by the hundreds of taxpayers who know me—the reason being my years of experience as a contractor, road and bridge builder, coupled with a reputation for being a hard, conscientious worker and one of the heaviest taxpayers in my home part of the county.

Having constructed roads and bridges I am perfectly capable of overseeing the building, estimating the values and doing the work myself, if necessary, without having to put the taxpayers to the added expense of hiring technical experts.

Owing to my reputation as one of the original automobile advocates and selling agents in the county, I am conversant with the county's roads—I know the condition of these roads, the needs of these roads and the majority of the people who travel these roads.

The Arrow of St. Edmund.

The legend of the death of St. Edmund was curiously corroborated after a lapse of eight centuries. The story goes that the martyr was tied to a tree and, as torture proved unavailing to make him recant his faith, was shot at with Danish arrows till his body was covered with them. The tree at Hoxne to which he was said to have been bound and which was twenty feet in circumference fell in 1848, and, according to "The Black Letter Saints of the Prayer Book," a piece of iron like an arrow head was found imbedded in the wood.
