A Remarkable Shawl.

The empress of Russia was once presented with a shawl of a remarkable kind. It is contained in a box only a few inches square, in which it fits easily, yet when it is shaken out it is ten yards square. This notable gift was the work of some women weavers in Orenberg, southern Russia, by whom it was presented. The box containing it is of wood, with hinges, hoops and fastenings of beaten silver.

A War Horse.

A professor who had bought a shabby looking horse asked his coachman to try it. After the animal had been driven around the road a few times the professor asked Pat:
"What do you think of him?"
"Bedad, he'd make a fine war horse," said Pat.
"Why, how is that?" asked the professor.
"Because," said Pat, "he'd sooner die than run."—Pittsburgh Telegraph.

She Explains.

"It is impossible, Ferdie. I can't marry you."
"Then why did you let me make love to you?"
"Out of pure kindness of heart. I thought you needed practice badly."—Kansas City Journal.

Sudan Grass.

Sudan grass is a sorghum, but does not grow quite as rank as the ordinary cane sorghum. Being an annual, it must be seeded each year and fits nicely into rotations.

This crop can be sown between corn planting time and the 1st of June. For its best growth it requires plenty of bright weather. If broadcasted about twenty to twenty-five pounds should be used to the acre.

Sudan grass can stand considerable drought. It is not very good as a nurse crop. It makes such a heavy growth as to cut off sun and moisture from the crop it is to foster.

PROTECT THE GARDEN.

The old gardener says to look out for frost in spring or autumn when the sunshine is very hot, the shade very cold and the shadows very deep.

This indicates that the air is dry and radiation little checked.

Making a smudge in the garden at night when the frost is expected and spraying the plants thoroughly with water at the same time will help prevent damage to plants.

Beans, corn, cucumber, eggplant, melons, okra, pepper, pumpkins, squash, sweet potatoes and tomatoes are the vegetables most likely to be damaged by spring frosts.

A little care and work in the evening may save the crop for you.

Second Sight.

An Irishman and his English friend were out rabbit shooting. They had been very unsuccessful and were returning, downhearted, when they saw a hare dart out of the hedge.

Mike, in amazement, failed to shoot, and the hare escaped.

"Why didn't you shoot it?" asked the Englishman.

"Shure," said Mike, "I didn't see it till it was out of sight."—London Telegraph.

Drying an Umbrella.

An umbrella should never be opened in order to dry it, as the ribs get sprung, and it will never roll up neatly and tightly after once dried in this manner. Doing this will also spoil the cover by straining the weave unnaturally. The correct way to dry an umbrella is to stand it on the handle that the water may run off at the points instead of gathering at the ferrule and thus rotting the material.
