

CHERRYVILLE

This weather is finer than silk.

The writer spent two weeks in the Forest Service on a trail in the Salmon river above Welch.

Mr. and Mrs. Fay Shank have returned to Cherryville and will build a house on their land north of town.

The warm rains of last week did a world of good to gardens, grass and grain and the outlook for a big crop is grand.

The classifiers for the R. R. land are working in this vicinity and some of the tracts are found to contain too much timber for agricultural purposes. It appears that if a 40-acre tract contains more than 400,000 feet it is classed as timber land and cannot be taken until the timber is sold. The 100-acre tract near Alder creek bridge taken by S. C. Runyan cruised nearly 4,500,000 ft and was classed as timber land. The adjoining, taken by Ingram, who had done considerable work on it, cruised over 5 million feet. Part of Mr. Odell's and Leo Updegrave's ran too high for agricultural lands.

The mills above both shut down for the fourth but will resume active operations immediately and will get out ties and lumber with a rush.

The government is looking for oil fields it appears in order to fill the present demand during the war. There is a well in this vicinity that is so strongly impregnated with oil that the water cannot be used. Oil is found all around that locality.

Who is not proud of being an American? We are certainly proud of our young men who have responded so nobly to the call of their country. They are the worthy descendants of their illustrious sires who laid the foundation of this mighty republic now the foremost nation of the earth.

A person must be blind or sadly lacking in perspicuity who cannot perceive the defeat of the German military power. Foes are accumulating on every direction and now that Russia is in line again and other nations coming against the Kaiser his doom is sealed. One thing certain he will not take his downfall as calmly as did the Czar who peacefully went to hoeing potatoes and for once in his life performed a useful part in life.

DEEP CREEK

Arnold Ackerson, son of Mr. and Mrs. J. W. Ackerson, who underwent an operation for appendicitis at the Good Samaritan hospital Friday, died Saturday evening, June 23rd. He was born August 26, 1882 in Minnesota. Arnold was liked by all who knew him. He is survived by his parents and two brothers, Clarence and Herbert. The funeral services were held at the Baptist church at 1 o'clock Tuesday afternoon. The floral tributes were beautiful. Interment at Sandy Ridge cemetery.

Miss Thelma Farland spent Sunday with Amy Anderson.

Mr. and Mrs. W. Hanson made a business trip to Portland Friday.

Mr. B. Anderson and their little daughter returned to their home in Portland Sunday after a few days visit with relatives.

Mr. W. Hanson sold his farm to Morris Mowrey of Portland who took possession Monday. Mr. Hanson and family left for Portland on the same day.

Miss Florence Phillips of Eury, Oregon spent a few days visiting her relatives.

Mr. C. Bartlesmy and family and Mr. and Mrs. I. Scott spent a day with Mr. Grover Judds.

The fact that the United States is at war with a foreign foe only furnishes an additional argument in support of the good roads bond bill. Improved and serviceable highways are a military necessity in time of war. In their present condition, even the main trunk roads in this state are entirely inadequate to meet the situation should the Pacific Coast ever be attacked by unfriendly forces. Good roads are not only desirable in time of peace but are positively indispensable when the country is in a state of war.

KELSO

The sum of \$92.70 was raised by Kelso during the Red Cross campaign. Of this amount \$12.25 was contributed by the Sandy ridge district which was canvassed by one of the Kelso solicitors. Several of our residents contributed at other places so the entire sum sent in by Kelso amounted to over \$100. The solicitors were Mrs. C. Zimmerman, Miss Angela Canning, Albert Jonrud and Miss Robt Jonrud.

On Friday evening of last week an interesting meeting was held at the school house in the interest of the Red Cross work. T. W. Sullivan, campaign manager for Clackamas County and Miss Mary Cronin, an experienced Red Cross worker, were present and each gave an interesting address. Dr. I. Bloomwick also spoke on organizing a club among the women of Kelso to carry on the Red Cross work which will be done in the near future. Coffee and cake were sold to the amount of \$7.70 which also went to the Red Cross fund.

