Manufacturers of

Mountain Meadow Butter

Formerly Mt. Hood Butter.

Pure, Sweet, Clean.

COTTRELL

Harry Higin of Bull Run visited his grandparents Mr. and Mrs. S. Bacon last Sunday.

Mr. and Mrs. J. C. Bettis, daughter Vada and son Donk started Saturday morning for Nez Perce, Idaho where they will visit their two sons. They are to make the trip in their auto.

Miss Florence and Eva Beers are visiting their cousin Frank Beers and other relatives.

J. B. Jones and family and Mr. and Mrs. Geo. Blackburn enjoyed a trip up the Columbia Highway Sunday.

Mr. and Mrs. Lawrence Craswell visited her father and other relatives at Hood River the latter part of the week. They went via the highway in their Ford.

Robert Lansdowne left Thursday morning for eastern Oregon where he will work in the harvest.

The pie social given at the Cottrell church Saturday was well attended and \$11.30, was taken in. The committee wishes to thank the people for their assistance.

Mrs. Miller, Mrs. Hyatt and Mrs. Decker spent Thursday with Mrs. L. Van Fleet, it being her 78th birthday.

Mr. and Mr. Spiers, Ike Foster and Miss Eva Schneider enjoyed a trip over the Columbia Highway Sunday.

Several from this vicinity attended the closing of the Rose carnival Friday evening.

Jesse and Floyd Radford visited their parents, Mr. and Mrs. Dick Radtork. The boys have both enlisted for service in the army and are stationed at Vancouver.

At the annual meeting of the Cottrell school district W. A. Proctor was elected director to succeed J. B. Jones and E. E. Van Fleet was re-elected clerk.

Jas. Fowler and family attended the Rose festival Wednesday.

Miss Ellen De Haven is spending her vacation with her parents. She will teach near Albany the coming school term.

THE BLUFFS

Mr. Schwartz made a trip to Portland Saturday. His daughter Emma and mother returned home with him for a few weeks vacation.

Mr. and Mrs. Wm. Becker and Mr. Severin attended the Rose carnival last Thursday.

Mrs. P. T. Dunn was a Portland visitor last week.

Lacile Dixon of Portland is spending a few days with her grandparents, Mr. and Mrs. P. T. Duffn.

Herman Becker is quite sick at the present writing.

Mrs. Daly and Mrs. Severin visited at Mrs. J. Phalen Friday.

Mr. and Mrs. Reichen and two children of eastern Oregon visited at the Severin home Sunday.

Willie Haley went to Portland Saturday returning Sunday.

A small crew of men have begun work down in the rock quarry.

Mrs. Hoyt and family of Portland were visiting Mr. Heia last Sunday.

Mr. A. Odell was looking over his property at Hood View last week.

KELSO

The campaign for the Red Cross fund is energetically being conducted in this district this week. A social will be held at the school house Friday, June 22nd, at 8 o'clock in the interest of Red Cross work. T. M. Sullivan, manager for the county will send a speaker for the evening. Games will be played and coffee cake and sandwiches sold. Ladies will please bring cake or sandwiches.

At the annual school meeting Monday Victor Erickson was elected director to serve for three years and P. C. Spooner was elected clerk. The special tax for the Union High school was passed by a large majority.

Robt. Jonsrud sold a Buick six roadster this week. Mr. Jonsrud has also purchased a new Paige six to use as a demonstrator as he is agent for both the Buick and the Paige.

Sherman and Wesley Strucken, sons of Mr. and Mrs. John Strucken, who have been ill for several months, both died last week within a few hours of each other and were buried at Cherryville Sunday. Besides their parents they leave a sister, Mrs. Viola Duncan, who resides near her parents two miles east of Boring.

Robt. Jonsrud recently purchased 97 head of Coe well sheep.

John Jonsrud is building a new house for Anton Jerger.

Mrs. John Revenue who underwent an operation for appendicitis recently is improving and will soon be home again.

Miss Lillie Jonsrud has returned home for vacation.

LIVE STOCK NOTES.

- Do not encourage visits to your barn from the neighbor whose ste is always ailing.
- There is a theory that the way to keep a hog well is to keep him and his food and surroundings clean. Worth trying.
- When the flock has been eating roots the change to the fresh grass is not so relaxing.
- Some five dollar calves may grow into hundred dollar cows; don't send them to the butcher.
- The pigs need shade in the pasture. There should be trees as well as shelter.
- Do not let the little pigs hang over a high trough or they will grow crooked in the backs and be spoiled.

