VOLUME 3

SANDY, CLACKAMAS COUNTY, OREGON, THURSDAY, SEPTEMBER 21, 1916

NUMBER 38

TAXES DELINQUENT AFTER OCT. 5th, 1916

Sandy Items

A reception to the teachers of the Sandy school will be given at the school house on Friday September 29th, from 3 to 4 p. m., by the joint Boards of the High and Grammar Schools. All patrons and interested friends are cordially invited to be present. Come and see our fine school.

Miss Gladys Bachelder spent Sunday with her parents, Dr. and Mrs. Bachelder.

Mrs. T. C. Smith, of Portland, is visiting her daughter, Mrs. Bachelder.

Dr. and Mrs. Bachelder, Miss Bachelder and R. E. Esson and Mrs. Esson attended the Fair at Gresham on Saturday.

LOST—Thursday September 14th, on Main street, Sandy, a blue jacket with white embroidered collar. Please leave at this office.

Fred Sladky has taken Fred Gray's place at P. T. Shelley's livery.

The show at the Bunglow Wednesday night was a good one and well attended. Mr. Meinig will continue the Wednesday night shows until further notice.

Royce Butolph is working for P. T. Shelley.

Mrs. Fox is keeping house for Mr. Phelps.

Billy Updegrave is boarding at Fred L. Proctor's.

Ada Longnecker and Edgar Hutchinson were married in Portland last Thursday.

Carl Aschoff, of Marmot, was in town Tuesday.

Ed Grunert went to Portland Saturday to visit relatives, returning Sunday night.

Cyrl Gray returned from Omak, Washington. He says Sandy looks good to him.

The Sandy boys are organizing a basket ball team.

Mrs. Maronay is visiting John Maronay at Hill Crest.

FOR RENT—Comfortable, furnished house. Apply to Mrs. C. H. Edwards at Sandy Hotel.

Mr. and Mrs. A. W. West, of Portland, were visitors at Fred Proctor's Sunday.

Quite a number from Sandy attended the Fair at Gresham Saturday and remained for the dance.

Mrs. M. Revenue has returned from Portland where she has been for several weeks.

Walter St. John was injured this week while soldering a gasoline tank which exploded.

J. M. Davis has gone to Rhodendron to help build a dance hall.

The work being done on Main street is progressing nicely under the supervision of Tom Milan, who has demonstrated beyond a doubt that he knows how to build roads.

FOUND—A red and white bull, white legs, white spot in face, muley, halter and long rope around his neck, about 3 years old, in good condition, weight about 1000 pounds. Call at Sandy Meat Market. L. E. Hoffman, Sandy, Ore.

The "Prosperity and Pleasure" Club has been organized among the grammar school pupils of the Sandy school.

The object of the club is to promote the general welfare of the Sandy grade school.

The last hour of school on Wednesday was given over to organization. The following officers have been elected: President, Hazel Beers; Vice-President, Fred Junker; Sec-Treas., Louise Goger; Librarian, Mary Sharnke; Sexton, Carl Loundree; Sergeant at arms, Marie McCormick, Edward Smith; Ensign, Ephrom Gray; Advisor, Mrs. Mack.

Question:—What is the Holy Land?
Answer:—The place where God is buried.

HILL CREST

Roy Mitchell is at home again after spending the summer in the mountains in the forestry service.

Mrs. J. C. Smith and Miss Irene Smith were calling on Mrs. Watkins last Thursday afternoon.

Mrs. A. Maronay and Anna Maronay are up from Sandy spending a few days with John Maronay.

Mrs. John Maronay went to Portland Saturday. Her little brother is at the hospital on account of being kicked on the head by a horse.

School opened on Monday with Miss Lena Thomas, of Bull Run, as teacher.

It is reported that two of Mrs. McCormick's horses died Friday night.

BORING

School began here Monday with a good attendance. Mr. Mallicoath as principal, Miss Reugg, intermediate and Miss Goger in the primary. Several more pupils will come in as soon as hop season is over.

Mr. and Mrs. Floyd are the proud parents of a baby girl born the 14th.

Miss Sophia Zogg, who has been working in the post office, has gone home. Miss Carrie Gregson will take her place.

Woodside Wireless

(Too late for last week.)

Mrs. Lola Theis and son Fred, from Portland, spent Sunday with Frank Theis.

Minnie Senske was the guest of her sister, Mrs. J. Burmeister, a few days last week.

