavering nor the weak. It belongs to those who have faith, who believe as a child and accept biblical statements without question.

Who among the sons of men knows himself? Who by gazing in his or her looking-glass can see himself or herself? The body which encases self is all that can be seen, yet who doubts that self, the image of God exists? Who questions the truthfulness of the Bible, the origin of man, or the omnipotence of Him who created the heaven and the earth?

Is it for the atom of dust to deny: "So God created man in His own image, in the image of God created He him; male and female created He them."

Let us not go out of our way to seek the dark places, whose mysteries must forever baffle human understanding. There is more joy in the sunshine, more happiness in useful effort, more pleasure in the acceptance of existence as it is, more delight in self-acceptation and in doing good to others, than in the painstaking avoidance of childish faith.

It is not for us to become crazed about frisky monkeys, nor for us to try to make monkeys of ourselves. But it is for us to work, to think good thoughts, to put unbelief and doubt far behind us and make ourselves more worthy of the Infinite love, the only anchor which will hold secure in this life and in the life to come.

THE ROMANCE OF WORDS

"PIN-MONEY" DURING the sixteenth and seventeenth centuries pins were so extremely expensive that only the wealthy could afford them. By a curious law, the manufacturers of pins were permitted to sell them on only two days each year—January 1 and 2—and when those days came around the women whose husbands could afford the expenditure secured "pin-money" from them for their purchases.

While savages have, for ages, used thorns and splinters for the purpose of joining bits of hide or making garments of leaves, pins—as we know them today—did not come into use until the early part of the fourteenth century. They were introduced into England in 1540 but it was not until 1824 that an American named Wright invented a machine for manufacturing pins very rapidly, and now more than 1,500 tons of iron and brass are annually converted into pins in the United States alone, a condition which renders entirely obsolete the original meaning of the phrase "pin money" which, however, still persists as a synonym for "an allowance given by a husband to a wife to cover her personal expenses."

(Copyright.)

Subtle Suggestion.

"What is your object in refusing to be interviewed?" Inquired the scribe. "I'll be perfectly frank and confidential with you," replied Senator Sorghum. "If you will give it out that I decline to be interviewed it will create an impression among my constituents that I know a whole lot, but am in such a position of delicate responsibility that I can't tell it."

THE CHEERFUL CHERUB

No big experience has come To fill my life with joy and love But I shall keep prepared because We get what we are worthy of.

ALFALFA SURPASSES FOR STOCK FEEDING

Good Qualities of Crop Enumerated in Bulletin.

In Addition to Advantages as Pasture and for Silage It is of Great Value as Soil Improver—Other Possibilities.

(Prepared by the United States Department of Agriculture.)
 "A nearly perfect forage"—that is the highest of praise heaped upon alfalfa by R. A. Oakley and H. L. Westover of the United States Department of Agriculture in a new farmers' bulletin, Utilization of Alfalfa, just issued. And when the good qualities of this crop are enumerated it is evident that some such description is warranted. As a hay it is unsurpassed for general feeding; as a pasture it has a high carrying capacity and produces large gains; as a silage crop it is valuable with proper handling; it makes excellent silage; and when ground into meal it is a good and easily handled feed. In addition to these good qualities it

Alfalfa is Praised as "A Nearly Perfect Forage."

is of great value as a soil improver. Attempts have even been made to introduce it as a human food and as a medicine, but it cannot compete with other staples as a food and it has no special medicinal properties.

Although not detailed enough to make laborious reading, each subject from haymaking on through to alfalfa meal manufacture, and a consideration of fake and fad alfalfa products, is treated so fully as to give the reader a thorough understanding of the possibilities of this great crop. Those who are inclined to be too enthusiastic over certain uses will find reason in the collected experience of many growers and feeders to modify their views, for alfalfa is not a panacea for all the troubles of the farm and feedlot. Consideration is given to the needs of dairy cattle, beef cattle, hogs, sheep, horses and poultry, and to the crop in various forms, including hay, pasture, silage, straw, soiling feed, tea and meal.

Those who are interested should write to the United States Department of Agriculture, Washington, for Farmers' Bulletin 1229 which will be sent free of charge.

HIGHWAYS ARE FLEECE LINED

Because Cotton is So Cheap, Ranchmen of California and Arizona Use it on Roads.

Fleece-lined roads for getting motorists over desert sands have recently made their appearance and have surprised a great many motor tourists traveling through certain sections of California and Arizona, says the Illustrated World. There is such a low market value upon cotton in certain sections that it scarcely pays to haul it to the railroad stations. Much that is raised, therefore, goes into the making of roads.

