That's the Stuff

It is wise not to stuff your turkey until time to roast it. Home economists advise against stuffing a turkey and refrigerating or freezing it at home for later use. To shorten cooking time, roast your turkey unstuffed and bake the stuffing separately.

Completes Tests

Marine Corps Pfc. Dale R. Denn, Port Orford, completed a week of testing and screening Nov. 21 at the Naval Air Technical Training Center, Memphis, Tenn. The tests and interviews determine the Marine's eligibility for technical training in preparation for duties in the Marine Corps aviation branch. Denn, a graduate of Pacific High School, enlisted in the Marine Corps in June. He is the son of Mr. and Mrs. Harley F. Denn, Port Orford.

Aliens Must Report Address

District Director Alfred J. Urbano of the Immigration and Naturalization Service stated that the annual alien address report program usually causes a sharp rise in the number of applications for naturalization. The law requires all aliens in the United States, with few exceptions, to report their addresses each January. Throughout the United States, almost thirty percent more applications for naturalization are received during the months of January, February and March than are received during other months. Mr. Urbano attributes this sudden rise to the Alien Address Report Program.

Aliens not required to make this report are diplomats, those accredited to certain international organizations and those who have entered temporarily as agricultural laborers. Forms for making the reports will be available to aliens at all Post Offices and offices of the Immigration and Naturalization Service during the month of January. Mr. Urbano indicated that aliens desiring information concerning naturalization or similar matters should obtain the forms at an office of the Immigration and Naturalization Service where personnel trained in these fields will be available to answer inquiries.

Hook it in

The hook ball and the curve ball are essentially delivered in the same manner: The ball is lifted over the foul line while the hand twists from right to left.

Whether you throw a hook or curve depends a great deal upon the alley. Some days you may find that your hook has turned into a curve. You must compensate for this situation. The hook heads at a near straight path down the alley until it approaches the pins. Then it cuts sharply to the left. It delivers a great deal of pin action when it hits the pocket.
