None Can Copy Its Chief Value

The Chassis is Patented

The Most Important Trend in the Industry

Two of every three buyers of Essex cars come to it from those who formerly owned cars bought chiefly for their low first price.

It is striking recognition of the fact that with all its superior performance, good looks and riding comfort, Essex is also the most economical car to own.

Essex is a totally different type. It gives results no other car ever gave.

Low price, without disappointment in looks or reliability.

Economy without sacrifice of performance.

Stability and highest roadability without unnecessary weight.

The riding ease of large, costly cars. The handling ease of a bicycle. Utter simplicity in design.

The lowest maintenance cost, we believe, of any car in the world.

These qualities make it the most wanted and largest selling car of its class in the world.

Just as the Coach body and Coach name have been extensively copied, even by costliest cars, so must future mechanical design seek to approximate the results Essex gives.

But these cannot be copied. The chassis is patented. The patents which make the Super-Six the most enduring, smoothest motor and give it all advantages, also prevent any from copying its chassis.

Price considered Essex gives the utmost in transportation value. By all means learn the facts. Ask Essex owners. Take a ride. Note its smooth performance, not surpassed by any car. How simply it handles. How luxurious its riding ease. Then think of its price. And consider that two of every three buyers of Essex cars come to it from those who formerly owned cars whose only appeal is low cost.

Surely you cannot be satisfied with less than Essex offers. Its cost is but little more than cars of the lowest price.
