SOC PANEL VISITS PACIFIC

Five students from Southern Oregon College, which is located in Ashland, visited Pacific Thursday afternoon. The group, consisting of two freshmen, two sophomores, and one junior, thought that the seniors might consider what someone near to their own age told them about college. They explained many things about college life, what dormitory life is like, what is to be expected of professors, what college will cost, and how very important self-discipline is.

After allowing time for questioning, the panel divided the seniors in to groups, which were determined by the subject fields in which they were interested. The panel told the students what would be required of them if they were to take these various courses.

Before they left, the panel asked if they might talk with the freshmen. In a discussion which lasted 10 minutes, the panel told the frosh what courses they should take while they attended high school.