Miss Anna L. Erickson, a former Kelso teacher, is spending a few days visiting friends and former pupils. She has just returned from a year at Monmouth normal school and will teach the primary grades at Mt. Pleasant this fall.

Robt Jonrud has contracted to manufacture 2000 steel straps for gasoline saws.

Mr. and Mrs. A. Olson of Portland were guests at their daughters, Mrs. R. Jonrud Sunday, June 24. Other guests were Mr. and Mrs. Albert Podium and Mrs. C. J. Sindall.

FIRWOOD

Mr. Withers has gone to Portland to work.

Wendland Bros has purchased a Chevrolet auto.

Mrs. Henry Riesacker spent Sunday with Mrs. Winter at the Jap mill.

Mr. and Mrs. Kirby of Portland are visiting with Mrs. Kirby's mother, Mrs. Friel of Cherryville.

Ernest Hart and Bill Lamper made a trip to Will Cat Sunday.

Mrs. Sinclair spent Monday with her parents, Mr. and Mrs. Friel.

The Firwood union Sunday School will give a program on the evening of July 15th at the school house. Everybody come.

J. W. Dixon was a Portland visitor Tuesday.

Pearl and Hazel Dixon spent Tuesday with Mrs. L. R. Mack.

Mr. Frick of Astoria is visiting with his sister, Mrs. F. Alt and family.

Willard Bosholm and Walter Krebs were Portland visitors last week.

Mr. and Mrs. Cornelius, Mr. and Mrs. Louise and daughter all of Portland are visiting with the Bosholm family.

The Fray family of Portland is out at camp Idlewhile for the summer.

Mr. and Mrs. Dixon and family spent Sunday afternoon with the Malar family.

Mr. Bosholm has purchased a new Empl e milking machine.

The Red Cross committee and helpers gathered at J. G. Deshazers last Wednesday evening where the spent an enjoyable time dancing and playing games on the lawn. Ice cream and cake were served.

Godfried Stucke has returned home after a few days visit to Portland.

Mrs. Miner of Sandy spent a few days last week with Mrs. Mac.

Bertha Stucke spent Friday evening with the Deshazer family.

Mr. and Mrs. Bosholm spent Monday with their son, Mr. Willard Bosholm.

Lawrence Mack has returned home after spending a few weeks at Corvallis.

Miss Nona Nuender of Oregon City has been hired to teach the Firwood school for the coming term.

Domestic Economy.

"Does your wife economize?"
"Yes," replied Mr. Meekton. "She has figured to a nicety how many new gowns the money I spend for cigars would buy."—Washington Star.

FILLING OUT A CHECK.

It is a Good Rule Always to Write the Stub First.

In a big store a woman was paying with a check for some goods she had just bought, and she was carefully filling in the stub of her check book first. "Oh, don't stop for that!" urged her shopping companion, who was in a hurry. "You can do that when you get home."

Unmoved, the careful woman finished the stub with special care, then wrote the check, gave it to the salesman and said to her impatient friend: "Before I was married I took care of some of my father's accounts. The first time he ever asked me to fill out a set of blank checks for him so he could sign them he told me: 'One rule you must always observe—write the stub first. Make a vow to yourself, like unto the vow of Jephthah, that you will never write a check until the stub is filled. If for any reason you should fail later to write the check it would be a simple matter to cancel the stub, but if you write a check and leave the stub blank you open the door to a hundred chances of mistake. No one's memory can be trusted on that subject. Never try to trust yours. Let the law of 'the stub first' be to you as the law of the Medes and the Persians.' I have always found it perfectly easy to follow that rule, and that is one reason I have a bank account to-day. My husband is never afraid I will make him any trouble with it."

HEED BAD ODORS.

They May Warn You of Places Where Disease Germs Lurk.

Even a bad odor has its uses. Scientists say that the offensive smell which comes from decaying and disease breeding matter is in reality one of nature's measures of preparedness and of prevention.

