

From The Old Scrap Book

An "If" For Girls

If you can dress to make yourself attractive
Yet not make puffs and curls your chief delight;
If you can swim and row, be strong and active,
But of the gentler graces lose not sight;
If you can dance without a craze for dancing,
Play without giving play too strong a hold,
Enjoy the love of friends without romancing,
Care for the weak, the friendless, and the old;
If you can master French and Greek and Latin
And not acquire, as well, a priggish mein;
If you can feel the touch of silk and satin
Without despising calico and jean;
If you can ply a saw and use a hammer,
Can do a man's work when the need occurs,
Can sing, when asked, without excuse or stammer,
Can rise above unfriendly snubs and slurs;
If you can make good bread as well as fudges,
Can sew with skill and have an eye for dust,
If you can be a friend and hold no grudges,
A girl whom all will love because they must;
If you sometime should meet and love another
And make a home with faith and peace enshrined,
And you its soul—a loyal wife and mother—
You'll work out pretty neatly, to my mind,
The plan that's been developed through the ages
And win the best that life can have in store.
You'll be, my girl, a model for the sages,
A woman whom the world will bow before.

A Great Teacher

Advertising conducts a public school. Its pupils are all the readers of the home paper—in short, the whole buying community.

Advertising teaches that loyalty to the home merchant brings real returns in better service and better values. It's a lesson that requires the repetition afforded by the weekly arrival in the home of the Tribune.

You can teach the public to rely on your Advertisements as safe guides to economy and satisfaction in shopping. Moreover, people appreciate being asked for their patronage. To them

An Advertisement is an invitation

A Promising youngster

Silver Chimes Venadell 534942, a Jersey heifer owned and tested by C. J. Reid & Lorenzen Bros., of Dayton, Oregon, has completed all requirements for the American Jersey Cattle Club Silver Medal in the 365-day class, with calf.

Venadell was started on test at the age of 2 years and 1 month, and in the ensuing 365 days she yielded 568.06 lbs. of fat and 10,494 lbs. of milk. She carried her calf 175 days of this time and produced over 43 lbs. of fat in every complete month of the test. During the seventh and twelfth month she exceeded the 50 lb. mark for fat production.

This young producer is by Silver Chimes of S. B., the Gold and Silver Medal sire that has 41 daughters and 1 son in the Register of Merit. Up to the present 6 of his daughters have won Gold Medals and 6 have won Silver Medals. Venadell's dam is the Register of Merit cow Ventilla Dell.

A Careless Man

A man he saw a horsefly fool
Around the hind legs of a mule,
To shoo it off that man knelt down
He rose with a harp and crown.
Another man stepped on the gas
And tried a railroad train to pass
He reached the middle of the track
And now he twangs a harp—alack!

Perspective of O. A. C. Memorial Union Building for Which Funds are Being Raised Among Students, Alumni and College Friends

The accompanying cut illustrates the massive size of the proposed building to be on the O. A. C. campus to commemorate the active part Oregon heroes played in the Spanish-American and World wars. The building will tower 180 feet high and will be 200 by 200 feet. The building materials used will be such as to blend with the present campus architecture and yet be distinctive. The building will house all student and alumni activities and organizations. More than half of the total \$500,000 needed for construction is now raised.

The O. A. C. Memorial union campaign to provide \$500,000 needed to construct a building which will be a permanent memorial to the college and state heroes of the Spanish-American and World wars and to house all student and alumni activities on the O. A. C. campus, has been completed among students and is moving into different districts of the state where alumni and friends of the college are located.

More than half of the sum needed was raised on the campus in an intensive drive of a week. Inspired by the record of O. A. C. and Oregon heroes in the war, the undergraduates and faculty of the college pledged more than half of the total in three days. President W. J. Kerr, who was seriously ill at the time, sent in his pledge of \$1000 on the second day of the drive. Alumni in Portland have responded with more than \$25,000 and the campaign is now reaching into the smaller cities and communities of the state.

The great Memorial union project will seek to draw together the four component parts of the college: students, alumni, faculty and friends. It will be a great gathering place for college interests, a magnet to attract students and alumni in all walks of life and a melting pot to create a college democracy, say those in charge.

Loyalty of individual students and alumni, who mortgaged their future earning power to help pay back to their alma mater part of the training received, gave an impetus to the campaign that makes the total objective assured, according to campaign leaders. One freshman student from Cali-

fornia pledged \$1000 to the cause and many contributions of \$250 and more were received.

More than \$325,000 of the total is now subscribed and construction on the building will begin in the late summer of 1925 and will be completed by the fall term of 1926, according to present plans. Alumni are organized, not only in Oregon but in Washington, California, Hawaii, and many eastern states where former students are located.

