

### Dog Class Meet Held

The Port Orford Dog Obedience Club had its first meeting on Saturday, Oct. 16, at the Battle Rock gym.

People and dogs present were: Adrian van Aswegen with his Collie, Lutz; Bev Crose without her Irish Retriever, Rusty; 4-H members Darren Hassett with his dog Charlie; Rocky Collins and Dany Shepherd each with their St. Bernards, and Alida Bender, trainer-4-H leader, with her dogs Ginger and Spice.

The dog handlers were shown how to properly fit their dogs with a training collar, along with right and wrong ways to use it and the other training equipment. They were given tips on how to teach a dog to "come" reliably when called, as well as instruction in teaching a dog to "sit" and "stand."

The group will continue to meet at Battle Rock gym at 9:30 a.m. Saturdays for the obedience classes and the 4-H members will have additional meetings for other activities.

Mrs. Bender is making arrangements for the 4-H members to go on field trips to tour boarding and breeding kennels, dog shows, grooming parlors and the animal shelter. In addition, arrangements are being made to have professional trainers, handlers, judges and a vet to give talks and demonstrations.

Later in the year it may be possible to have small exhibition-dog show.

If you missed the first class and are interested in signing up, call Mrs. Bender at 332-4763 or come next Saturday.

Classes are \$20 for 8 weeks and are free to 4-H members.

### Meet Tonite On Emergency

Everyone is faced with a health emergency at some time during their life. Here's an opportunity to learn how to avoid health emergencies and what to do in case of such emergency, says Dora Rumsey, Curry county extension agent.

A meeting conducted by Norm Eburne, Extension Health Specialist, will include information on treating bee stings, poisons, wounds, burns and bone injuries. In addition, Dr. Eburne will also demonstrate artificial resuscitation and pulmonary resuscitation. This information would be particularly helpful to young mothers, says Mrs. Rumsey. Children are often faced with health emergencies, including burns and abrasions, or muscle injuries.

If you are interested in learning how to avoid a health emergency, attend the two-hour session on Thursday, Oct. 21, at the Harbor Community Room, at 10 a.m., or the evening session in Port Orford at the elementary school, 7:30 p.m., on Oct. 21.

For more information on the program on How to Avoid a Health Emergency, contact the Curry County Extension Office, 247-7011, extension 226; Brookings to Gold Beach call 469-4600; Port Orford to Gold Beach phone 332-6171. These are toll free numbers.

**NEW GRANDPARENTS**  
Mr. and Mrs. Lester Dahrens, Port Orford, are paternal grandparents of a daughter, Monica Marie, born to their son, Mr. and Mrs. Donald Dahrens of Salem. The new granddaughter was born Oct. 18 and weighed six pounds. Maternal grandparents are Mr. and Mrs. McKinstry of Tacoma, Wash.

**VOTE SHIRLIE RICHARDS FOR MAYOR**

Paid for by Shirlie Richards Port Orford

### Local Bank Deposits Up

First National Bank of Oregon reported an increase in earnings for both the third quarter and nine months ending September 30, compared to a year ago. Both deposits and loans were up compared to third quarter 1975, according to Robert F. Wallace, chairman.

The bank's total deposits were \$2,446,337,000 on Sept. 30, compared to \$2,208,785,000 recorded at the end of third quarter 1975. First National's loans generated by 145 branch offices were \$1,456,557,000, up from the \$1,358,122,000 reported on the same date in 1975.

Total loans and deposits for the third quarter of this year included \$20,512,000 in foreign loans and \$17,400,000 in foreign deposits in First National's Cayman Island branch. The funds in the office are being used on a selected basis as an offshore depository and financing branch for the bank's business customers.

Total resources were \$3,113,052,000, up from \$2,758,683,000.

Income before securities transactions for the third quarter amounted to \$5,797,000, or \$1.09 per share in 1976, compared to \$5,076,000, or 96 cents in 1975. This amounts to a 1.5 percent increase.

Income before securities transactions for nine months amounted to \$15,482,000 or \$2.91 per share, up 2.4 percent from \$15,123,000 or \$2.85 per share in 1975. Net income after securities transactions was \$15,413,000 compared to \$15,140,000 last year. This amounted to \$2.90 per share compared to \$2.85 per share last year.

The Port Orford branch reported deposits of \$5,494,000 and loans of \$548,000 as of September 30. Comparable totals for the branch a year ago were \$5,102,000 in deposits and \$608,000 in loans.

### Pear Slug Control Information Given

The pear slug, a tiny greenish-brown, slimy, slug-like larva is causing considerable problems on pear, cherry and plum trees this year, noted Walt Schroeder, Curry county extension agent.