Circumstantial Evidence.

"What makes you think all women hate each other?"
"Because a woman so seldom brings up a son fit to be another woman's husband."—Exchange.

To make knowledge valuable you must have the cheerfulness of wisdom.—Emerson.

SUMMONS

In the Circuit Court for the County of Clackamas, State of Oregon.

Clackamas County Bank, a corporation, Plaintiff.

vs

A. H. Lamn, Administrator of the Estate of Thomas Anderson, deceased; Bernt Anderson, Gustava Anderson, Hans Albert Anderson Tokerd, Agnes Anderson and Ruth Solveig Anderson, Defendants.

To Bernt Anderson, Gustava Anderson, Hans Albert Anderson Tokerd, Agnes Anderson and Ruth Solveig Anderson, Defendants.

In the name of the State of Oregon, you are hereby required to appear and answer the complaint filed against you on or before the 14th day of July, 1917, and if you fail to do so, for want thereof, plaintiff will apply to the Court for relief demanded in said complaint, to-wit, for a decree that plaintiff have judgment against defendants, A. H. Lamn, as administrator of the Estate of John Anderson, deceased, Bernt Anderson, Gustava Anderson, Hans Albert Anderson Tokerd, Agnes Anderson and Ruth Solveig Anderson, for the sum of Two Hundred Three and 30-100 (\$203.30) Dollars, with interest thereon at seven percent per annum from January 24, 1916, until paid, and for the further sum of Forty (\$40.00) Dollars attorneys fees, and for its costs and disbursements, and that the usual decree may be made for the sale of the following described premises by the Sheriff of Clackamas County, according to the usual practice of this Court, to-wit:

Beginning at the Quarter Section corner on the West boundary line of Section Eighteen (18) Township Two (2) South of Range Five (5) East of the Willamette Meridian; running thence south three hundred and seventy-eight and 7-10 (378.7) feet to the County Road as located and used at present, thence south east along said County Road about One Thousand and sixty-eight and 29-100 (1068.29) feet thence north westerly, four hundred and seventeen and 40-100 (417.40) feet, thence north westerly, eleven hundred and eighty and 01-100 (1180.01) feet to the place of beginning containing eight and 98-100 (8.98) acres, more or less, and that the purchaser shall be let into possession of said premises on production of the Sheriff's certificate of sale therefore, and that the defendants and all other persons, claiming under them, subsequent to the execution of the said mortgage upon the said premises, either as purchasers, incumbents or otherwise, shall be barred and foreclosed of all right, claim or equity of redemption unto the said premises and every part thereof, and for such other and further relief as to the court may seem meet and agreeable to equity.

Charcoal For Poultry.

Charcoal is not a food and may not be a panacea for all poultry ills, but it is a valuable aid to digestion and a corrective of digestive troubles, says a correspondent of the Farm and Fireside. It is good for poultry of any age. It may be mixed with the mash, wet or dry, or fed in hoppers so that the birds may help themselves. It is especially valuable in fattening or forced feeding. Experiments with fattening fowls and turkeys have shown that these having charcoal made much greater gains than those not receiving it. Finely granulated is the most convenient and desirable form for feeding it. Although supply houses usually charge a pretty good price for it in small quantities, it is comparatively inexpensive when bought by the bag or barrel. Bones or corn is sometimes charred for poultry, but this is inexpedient except on a small scale.

Get Rid of Poor Hens.

Keep the flocks culled. Do not let a few or a few dozen or a few hundred hens live and sponge off the industrious and well paying flock.

Time of Planting Corn.

May 4 to 17 has been the most profitable date during eleven years for planting corn at the Ohio experiment station at Wooster. Yields have been greater from corn planted in this period than from plantings made either earlier or later. The ears of the late planted corn have generally been small and immature.

WANT AND FOR SALE COLUMN

FOR SALE Two male and two female Grade Polin Chma pigs sired by King Jumbo, Registered. Ten dollars each. Sale plants 50cts per thousand. J. H. Revenue, Boring Route 1.