The building will have rooms for student activities, faculty meetings, assembly halls for large gatherings, trophy rooms where athletic awards of the Varsity "O" association may be permanently kept, shop rooms for the building of campus dramatic productions and many other types of rooms. All the student publications will be housed in the new building which will be a big advancement of the old inadequate system of publication offices scattered over the entire campus.

"The Memorial union building will release much needed class room in the buildings provided by the state," said E. B. Lemon, registrar. "College life is highly organized and many of the student groups require accommodations which are needed for instructional purposes. The Memorial union building is being built without cost to the state, which is an important feature in Oregon's educational program."

Of much interest to students and faculty is the plan for the theater in the building, says the governing committee. One thousand persons will be

seated in the well-appointed theater where campus productions, lecture numbers and other forms of entertainment may be given for the campus from time to time. A pipe-organ will be installed in the theater which will add an immense rotunda where student and alumni gatherings may be arranged.

Since the announcement that a class B, 500-watt broadcasting station will be installed at O. A. C., an effort is being made to tie up the activities of the Memorial union with this feature. The college is host to many speakers of national repute and authorities on educational, scientific and economic subjects. In addition the lecture numbers bring artists of international fame to the campus. In the past few years such singers as Geraldine Farrar and Madame Schumann-Heink; Mischa Elman and Erna Rubinstein, violinists, and many others have been entertainers on the campus. The high-powered broadcasting station will make their artistry available to the entire state.

A massive entrance to the building will lead into the main lobby to be called "Memorial Hall." Finest examples of art and sculpture will decorate the hallway. Leading back from it will be the rotunda, where alumni gatherings will often be held and where from 500 to 800 persons may be served at special banquets and luncheons for which the college tea room is inadequate.

A cafeteria for students and faculty is another feature planned for the new building, which is expected to be ready for the use of the campus one year from next fall.

Obituary

Ezra C. Oliphant

Ezra C. Oliphant, son of Melvin and Alice Oliphant, of Lafayette, was born in Klester, Minnesota, October 19, 1887, and died in the New Hospital in McMinnville, Oregon, Friday, March 6, 1925, of blood poison, having reached the age of 37 years, 4 months and 16 days. In 1904 he came with his parents to Oregon where he had since made his home in the vicinity of Dayton and Lafayette. For the past ten years he was proprietor of a barber shop in Lafayette where he made a host of friends. He was an honest, upright young man, always thoughtful of others, especially of his aging parents, who have the heartfelt sympathy of all in their bereavement. Besides his parents he is survived by one daughter, Florence Helen, and four sisters, Minnie Murray of McMinnville, Elsie Phillips of Alsea, Mary Wirls and Marguerite Roseman of Dayton, also many other relatives and friends. The funeral services were held in the Evangelical church in charge of Rev. Fisher. Interment was made in the Evergreen Cemetery.

"GALLONS" NOT "POUNDS"

Experienced fruit growers who read the methods of making spray for control of apple scab in last week's issue of the Tribune knew that "gallons" instead of "pounds" was meant in giving the amounts of lime-sulfur to each 100 gallons of water. Those who did not know are so informed in a correction sent out by the farm news writer of the agricultural college. The formulas are 3½ gallons—concentrated commercial lime-sulfur solution—to 100 gallons of water for the delayed dormant spray; 2½ gallons for the pink spray; 2½ gallons for the calyx spray; and 2 gallons for the 15 day spray. For the 32-day spray when necessary use some non-caustic sulfur spray or sulfur dust. Send for spray program sent on request, for this and other diseases and pests of orchard crops.

Fertilizer should be applied early to do the crops the most benefit. Much of the fertilizer used in the Willamette valley is applied too late to go into solution the season it is applied. Fertilizers often come cheaper if the orders are bunched and sent in through the county agent or farm bureau, says the state college experiment station.

Poultrymen of western Oregon are learning the value of Mangel beets as a kale substitute as the result of the severe weather the last two winters. If beets are fed occasionally during the fall the birds learn to eat them readily in case the kale freezes. While not so good as kale, beets as succulent feed are recommended by station authorities.

University of Oregon, Eugene, March 12—(Special)—Formal request has been made to the board of regents by the University of Oregon faculty that the new \$100,000 science building, which will be ready for occupancy some time next term, will be named Condon Hall in honor of Prof. Thomas Condon, who taught at Oregon from 1876 until his death in 1907. He was one of the best known geologists of the West.

When a little group of students enrolled in the first session of the University in 1876, Prof. Condon was one of the three teachers who composed the faculty. He took over the classes in natural history and geology. For more than thirty years he was professor of geology and he became one of the traditional figures on the campus.

Professor Condon first came to the Oregon country in 1852, sailing around Cape Horn in a clipper ship from New York to San Francisco, accompanied by his young bride. He came to Oregon as a Congregational missionary and was one of the founders of the Congregational Church of Eugene. The new First Congregational Church of Eugene named a chapel in honor of Prof. and Mrs. Condon when the church was dedicated this week.