The little slug-like creature is very difficult to find. Evidence of his work is the skeletonizing of leaves. The slug eats the more tender parts of the foliage, leaving a lace-like arrangement of tiny veins.

The slug can be controlled by using malathion 25 percent wettable powder at the rate of two tablespoons per gallon of water, or diazinon 50 percent wettable powder at the rate of one tablespoon per gallon of water. The slug may also be controlled by just using common ground dust thrown over the tree so that it contacts the slug. The dry, powdery soil is said to dry the slug out so that he dies.

Generally, the trees that are bothered by the slug are already weakened from some other cause. This might be lack of fertility, lack of water, or other stress causing factors.

### Mineral Study Report Tonite

John Beaulieu of the Department of Geology and Mineral Industries will report on the mineral and aggregate study completed in Curry county and public hearings will be held for six zone changes and one conditional use application, when the Curry County Planning Commission meets at 8 p.m. tonight, Thursday, October 21, in the circuit courtroom of the courthouse at Gold Beach.

Other business will include tabulation of response from CCI questionnaires and planning details for a tour of the Harbor-Winchuck planning Unit.

### County Makes Appointments

Eugena L. McBeth was hired as full time Clerk Typist I on the recommendation of the Curry County District Attorney effective October 1, 1976 at Range 3, Step 6, at a monthly salary of \$585.00.

On the recommendation of Victor G. Wood, Administrator of Curry County Health Department, LaReine Eckholm was granted a merit raise in salary to R.N. II, Salary Range 16, Step 2 at \$907.00 per month, effective October 1, 1976. Motion carried.

On the recommendation of Curtis D. Brown, Planning Director, Rosalie M. Gaither was granted a merit raise in salary to Clerk Typist III, Salary Range 7, Step 3, at a monthly salary of \$614.00, effective October 1, 1976.

Everett M. King, Sr., has been appointed to serve a six year term on the Curry County Hospital Board to fill the vacancy which occurred when Allen Finch resigned.

Bob Dose was appointed to serve as a member of the Planning Commission to fill the unexpired term of Cy Zeigler which expires April 1, 1977.

### FROM THE RSVP CENTER What's What In RSVP

by Helen Taylor

Here we go again! Off to Reno! If you've talked to anyone who went before, of 38 if you were one of them that went, you know what a good time everyone had. Don't miss the bus this time. The dates for the trip are between November 29 and December 2, 1976. You will go by Greyhound bus BUT—there will only be one bus available. The tour will stay at the Pioneer Inn in Reno. More details will be available in our next few columns, so watch and plan.

The RSVP Battle Rock Retirement Club luncheon on Sept. 29 at the Rainbow Cafe was well attended. Walt Schroeder, Curry county extension agent, introduced Don DeLorenzo of the State Extension office. He showed slides on predatory animals and answered questions about programs being used to control them.

### Beetles, Moths, Effective In Tansy Control

Oregon Department of Agriculture scientists attempting to establish effective biological control of the poisonous weed tansy ragwort in Oregon are encouraged by the apparent destruction of the weeds by two imported insects.

The orange and black caterpillars of the cinnabar moth, noted for their voracious appetite for tansy ragwort leaves and flowers, have been tested in Western Oregon for a number of years and have proved to be an effective agent for the reduction of tansy ragwort. The second insect, relatively new to Oregon, is the tiny, tansy ragwort flea beetle. The adult beetles feed on leaves, but the greatest damage is done by larval feeding on the plants' root systems.

Dennis Isaacson, entomologist with the department's weed control program, said U.S. Department of Agriculture test sites near Ft. Bragg in California have shown that the effectiveness of using the two insects together is beyond earlier expectations.

The flea beetles were imported from Northern Italy in 1970 and released for testing at Ft. Bragg. Colonies of the beetles in California became the source of colonies subsequently released in Oregon by Isaacson and his coworkers. So far, Isaacson said, successful releases have been made in Marion, Clackamas, Lincoln, Benton, Polk, Lane, Tillamook and Curry counties.

"We are now collecting more beetles at Ft. Bragg. The first shipment has arrived and is being screened and counted at our temporary holding facility at Oregon State University," Isaacson said.

### divots

by Duane Bergstrom

There will be a Men's Club meeting today, Thursday, Oct. 21, 7 p.m. in the clubhouse. This is the last one until March.

There have been complaints about various problems that come up during the year which develop into rumors and make a lot of little nothings lead to big problems. If you will bring your questions to the men's club meeting or board meeting, I'm sure your little complaints can be answered to your satisfaction without it being blown clear out of proportion. Everyone should know your golf club needs positive action not negative rumors.

Fix your ball pits on the greens as the greens are softening up and also, blow off your shoes to extend the life of your rug.

Until further notice in March, the clubhouse is scheduled to close on Mondays.