Offensive odors indirectly prevent the spread of epidemics by calling attention to the breeding place of the disease. They give warning that something is wrong, and they persist in this warning by becoming more and more offensive until the wrong is righted.

The odor does not convey the germ or communicate the disease, because in most cases direct contact is necessary to do this, or the infection is communicated by some substance taken into or brought in contact with the body. But it does tell where the disease exists or is likely to exist. It also gives warning of tainted or unfit food, as the nose is intended by nature to be one of man's chief allies in the fight for health.

Some have even gone so far as to state that mothers should not discourage or forbid children smelling their food before they eat it. The tendency to do this is said to be a natural one. The nose is not placed above the mouth by accident. It was designed in primitive man as a guidepost for his stomach, and it is still a good guide.—Louisville Courier-Journal.

NEGLECTED FOODS.

Their More Liberal Use Would Be a
Help in Home Economy.

Among the foodstuffs that American housekeepers have scarcely utilized are turnip tops, radish tops, mustard plants, sorrel and chick peas among the vegetables and the cheese product that can be extracted from whey.

The greens mentioned may all be cooked like spinach or they may be made into delicious cream soups, as they have been for centuries by European housewives. Enough sorrel grows in the average vacant lot in every city to make many purees or cream soups.

Chick peas are as nutritious as beans and when served in a broth are just as tasty. They also can be made into a puree.

Radish tops and mustard leaves make a cheap and appetizing salad.

Professor Mary E. Rausch in a lecture at the University of Washington gave some hints about home economies, one of which was that foods in shallow pans cook more rapidly than in deep pans, thus saving gas. Another was that not a scrap of fat of any sort need be thrown away, but all should go into a double boiler and be tried out for use in frying or as shortening for pastry.—New York World.

"With good roads, Eastern Linna County can produce and market thousands of tons of good products from land now given over entirely to grazing purposes," announced George G. Zenderfer, a good roads booster of Cascadia, who walked 16 miles to attend a recent good roads meeting at Lebanon. "With our present poor roads, it is impossible for us readily to reach the market with such products, with the result that this acreage, so adapted for agriculture, is chiefly valuable only for grazing purposes. With good roads that would make markets more available, stock can be moved farther back and this land developed in an agricultural way. In this way, the further settlement of the state would be aided with a consequent increase in the state's production of food products."

CONVEX LENS OF THE EYE

A Burning Glass That Adjusts the
Sight to Varying Distances.

One of the manifold wonders of the human eye is the convex lens with which the focal distances of sight are made instantly and without mental effort. This lens in the eye is a literal "burning glass," as may be shown by the simplest of experiments.

Let the person at midday hold a straw against the face of the sun and focus his eyes on the straw. He can look at the straw, with its background of a dazzling sun, and without discomfort. But the moment he looks at the fiery ball of the sun itself subconsciously the lens of the eye comes to its proper focus, with the result that a "burning" sun spot appears on the retina of the eye, and it is said that a few seconds of such looking would burn out the retina as if by fire itself.

In the subconscious adaptability of the eye lens to adapt itself to different distances lies its value to the human sight. The man with a camera adjusts the focus of his lenses by sliding them forward and back. The lenses of the human eye, by changing their curvatures, allow of one looking at fine print six inches from his nose and in a fraction of a second to look up and away, probably fifty miles to a mountain peak that in an instant is in true camera focus.—Pittsburgh Press.

True in Every Language.

Tennyson once attended a dinner where G. L. Craik proposed "The Ladies." In doing so he recalled the cynical advice given by a brother Scot to his children: "Tak my advice and dinna marry for siller. You can borrow cheaper."

Some time later Tennyson at his own table repeated Mr. Craik's story, but expressed the idea without attempting dialect. His son, Hallam, remarked: "Surely, father, Craik did not use those words."

"No, he did not; but, then, Craik is a Scotchman, and I am afraid to venture on repeating him exactly. However, it's almost as good in English as in Scotch, and it's tremendously true in both."