Ranchmen of the Salt River valley of Arizona are doing with cotton just what farmers in other sandy sections do with straw or brush. Cotton is simply thrown down upon the road ever stretches where the sand is annoying. Traffic over the road then packs the cotton down into the sand until it forms a firm, smooth and resilient surface, over which motor-vehicles may progress with almost as much ease as over a paved street in a city.

WAY TO PLANT IRISH POTATO

Crop Not Particularly Adapted to Small Gardens and Requires Well-Prepared Soil.

While Irish potatoes are not adapted to growing in the extremely small garden, most gardeners prefer to include them in their list. One peck of seed Irish potatoes will plant about 300 feet of row. It seldom pays to plant home-grown seed and it is much better to use the home-grown potatoes on the table and purchase seed that has been produced in some locality especially adapted for seed growing. Potatoes require a well-prepared, rich soil, and it pays to use commercial fertilizer, well mixed with the soil of the hills or the rows. The seed should be cut two eyes to each piece, with plenty of potato attached. One piece should be planted in each hill and covered to a depth of about 3 1/2 or 4 inches. The rows should be at least 30 inches apart and the hills 12 to 15 inches apart in the row.

THIS IS YOUR OPPORTUNITY

If you have been waiting and hoping for the day when you could get better tires for less money, now is your time.

Goodyear Tires are at their best. They are bigger, heavier, and more durable than ever. Their quality is at its highest level.

And these better Goodyear Tires today sell for less money than at any previous time in our history.

The prices listed below established a new low level for Goodyears, averaging more than 60 per cent less than the prices of Goodyear Tires in 1910.

These would be low prices for any good tires. They are almost unbelievably low for Goodyears.

You have never had such an opportunity before to buy fine and lasting tire performance at such low cost. Call on your Goodyear Service Station Dealer, and take advantage of this opportunity today.

SEX OF EGGS AND CHICKENS

Department of Agriculture Says There is No Dependable Method to Determine Sex.

(Prepared by the United States Department of Agriculture.)
 Raisers of poultry have long wished for a reliable means for determining the sex of chicks and of eggs to be used for hatching, but, in spite of the promise of various manufacturers of devices, the United States Department of Agriculture says there is no very dependable method for determining the sex of chicken that a certain egg will produce, and that it is extremely difficult to determine the sex of chicks of most breeds.

The department has made tests of a number of devices claimed by the makers to give good results in sorting out male, female and infertile eggs. In all cases they have been found to be useless for the purpose, as two persons could never get the same result with a lot of eggs, and hatching tests showed that one could do just as well by closing his eyes and picking out the eggs at random.

On account of the difference in the color of the down of the sexes it is often possible to select with considerable accuracy the hens and cockerels of the Barred Plymouth Rock as soon as they are hatched, but in the case of most other breeds and varieties this selection cannot be made with any certainty until some time later. Those

The Right Sequence.

"A topline quotation in a contemporary runs: 'Tell me my faults and mend your own.' Before starting any other mending, neighbor, suppose we first mend the motto so as to get the proper sequence. Isn't this better: 'Mend your own faults and then tell me mine.'"—Boston Transcript.

The First Laugh.

Some authorities say that the first laugh wasn't a laugh at all, but an exclamation of triumph. Prehistoric man, having emerged victorious from an encounter with his neighbor, emitted the sound "ha" to express his satisfaction and relief, and from this first "ha!" our laugh has grown.

All Privacy Goes.

If that X-ray contraption for taking pictures through walls works, the gold fish won't have much on us for privacy.—Minneapolis Tribune.

Leather Used for Fertilizer.

The greater part of the scrap leather from the New England shoe factories is shipped to the south, where it is used for fertilizer.

Make a Dollar an Hour.

Start a business of your own in your home giving scalp treatments, shampoos, facials and manicuring. Very little equipment required. We will teach you the formulas and how to do the work for \$1.00 per lesson and guarantee to qualify you for the work in 5 lessons. Send us \$1.00 today for trial lesson. Choice of facial or scalp treatment, including how to make land apply the popular French Pack used in Beauty Parlors for Blackheads and Wrinkles, and Synopsis of following lessons: Western Studio of Beauty Culture. Box 1222, Phoenix, Arizona.

Speed of Railroad Locomotives.

The modern high-grade express passenger locomotive can run at the rate of 112 miles an hour on a heavy-rail, straight track, provided it is ballasted by a train behind it, to keep it from jumping off. The heavier the engine and train, the smoother they ride. In actual practice, on account of curves and switches, the big coal consumption at high speed, and the fractional wear on the equipment, fifty miles an hour is not often exceeded by railroad trains over any considerable distance.

Red Cross BALL BLUE

is needed in every department of house-keeping. Equally good for towels, table linen, sheets and pillow cases. Grocers