The President's Cup is winding to a close as Larry Hoover now plays Vern Kolen, who sidelined Al Bice 4 & 3 in the upper bracket. The lower bracket winner Ralph "Tiller" Munson, who disposed of last year's Pres. Cup champion Don Ament, with a brilliant 3 & 2 victory in 27 holes.

Bob Strain will play Gordon Neal for the consolation championship.

### Parents: Don't Let Your Children Burn

He said the control has been so effective in California that not only is tansy ragwort disappearing, but so are the beetles.

"This will probably be the last year that we can collect enough beetles at Ft. Bragg to make the trip worthwhile," Isaacson said.

He said Oregon colonies are likely to become the major

source of flea beetles for all subsequent Oregon releases.

Isaacson said the biological control of tansy ragwort is a relatively slow method of ragwort control, but a desirable method because it can be used effectively in areas where the application of chemical herbicides is impractical or undesirable.

### Parents: Don't Let Your Children Burn

(Part II) by James McAlister Extension Safety Specialist Oregon State University

This is the second of a five-part series designed to help parents teach their children and themselves how to survive a house fire.

A child who has had the opportunity to practice what to do in a fire has a much better chance of surviving a real fire.

Following are two of the six drills offered in this series. All are designed to teach children how to survive a fire.

After the first try, these "fire drills" can be tested during the day or after children are in bed at night by using the signal "Fire!" In the fifth part of this series, a final "rookie" examination will be presented to determine whether your children qualify as "firemen."

A drill called "On with the gas masks" teaches children about poisonous gases which are the true killers in fires.

Pretend the house is filling with smoke. You must get out as quickly as possible. In all the drills, stress immediate escape. Yell "SMOKE" and have the children, wherever they are—in bedrooms, living room, kitchen—grab a pillow, or several thicknesses of fluffy material such as a towel, and

place it over their mouths and noses.

The cloth won't filter out poisonous bases in smoke, but will alleviate some of the irritating effects of inhaling smoke. Have the children move as fast as they can, keeping close to the floor where the air is best. They should avoid deep breaths.

Emphasize the fact that smoke, not flames, is the number one killer in fire. It contains large quantities of carbon monoxide and a dozen or so other poisonous gases from burning materials. By far the majority of fire victims are asphyxiated by smoke gases long before flames ever touch them. Sometimes poisonous smoke can knock you unconscious after two or three breaths and can kill you in a few minutes.

Smoke always rises, making upper floor bedrooms the greatest fire traps. Be sure children know that wherever there is smoke—there is potential death, so get to fresh air fast.

The next drill is called "Hot door—Cold door." As part of "Basic Training" firemen learn the dangers of opening a door in a fire. It's something your child must know too. Teach him never to fling open a bedroom door if he suspects fire.

He should apply this test: Put his hand on the door panel and knob. If either is warm, he should not open the door, for heat and gases are on the other side, all ready to burst in. One lungful of superheated air can feel a person instantly. He must leave the door closed and make his escape another way.

If the door doesn't feel warm, he should brace himself against it, open it a crack and be ready to slam it should smoke or heat rush in. If all is clear, he can proceed through the doorway with caution.

Make sure young firemen practice this routine until they have it down pat. As a fire drill is being announced, slip a sign under the closed door reading "hot" or "cold" while youngsters react appropriately. Also, make it a nightly ritual to close bedroom doors unless this would pre-

vent a bedroom fire from setting a fire detector located in a hallway. Tests have shown that behind a closed door your survival time is from 5 to 11 minutes. With the door open the survival time is only 2 minutes. Ideally, each bedroom should contain an audible fire detector.

### VOTER'S REGISTRATION

From the office of the County Clerk

Anyone wishing to register after October 27 for the General Election must come to the County Clerk's office in Gold Beach to get a Certificate of Registration if he wishes to vote in the November 2 election.

From now through the 27th, post card registrations will still be processed and the voter's name will be in the poll book. Commencing with the 28th, you must come in to the courthouse to register and receive the Certificate which you will take to the polling place and give to the election board.

Remember that on the post card registrations we must have a definite location for the residence address. Inside a city, the street and house number . . . in the rural area something like "on the north side of Smith Lane, 2 miles from Highway 101," or "1 mile south of Brookings on west side highway" . . . anything to give us a definite geographical location.

## Walt Thompson Means Business . . .

I OPPOSE A COUNTY ANNEX IN BROOKINGS  
As suggested by my opponent

The only way to reduce the cost of government is to Reduce—not Increase—government.

It would further alienate other sections of the county when the real need is to unify the county.

I believe a second toll free line to Gold Beach courthouse as a better alternate.

I would also suggest a regular weekly meeting time where commissioners would be available for contact in their respective districts.