FOR SALE—Two small horses, apply I. W. Kyler, Marmot, Oregon. 1-14, 2i.

Seed Potatoes Wanted.

Burbanks preferred. Will pay cash or trade grain for them.

Write to the "Sandy News."

For Sale or Trade.

Twenty-five thousand Shingles. Will sell or trade for hay or grain.

SANDY LIVERY BARN.

Will not sell any ice this summer. Gruner's confectionery.

ALL AROUND THE FARM

LEGUMES ARE VALUABLE.

Furnish Nutritious Food For Animals and Also Enrich the Soil. [Prepared by United States department of agriculture.]

Farmers have known for centuries that the clovers, alfalfa, beans and peas enriched the soil, so that wheat, corn, cotton and similar crops gave better yields when following them than when planted after the grains or grasses. The reason for this fact, however, is of more recent discovery than the fact itself.

The soil enriching, leguminous plants possess normally nodules attached to their roots. These are due to the presence of great numbers of bacteria, minute living organisms which enter the roots from the soil. To us their importance lies in the fact that they possess the power of absorbing nitrogen from the air as it circulates in the soil and turning it into compounds which are readily utilized in the growth of the plants. Plants to which these bacteria are not attached derive the nitrogen required for their growth from

Crimson clover, showing the most advanced stage of ripening that is allowable to use for hay.

the soil alone. In consequence leguminous plants in general contain more nitrogen than the nonleguminous. They are therefore richer feeds, and if they are returned in whole or in part to the soil they increase its nitrogen content and thus promote the growth of the following crop. A third advantage in their use is the fact that when fed to live stock the resulting manure has an unusually high fertilizing value.

Under ordinary circumstances the best way to dispose of these crops is to feed them to live stock. All kinds of stock will benefit from them. Alfalfa hay can be substituted in part for such concentrates as wheat bran and cottonseed meal for both dairy and beef cattle. Red, alsike and sweet clover and field peas are less nutritious, but they are nevertheless more valuable than timothy, redtop, orchard grass or other nonlegumes.

Notice to Creditors.

In the County Court of the State of Oregon for the County of Clackamas. In the matter of the estate of Ezra C. Truman, deceased.

Notice is hereby given that the Honorable H. S. Anderson, County Judge of Clackamas County, Oregon, did on the 16th day of June, 1917 appoint Eliza J. Truman, executrix of the Last Will and Testament of the said Ezra C. Truman, deceased, and notice is hereby given to the creditors of, and all persons having claims against said deceased, Ezra C. Truman, to present them, verified as required by law, to C. D. Purcell, Attorney, Sandy, Oregon within six months after the first publication of this notice.

Signed Eliza J. Truman, executrix of the Last Will and Testament of Ezra C. Truman, deceased. C. D. Purcell, Attorney for the Executrix.

First publication June 21st, 1917. Last publication, July 15th, 1917.

Furthermore, the fertilizing value of a leguminous crop need not be lost when it is fed. From 75 to 90 per cent of this fertilizing value can be given to the soil if the manure from the live stock is spread promptly and properly. The small percentage that is lost is insignificant in comparison with the gain to the live stock.

For various reasons, however, some good and some bad, the farmer does not always keep sufficient live stock to furnish enough manure for the requirements of the soil. Under such circumstances a substitute must be found, and the most available one is a leguminous crop, called, when grown for this purpose, a green manure crop. By plowing under this crop humus is added to the soil in much the same way that it is by applications of manure. Because they also add nitrogen legumes are more desirable green manure crops than nonlegumes.

Plowed under crops, however, obviously produce no direct return, and for that reason it is desirable whenever possible that the same land should produce during the season one crop for harvest and one crop for green manure. In the southern part of the northern states grain, early potatoes and a number of other crops are harvested sufficiently early for them to be followed by a catch crop, as a crop following the main one is called.

When there is no time to grow a second crop before cold weather, legumes may still be used as winter cover crops. These serve three purposes—first, to take up available plant food that would otherwise be leached from the soil and lost; second, to protect the land against erosion; third, to supply winter pasture. In the spring they should be turned under for green manure. Red clover, crimson clover and hairy vetch make good cover crops in the north. A common practice is to mix hairy vetch with rye.

Feeding the Cow.

The dairy cow must have a ration from which she can produce milk if you expect her to make a profitable return for the feed.
