Time of Life
 A long life may not be good enough, but a good life is long enough.—Benjamin Franklin.

THE TRUTH SIMPLY TOLD
 Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of satisfactory use. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions. If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidneys lag, and diuretic medication would be more often employed. Burning, scanty or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

Use Doan's Pills. It is better to rely on a medicine that has won world-wide acclaim than on something less favorably known. Ask your neighbor!

12th Operation Restores Sight After 29 Years

BURLINGTON, VT.—Blind since she was three months old, Miss Eliza Barnard, 29 years old, was able to see today—and the "new world" she found was just as beautiful as she had imagined.

Sight was restored in one eye by the twelfth operation she underwent in 14 years to remove a growth.

"Some things," she said, "have surprised me; for example, the color blue. I had a mental picture of it as something lovely and good looking. It was very different from what I imagined it, although I was not disappointed."

Sacrifice Limbs For Few Dollars

Insurance Companies Hit Hard by Claim Racket.

ST. LOUIS.—What price an arm? Or a leg? Or weeks of pain? Postal inspectors who break up fake accident rings by bringing the operators to trial for using the mails to defraud insurance companies of hundreds of thousands of dollars annually say the deliberate sacrifice of a limb almost never pays the ring members more than \$1,000.

According to William L. Noah, chief inspector in charge of the St. Louis office, by far the greater number of faked accidents results in small claims of a few hundred dollars being paid.

He recalled the notorious "serum case." In 1925, a widespread ring of fake accident victims was uncovered in northern Arkansas and southern Missouri. The ringleaders had discovered that heavy injections of turpentine with a hypodermic needle would result in swift and lasting breakdown of the surrounding tissues.

The resultant blotch on the flesh had all the appearance and characteristics of a deep-seated bruise. Infection and sloughing often followed. For years the ring succeeded in collecting small claim after claim.

Inspector A. F. Burt said that fake accident victims who are able successfully to simulate paralysis following supposed injuries were nonexistent. Reflex action and response to the stimuli of pin pricks or electrical shocks are impossible to fake, he pointed out.

However, Burt said, many persons have been able to collect liability or accident insurance claims by simulating injuries to the back and muscles.