Miss Boldena Miller is working for Mrs. Mark Senske.

Mark Senske was at home Sunday and Monday.

J. Burmeister and wife took Sunday dinner with Mrs. Burmeister's parents, Mr. and Mrs. J. A. Senske, Sandy.

Mark Senske and Clarke Melugin have bought the Maronay hay baler and are now baling on Wesley Flat.

Mrs. Lola Theis called on Mrs. Mark Senske last Sunday.

Miss Boldena Miller spent Sunday with Miss Martha Hoffman.

DEEP CREEK

Road supervisor, D. L. Erdman is doing road work.

Jack and Lily McKinley, of Portland, spent Sunday at Erdman's.

P. M. Holst made a trip to the Columbia Highway on Sunday.

Mrs. Esther Pearson and son Waldemar, spent a few days of last week in Portland visiting her sister, Mrs. O. S. Rydman.

Mrs. Erdman and daughter Esther, made a trip to Sandy last Saturday.

Miss Mollie Clarke is going to the Estacada high school.

Muriel Henriksen is going to the Washington high school in Portland.

Mr. Carlck, Mrs. Mary Mowrey and daughter Fern, of Portland, motored out to Erdman's Sunday evening.

Mr. and Mrs. O. S. Rydman and children, of Portland, motored out Sunday afternoon.

Charles Bartlemay made a business trip to Portland on Wednesday.

Joe Loundree took Mrs. George Wolf, Mrs. Butolph, Mrs. C. H. Edwards and daughter to Deep Creek for prunes Tuesday.

William Bartlemay hauled wood for L. W. Scott Monday and Tuesday.

Mr. Erdman sold three beef cattle to Andrews the Pleasant Home butcher.

SHIFTING OF THE WATERS.

What the Sea Gives to the Land and Gets Back Again Every Year.

According to Mr. Roscoe Nunn of the United States weather bureau, the waters of all the oceans have visited every part of the earth at some time in the history of the globe, so continually and upon such a vast scale are the winds and the forces of evaporation, condensation and precipitation at work. A continuous circulation of water takes place between the hydrosphere (the water areas of the globe) and the atmosphere. The winds blow water vapor from over the seas to the land, and ascending currents carry it into the upper atmosphere. There it condenses and is precipitated, to begin the return journey to the sea through springs and rivers.

The amount of evaporation from the seas and the amount of precipitation on the land depend upon the temperature and the winds. It has been estimated that nearly 130 million millions of tons of water are transferred from sea to land and back again to the sea every year.

The average rainfall of the globe is about thirty-three inches. In the United States it varies from almost nothing to about 100 inches. Over the eastern half of the country it ranges from about thirty to about sixty inches and in the Pacific states from five to 100 inches.

Probably the greatest rainfall in the world occurs among the hills of Assam, in India, where over 500 inches fall in a year, and sometimes as much as forty inches in twenty-four hours.

No Information.

"What is the speed limit in this town?" asked the automobile driver, bringing his car to a stop just outside the boundary line.

"Never you mind what the limit is, mister," said the village constable. "You go right ahead and I'll tell you when you're going too fast."—St. Louis Post-Dispatch.

REPUBLIC OF LIBERIA.

How the Colony Was Organized and Started on Its Career.

The first president of the American Colonization society, which founded the republic of Liberia, on the west coast of Africa, was Bushrod Washington, who was born in Virginia in 1759 and who was a nephew of George Washington. He served as a private soldier in the Revolution and afterward was elevated to the United States supreme court.

While himself an owner of many slaves, he was deeply interested in the movement for restoring the Africans in America to their native continent. He was one of the pioneers in the organization of the American Colonization society, which was launched in the latter part of 1816. Henry Clay, John Randolph and other men of prominence were also prominent in the movement.

In 1820 the society sent thirty-eight negroes back to Africa in a government vessel, and in that year a constitution for the colony, which was named Liberia, was adopted. The colony continued to be in charge of agents and governors appointed by the society until 1847, when its rights were voluntarily surrendered and the independence of Liberia was proclaimed and was recognized by the United States, Great Britain and France.—New York World.

Jefferson as an Inventor.

Not many people knew that Thomas Jefferson was a great inventor. His inventions were all of articles of everyday use. He devised a three legged folding camp stool that is the basis of all camp stools of that kind today. The stool he had made for his own use was his constant companion on occasions of outings. The revolving chair was his invention. He designed a light wagon. A copying press was devised by him and came into general use. He also invented an instrument for measuring the distance he walked. A plow and a hemp cultivator showed that his thoughts were often on agricultural matters. His plow received a gold medal in France in 1790. Jefferson never benefited financially by his inventions, but believed they should be for the use of every one without cost.

