CHERRYVILLE

No time like the rose time.

Oregon is now glorious with its wealth of roses.

Everything now indicates a good crop of hay and a great crop of potatoes.

A wealthy resident of Pennsylvania was here last week and says the Penn. Central R. R. uses vast quantities of creosote which heretofore they have imported from Germany but now they are obliged to get it in this country. Here is an opportunity to develop a new industry in this state.

Mr. and Mrs. Sneed of Portland were out over Sunday at their railroad claim south of town.

Several of the railroad land squatters received letters last week from A. W. Lafferty of Portland, a former member of Congress, stating that his efforts for the squatters before the supreme court at Washington had exhausted all of his funds and that he was now absolutely hungry and wants them to send him any amount as he was in need. Lafferty is in bad with the big money bugs and they are bound to run him out of town. If he had been obedient when in Congress he might now be rolling in wealth.

A proposition advanced by a man at Albany and delivered before the commercial club of that city lately advances the idea that the so-called railroad land be classified, if it reverts to the Government, and the good timber land sold to the highest bidder and the money used or loaned on long time and at a low rate of interest to actual settlers on the agricultural land. This kind of a proposition fairly makes the Oregonian froth at the mouth because this kind of beneficent legislation for a class of people who ought to be helped would hurt the banking business and besides legislation is only for the bankers and manufacturers.

All kinds of bids have been sent in for carrying the mail from Sandy to Marmot and to Rowe and intermediate points. When Jackson turned his contract over and it became necessary to re-let the route and put up new bids, at once a perfect stampede began. This office as well as others have been besieged for blanks and the supply was soon exhausted. May the best man win.
