Dirty Windows.

A German professor has ascertained that in industrial cities windows which have not been washed for ten days exclude from 35 to 48 per cent of the light. If not washed for four weeks they may exclude as much as 80 per cent of the light.

Quick Change.

"Here, you! What do you mean by telling that red nosed old bachelor friend of yours that marriage is all a lottery?"

"I was just about to assure him, m'dear, that I won a prize."—Louisville Courier-Journal.

DOVER

Sandy Grange met in regular session at Sandy last Saturday and was well attended. All the officers were elected for the ensuing year.

Mrs. Alice Roberts and son, Glendale, returned from Hood River last Saturday where they went several months ago to pack apples. Birch and Don Bodley will come home in about two weeks.

Merton E. Lee and family are expected home next week from Knappa, Oregon, where they have been since the first of March in a logging camp, the camp having shut down for the winter.

George Dickerson and daughter started for California again last Monday. Joe Loundree came out with his machine and got them.

All the patrons in Dover attended Grange at Sandy last Saturday regardless of the rain and stormy weather.

The deep snow and cold rains of the past week is very hard on stock that is out.

Alfred Shirley is helping August Koennan to finish his house.

Mrs. Hugh Guthrie came home from the hospital in Portland last week much improved.

George Kitzmiller got the contract to make two thousand cross lays to corduroy on the North Eagle Creek road in Buzzard's Glory.

Orville Evans bought a saddle of A. J. Morrison which he needed in his business buying up cattle.

CHERRYVILLE

Shortest days in the year.

Lyceum was postponed until Friday of this week on account of the weather.

Winter starting in so early makes farmers feel rather anxious about feed for the winter as it is a long time until the first of next May.

Archie Averill went to Pullman, Washington, this week where he has a position in an architects office. Pullman is in Whitman county the largest producer of wheat of the same area in the world.

J. P. Morgan returned from a trip to Europe last week and the Allies are sure to win eventually, but when? So far they have made no headway at all. The fact of the matter is that Morgan is getting ready to float another loan here for England or France or perhaps Russia. On these big loans Morgan and his band of cutthroats, get a commission of five or six millions. This disgrace to his country, or any other country, would unload a lot of poor bonds or rotten stocks on his people to fill his own pockets or do anything for money.

KELSO

Remember the bazaar to be held at the Kelso school house Saturday evening December 16th, at 8 o'clock. Christmas gifts and many useful articles may be purchased at small cost. A short program will be given and refreshments will also be sold. The bazaar will be under the auspices of the Parent-Teacher Association and the proceeds will go toward a fund for building a play-shed and kitchen for the school.

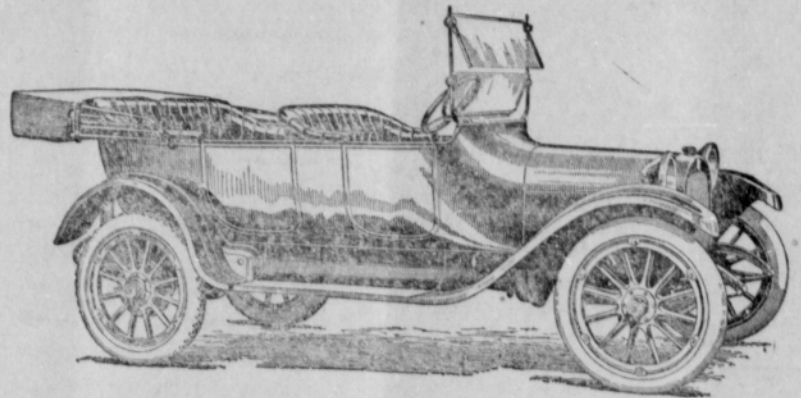

The First Music.

The father of song, music and dancing, all three, was the savage who first clapped hands and shouted in time at some rude festival of his tribe. From that clapping and shouting has been evolved the whole art of instrumental music, including even the entrancing complexities of the modern symphony. From that shout or rudimentary emotional utterance has proceeded by a kindred evolution the whole art of vocal music down to the modern opera or oratorio. From the savage leap has come every variety of dancing.

Costly Pleasure.

"Some folks," said Uncle Eben, "tries so hard to have a good time dat de effort worries 'em most to death."—Washington Star.

INDIANS AND MEDICINE.

A Funny Way of Giving a Sick Child a Dose of Oil.

The Indian, says the Rev. J. Hines in his book "The Red Indians of the Plains," has the idea that any kind of medicine is equally good for all complaints. He believes in drastic measures, and unless he feels the effect of the second dose of the medicine he loses faith in it and gives up taking it. He prefers purgatives and emetics, but even in them the Indian is wont to discriminate, and he thinks castor oil is especially "good medicine."

Very often mothers would send to the mission for castor oil for their infants and then come the next day and complain that the medicine had not operated and that the child had done nothing but cry ever since it took the medicine. Then my wife would pour out another teaspoonful and hand it to the mother and request her to administer it in her presence. The child would object, as most children do, and that part of the oil that left the spoon would trickle down the cheek of the child.

The mother, partly to remove the oil and partly to pacify the child, would give the child a kiss that covered the whole of its cheek and in so doing would remove the oil with her lips and swallow it herself. Then she would lick the spoon clean, hand it back to my wife, and that is the way Indian women give castor oil to their children.

After witnessing this performance we had no difficulty in understanding why the child got no benefit from the previous dose.

SOME HANDY HINTS.

A ton of soy beans will yield about forty gallons of oil useful in various ways.

It is impossible to make sweet, clean, flavored butter from old, unclean cream.

Garlic flavor can be eliminated by heating milk to 145 degrees F. and blowing air through it.

There are seventy national bird reservations, of which sixty-seven are in charge of the department of agriculture.

The formation of ice on the surface of fields is fatal to alfalfa. This condition is most apt to occur on fields that are level or that contain pockets.

Care should be taken to handle alfalfa hay so as not to lose leaves, as these contain considerably more than 50 per cent of the feeding value of the hay.

After testing his seventeen cows through a cow testing association a Nebraska farmer sold seven and received more profit from the ten remaining animals than he had received formerly from the whole herd.
