In going through the potato fields often outstandingly vigorous plants may be seen—large growers, that are healthy and not next to any diseased plants. Such healthy plants should be marked with a stake for separate digging. If these are good producers, they should be saved for next year's seed plot, says the extension service.

## Better Cash That Check

Do you carry around a bunch of checks for days and maybe weeks at a time before presenting them at the Bank for payment? If so, you are taking unnecessary chances.

Don't do it. If the account on which the check is made, is closed for any cause, you might have trouble in collecting. Even if you are living on a farm or are away from home, endorse the check, make it payable to us or order, and then MAIL it to our Bank and ask us to place it to your credit. Then you are on the safe side. No trouble at all to bank by mail.
