"For Sandy Always."

Albany--C. M. Miller will erect a large produce warehouse on First street.

Silverton--Anderson and Larsen will put concrete on First street.

Independence--Fifty men to go to work extending Valley & Siletz railroad.

Pendleton--six streets have been ordered improved with standard bitulithic.

Marshfield--Johnson and Larson will erect a \$20,000 concrete block at Bandon.

North Plains--Marth Construction Co. will erect a new school house here.

A new fool law requires that hides of cattle slaughtered by farmers for domestic use must be kept thirty days before being sold.

Gladstone--Election carried for \$12,500 bond issue for a union high school.

Mt. Angel taking bids on an extensive sewer system.

Odell is going after a fruit evaporating plant.

Portland Port Commission will expend \$22,500 on a new dredge.

Redmond Spokesman--It would not be surprising to hear that the Industrial Accident commission had included in "hazardous" occupations such things as sawing wood with a buck saw, or splitting wood with an axe, churning with a hand churn, spading in the garden, play-

ing ball, tennis, hop scotch, rummy, bridge, whist, penocle, seven-up, marbles, or any other old thing that will bring in a few pennies to the commission in order to swell the fund to make offices for political favorites.

Albany--Work begun on the Wallace building to cost \$20,000.

O. R. & N. considering a short line from Ontario to Bend.

East Marshfield gets mile of street improved and may order water system.

Eugene lays plans for \$6000 potato starch factory.

Pacific Iron Works, build Lebanon steel bridge for \$13,383.

Coryallis--Retrenchment and tax reduction program is adopted by citizens.

Pilot Rock--Work started on O. W. R. & N. Company terminals to cost \$250,000.

Newport--Franchise of Newport Railroad and Navigation Company is to extend one year.

Salem--Employ baking powder factory doubles capacity of plant.

Bakey--Improvements to be made on Ben Harrison mine will total \$100,000.

Filling newspapers with items about rabies does not help to bring people to the state that has never had such a thing.

The O. & C land decision means that these lands valued at more than \$30,000,000 will not be withdrawn from taxation in the state of Oregon and thrown into the forest reserves, which would have been the result had the federal government been successful in its suit. Eugene Guard.

Beaverton votes \$23,500 bonds for high school.

Silverton--Silver Falls Timber Company extending logging railroad.

First National bank building Portland is to use Oregon made steel.

Oregon saddle industry promoted by the war.

Cigar boxes made from alder and balm wood is a promising industry.

Portland--July 12, bids will be opened on \$250,000 jetty improvement at Siuslaw.

Job Printing. News Office.

## BLUFF ROAD

## INCUBATOR'S VALUE IN POULTRY RAISING

The incubator has made a place for itself in the country world and has taken upon itself the duties that used to belong to the hen, as far as hatching is concerned, says the Kansas Farmer. Instead of wasting her valuable time in hatching the hen can go on her way laying eggs. That part of her duty nothing can take from her. The large poultry plants discarded the hen as a hatcher long ago, and the fancy poultryman has followed their example. He can hatch his chickens at any time he pleases. If he wants his birds early he must hatch them in January or February, and there are very few hens that want to sit during these cold months. The modern incubator, whether large or small, fills the bill and does the work of hatching in a much more satisfactory way than the hen. The hen works in nature's way, and when given a chance to make good in her own sweet way she will come out all right, but you sometimes want things outside of nature's way. For instance, it is nature's way for a hen to commence to sit in the spring and summer, and if you wait on the sitting hen your young fries and broilers will

There are two varieties of Rhode Island Reds--single comb and rose comb. Both varieties have the same standard requirements and are not unlike the Plymouth Rocks in conformation, though they are different in shape of back and shape and carriage of tail. Their rich red color makes them an attractive bird, and they are excellent both as market fowls and egg producers. In size they are smaller than Plymouth Rocks. The picture shows a Rhode Island Red cock.

be very late in coming. You cannot get them in late winter or very early spring as you can with an incubator.

The hen sometimes thinks she wants to sit, and then, again, she takes another think. She may stay on the nest for a week and then strike for more wages or another place to work in. After she is given a lot of fine eggs she will make all sorts of fuss and give up the notion of sitting entirely.

The incubator, on the other hand, is trustworthy. You can start it as soon as you have the eggs, and if you attend to your business there is no reason why you should not have a successful hatch. Don't get the idea into your head that some time everybody will be back again hatching with the hen. The incubator has come to stay and is already an indispensable part of every modern poultry plant.

### Grain For Poultry.

As the cold strengthens the question of grain food for the indoor flock is pushed to the front. Wheat is almost a balanced ration. But it costs more in the south and east than some other kinds of grain. It can't be beaten as a grain food for poultry. Better, however, to have a variety than to feed too much wheat. Overfeeding with wheat sometimes results in a clogging of the digestive organs. Care should be exercised, too, or grain will be wasted by throwing out more than the flock requires. Examine the litter frequently to discover whether there is a leakage there.

### Remedy For Scaly Leg.

Here is a simple and sure remedy for scaly legs in fowls. As a rule one application is sufficient: Take a small deep cap and fill it with kerosene. Dip the feet and legs in it up to the feathers, but do not wet the feathers, and hold them in the oil for a second or two, no longer. --Farm Journal.
