Margaret Sanford accompanied by her brother Calir Simler of Toledo spent Sunday here with their parents' Chas. Simler and wife.

See S. C. Purkey for prices on poultry and dairy food. Phone Red 79.

Groundless Fear
Some persons dread to take an anesthetic because they fear they will talk in their sleep. This is largely a myth, says Dr. Floyd Troutman Romberger, an anesthetist, who is a contributor to Hygeia, health magazine published by the American Medical association.

Under modern methods of inducing anesthetic sleep, consciousness is lost so rapidly that the patient does not have time to say anything. When he is coming to, he usually is so drowsy that he does not care to talk.

For Trade
Portland income property 6 room modern house to exchange for small acreage between Dayton and Portland. Mrs. Julia May, 1421, 10 and Polk Oregon City, Oregon.

Get new reduced prices on the all steel Overland and Willys-Knight. C. S. Lewis, Dealers Agt.

L. A. Barnard of Chicago who has been visiting his brother W. O. Barnard and wife the past week returned to his home the first of the week. They motored up the Columbia Highway Sunday.

Frank Gallagher and wife of Portland made a short visit here Monday with their uncle Frank Berry while enroute to McMinnville to visit an uncle living there.

Miss Hazel Parker who has been confined in a McMinnville hospital with a severely fractured leg was brought home Sunday. She stood the trip well and is resting comfortably.

Removing Temptation
A friend tells me that he attended church the other night where the pastor delivered an interesting lecture which was illustrated by stereopticon slides in the darkened auditorium. At a certain point in the lecture the collectors received the offering, the room still remaining quite dark. The narrator says when the collection plate reached him—after having been handed along by fifty or sixty persons—it had only about 19 cents in it, and he held back the silver dollar which he had expected to give and fished out a nickel for the plate. He said: "If forty or fifty folks, after listening to that splendid lecture, couldn't contribute more than 15 or 20 cents, my silver dollar might tempt some one to steal it from the plate, so I chipped in a nickel and played safe."—Polf Daniels in Howard Courant.

Butterfly Migration Puzzles Scientists
Year after year millions of butterflies leave their breeding grounds in the South and fly northward. Those that travel the greatest distance cover about 4,000 miles.

They are found on the southern shores of the Mediterranean about April and reach England towards the end of May. Many still continue to fly northward, arriving in Scotland about mid-June, and eventually reaching Iceland in July. According to M. C. B. Williams, chief entomologist to the Egyptian ministry of agriculture, they originate from south of the great desert belt that crosses Africa and western Asia.

These butterflies have never been seen making the return journey, and it is a mystery how every year swarms leave Africa and find their way to the same countries in the North. It has been suggested that some go back, but since they have never been seen they must either travel by night or return in ones and twos. Mr. Williams' theory is that the migration of the butterfly resembles a kind of relay race, and that those that ultimately reach Iceland are many generations younger than those that first set out from Africa.—Tit-Bits.

Salt Old Symbol of "Wisdom and Grace"
Superstitions regarding salt were extremely numerous among the ancients, and the symbolism of salt is apparently one of the oldest among the early oriental nations. Salt is a symbol of "wisdom and grace," and of "perpetuity and incorruption." The oriental customs were to ratify compact by salt. It was their emblem of friendship and fidelity. With it they made pledges of hospitality which were never to be violated. Salt was commended to the Jews to be used in sacrifices, and now some superstitious people carry first into a new home salt, a broom and a Bible. The salt is for purity, the broom for cleanliness and the Bible for holiness. Salt has been indispensable to man as a seasoner and preserver of food from the earliest times. It has also been used for glazing pottery, for hardening soaps and for increasing the clearness of glass for many years. Soda, chlorine and other chemical substances are obtained from salt.—Pathfinder Magazine.

Those Wonderful Atoms
People often talk glibly about atoms without for a moment realizing what an atom really is. Its diameter is too small to be seen under an ordinary microscope. Atoms have been closely studied for over a century, and only within the last decade has it been possible to measure them. An atom is indivisible and is found to be very much like celestial solar systems in that it contains a central sun which is called the nucleus around which revolve from one to ninety-two planets called negative electrons. These move in orbits after the style of the planets. Small as the atom is its nucleus, which is charged with positive electricity, is so much smaller that there is enough space in an atom for 8,000,000,000 or more nuclei.—Family Herald.

Mrs. M. G. Miller and Mrs. R. L. Harris went to Portland, Saturday and attended the opening of the Bedell Department Store. They visited relatives there over Sunday. M. G. Miller and his mother drove to Portland, Sunday afternoon and Mrs. Miller returned home with him.

Dr. W. H. Burnard has located here and will take up the practice of medicine. He came west recently from Utah where he was stationed at a hospital in a coal mine town. For the present he will have rooms at the B. Tucker home and office rooms over the Shippy & Filer Store. He called at this office Tuesday and inserted a professional card and also put his name on the paid subscription list. We wish him success in our little city and trust the citizens will remember him when in need of a physician.

Too Many Words Are Given New Meanings
One wonders where language will bring up one of these days. Every new dictionary is thicker than the last. Is it that there are too many new words, or is it that people are using words in so many various ways that note has to be taken of all of them?

There are a few newspapers that are still sticklers for the use of words. One of them, for instance, will not permit any of its writers to use the word "secure" for "obtain." The newspaper is right and yet it seems to be dipping back the sea with a teaspoon as against the flood of use. More people, more newspapers appear to be using "secure" where they mean "obtain" than otherwise. The lexicon makers have surrendered to use and they have listed "secure" as meaning "obtain." So it goes, many more words are being used in their figurative sense until the usage becomes matter of fact.

So one may ask, where is our language tendency finally to bring up? The final effect may be that we shall cultivate the use of so many words and cultivate some of them so far from their original meaning that obscurity rather than clarity will result.—Lansing State Journal.

"Rocking Stones" Are Credited to Glaciers
How did the Bowder stone in Borrowdale get to its present position? How did the many "perched bowlders" and "rocking stones" hundreds of tons in weight, yet poised so lightly that a human hand can move them, get into these peculiar positions?

They were gently deposited by melting ice, as gently as ever mother laid her baby to rest in its cradle. For ice is the king of dumpers, and the former presence of glaciers accounts for all the erratic bowlders in the world, says London Answers.

Some of these curious rocks are of tremendous size. The biggest in England is the Bowder stone, but there is one in Switzerland, far away from any present-day glacier, which weighs 3,000 tons and contains 45,000 cubic feet of rock.

And visitors to the Alps can see the same processes at work today, as huge rocks, which no traction engine could haul, are borne along very slowly but nevertheless very surely on the surface of the glaciers.

The Acid Test

Our Bank has the confidence of the people of this community because by fair dealing we have proved our worth. That is the ACID TEST in all business, and especially so in banking.

It has been truly said: "Clean business demands clean men. Good business demands men who have shown some signs that they can handle their own affairs to advantage. Successful business demands success on the part of those who are to conduct it." We invite you to make our bank your bank.

Graceful Kid Shoes in Sedate Colors

Simple styles and sedate colors are the choice of fashionable women for their footwear. Black, white, tan, champagne and many brown shades are liked, because any of them harmonize with the season's accepted colors and all the colors combine well with black. To assure perfect fit kid is preferred to other leathers.

Gingham Frocks Arrive, Telling Many Tales

Here's a little, story-telling, checked gingham frock, with knickers to match, that will please everybody. It is much like the little frocks of last year except that it is an illustrated edition. Sketches in colored floss, of things that children love, adorn it and show that it is up to date in style.