Professor Condon was the donor of a highly valuable collection of geological specimens of the Oregon country to the University. This collection was the result of years of geological research in the state and is one of the most complete exhibitions of its kind.

Grandma Hadley

Celebrates 80th Birthday

You've reached your eightieth mile-post
Down the trail o'er the mountain of life;
The path has not all been sunshine,
Sometimes there were storm clouds and strife.

This is the way, walk thou in it,
Were the signboards you tried ever to heed;

You chose well the Guide that promised
That He could supply all your need.

You've picked up some precious jewels,
What they've meant to you can't be told;

They have made your life a blessing,
Worth more than silver or gold;

Love, joy, peace, kindness, faithfulness,
You've given to both stranger and friend;

Of these, they are building your mansion,
You'll find when you reach the trail's end.

F. M. Roseman.

Thursday, March 5th, 1925 was Grandma Hadley's 80th birthday. Dayton's club of elderly ladies of 70 years and older spent the afternoon with her. Mrs. Low and Mrs. Spangle served a bountiful lunch of good things. Mrs. Gilkey acted as president calling on the members for their age with a short history, answering as follows: Mrs. Hadley, 80 years, birthplace, Lima, Putnam county, Ohio, came to Oregon in 1908; Mrs. Gilkey, 79 years, first white, girl baby born in Yamhill county, Oregon; Mrs. Litscher, 75 years, born in Switzerland and came to America, landing in New Orleans, Louisiana, in 1852, came to Oregon in 1882; Mrs. Howard, born near Scipio, Michigan, visiting here with her brother, J. B. Stowell, and likes Oregon; Mrs. Gerth, 69 years, born in Winches'or, Indiana, came to Oregon in 1882; Mrs. Andrus, 74 years, born near Viola, Oregon; Mrs. Taylor, born in Des Moines, Iowa, came west in 1920 and to Dayton, March 1, 1925; Mrs. J. E. Mullinger, 72 years, born in Philadelphia, Pennsylvania, came to Oregon in 1891; Mrs. Elizabeth Simler 78 years, born in Missouri, and came to Oregon in 1870; and Mrs. Louise Basy, born in Athens county, Ohio, celebrates her 80th birthday, today, March 12. A very pleasant time was enjoyed by all with Best Wishes for Happy Returns of March 5th for Mrs. Hadley, who was much elated over the nice presents received as tokens of remembrance.

Finds Profit in Pigs

"I am feeding 40 fatt pigs," said George Hessler of Dayton, "everyone of them a purebred Duroc Jersey, and when I turn them off to market you will see that I have made some money on them." Mr. Hessler said he had grown every pound of grain he will feed to the pigs, but he is not charging the pigs with grain at the present price. Mr. Hessler has wheat, oats and barley, and had it not been for the pigs, he says, he would have sold the entire crop just as soon as prices went up a little, because he was afraid prices would slump. He expressed the opinion that he could break even feeding his Durocs even if he had to buy grain, but he would not advise any one to buy pigs and grain and expect to make anything. But at last fall's prices, with the cost of tankage, which he considers an almost essential part of a fattening hog diet, he sees a good profit. And he expects pork to go higher rather than lower. Last year Mr. Hessler had clover pasture and he found it extremely good for growing pigs. But the clover is frozen out and he had the good fortune to have a field of vetch, oats and wheat which was mowed by the hard freeze, and this takes the place of the clover. Pasture, Mr. Hessler considers essential in the growing of pigs profitably, and he would not attempt to raise pigs without it. —Oregon Farmer.

Electric Jars Aid In

Capture of Wrongdoer

Electricity recently played a stellar role in the capture of a man in Pennsylvania who demanded \$52,000 "ransom money" from the father of a missing boy.

The would-be hold-up man, by sending a letter to his intended victim and calling him up by phone, demanded that the money be placed at night in a stone jar at an isolated spot which he designated. Postal and police authorities were notified and the jar was planted with an electrical trap. When the extortioner unsuspectingly placed his hand on the jar, electrical contacts were made which set off a flashlight and flare illuminating the scene. Officers hidden in the vicinity dashed out and captured the bewildered and dazed wrong doer.

Food Sale

In empty building between the Post Office and the Demaray Hardware, Saturday, March 14, under the auspices of the Associated Young People of Dayton. Buy your Sunday dinner there. Salads, cakes, pies, home made candy, everything good.

St. Patricks Party

The Associated Young People of Dayton will hold their March party on Friday night, March 20, in the Community Hall. Decorations, refreshments, games, stunts and songs will all be carried out in color and spirit for St. Patrick's Day. Don't miss it. There's a good time for everyone. The party begins at 7:30 p. m.

Christian Endeavor Rally

There will be a rally of Yamhill County Christian Endeavors at the Christian church in McMinnville, Friday, March 13, at 7:00 p. m. A good program is being arranged and all Christian Endeavorers are urged to come.

Busy