Sir William Pepperell.

The first native American to be knighted by an English monarch was Sir William Pepperell, who was born in Kittery, Me., over two centuries ago. His father was a Welshman, who came to New England as an apprentice to a fisherman. The son became a merchant and amassed a large fortune. As a military leader he took part in several conflicts with the Indians and attained much distinction. For thirty-two years he was a member of the royal council of Massachusetts, and as chief justice of common pleas he won eminence as a jurist.

Famous Fables.

"My ancestors came over in the Mayflower."

"This is our family coat of arms."

"Oh, I had plenty of chances to marry, but I preferred to remain single!"

"My kid got off an awfully funny remark yesterday. Listen!"

—New York World.

More Effective.

"I see ye've invested in a vacuum cleaner," a neighbor said to Mrs. Jones. "Do ye like it better than the old fashioned broom?"

"You bet yer life I do," Mrs. Jones answered. "I kin knock Jones twice as fur with it."—Exchange.

Something In His Favor.

"There's one thing I will say for that fellow whose mistakes cause so much trouble."

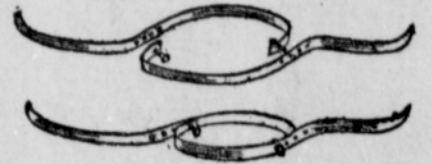

"What is it?"

"He doesn't claim that his intentions were good anyhow."—Detroit Free Press.

Adjustable Cow Yoke.

Here is a cow yoke that will fit either a cow or calf, as it is adjustable, writes F. E. Howe in the Farm and Fireside. I made mine from discarded buggy tires and after trying several of these yokes have found them the most convenient of any I have used.

This kind of yoke is very light and will prevent a cow or calf from creep-

ing through fences. The sketch shows the construction.

To make the cow yoke fit a calf remove the bolts, slide the parts along so the opening is smaller and replace the bolts in the proper holes. Have the tops and bottoms of the yokes bent forward to prevent the cows bumping their knees on them.

Sometimes the yoke may be apparently tight, but if a cow catches it on some brush she may turn it the other side up. That is the reason for having the top as well as the bottom bent forward so the ends are interchangeable.

SOME HORSE SENSE.

Unless the farm horses have a chance for proper rest at night they soon become weak and lose weight.

A jaded team can never do a profitable day's work.

During the hot months the work horses should spend the nights in the pasture near the stable.

Before they are released at night they should have eaten their regular ration and been cleaned and brushed from head to heels.

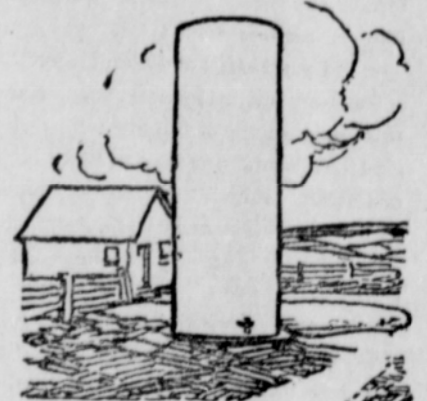

Anything that adds to the comfort of the work team and helps to keep it in condition puts cash in the owner's pocket and adds credit to his account.

Many horses are made quite nervous by any unusual noise or confusion about the barn, and this affects their eating. Food will not digest so well. Try to have everything as quiet and regular as usual at mealtime.

The horse has a small stomach. To keep it stuffed all the time is bad in every way. Feed a good fair ration three times a day and so prevent indigestion.

Old Boiler Standpipe.

Old boilers can be found in most every junk yard and can be obtained at a very reasonable price. One farmer bought an old boiler of a nearby city council, transported it to his farm and set it up on a concrete base. He uses

it for a water supply tank, which gives him water under pressure in all departments of the farm.

He took all the old tubes out of the old boiler and sold them for junk, which paid him for hauling the outfit to his farm. The old boiler was given a coat of asphalt paint inside and out. During the cold winter months this farmer prevents the water from freezing by packing straw around it.—Farm Progress.

Mistaken.

Patience—You say he married under a misapprehension? Patrice—Yes; he thought he understood women.—Yonkers Statesman.
