A COMPETENT WITNESS.

In This Case Action Was Much More Eloquent Than Words.

Judge Pollard of St. Louis, originator of a widely known probation system, is the subject of a story illustrating his novel method of dealing with troublesome cases. A driver had been brought before Judge Pollard charged with cruelty to animals. He had been driving a galled mule, but he had an expert witness in a veterinarian, who testified that the sore on the mule's back did not pain the animal in the least.

The judge listened attentively to the long technical opinion and then demanded to know the mule's whereabouts. He was informed that it was harnessed to a wagon that stood in the street in front of the courthouse.

The judge then ordered that court be adjourned for five minutes. He took his cane and proceeded to the street, went up to the mule and with the end of his cane gently touched the sore spot on the animal's back. The mule promptly tried to kick the dashboard off the wagon. Once again the judge touched the sore spot with his cane, and the mule responded as before.

Judge Pollard returned to the bench. The prisoner was called before him. "With all due respect to the expert testimony you have had introduced in your behalf to show that the mule's back does not pain him, I will fine you \$50," announced the judge. "I asked the mule if the sore hurt him, and he said it did."—Exchange.
