FIRE IN THE FOREST

We are now in the midst of the vacation season. And that has always produced a ghastly fire waste of our timber resources. Fire in the forest is worse than almost any other kind of fire. A house can be rebuilt. A tree cannot. In a few years, roaring flames can destroy timber that nature must spend hundreds of years replacing. And fire in the forest brings with it the most horrible of deaths to deer, rabbits, birds, squirrels and the other creatures of the wild.

Man-made fire in the forest is almost always preventable. It results from man's ignorance, man's carelessness, man's thoughtlessness. All the laws in the world are powerless unless full public support and cooperation is given them. There cannot be a fire warden behind every tree.

One of the prime causes of forest fires is smoking. A family on a holiday drives through the woods, thoughtlessly throwing matches and cigarette butts from the car. Usually they cause no damage. But one time in a hundred, one time in a thousand, they may fall in dry brush that is almost explosive. Then irreplaceable timber may be destroyed. Never drop burning tobacco or matches anywhere.

red, one time in a thousand, they may fall in dry brush that is almost explosive. Then irreplaceable timber may be destroyed. Never drop burning tobacco or matches anywhere.

Carelessness with camp fires is still another major cause of fire. Here again, the rules of safety are simple. Never leave a fire. Smother the ashes with water and earth. Always build your fire as far as possible from trees and brush, and in a cleared space.

One of America's greatest resources is its tall timber. It is the bases of a great employing industry which is vital to national defense. It is the source of pleasure and recreation for millions. Help to preserve it.

NO STARVATION DIET

The agriculture problem is still here.

The farmer's overhead has shown great increases. Labor is much more costly than it used to be and is difficult to obtain. Taxes are rising. And every manufactured article the farmer buys is more expensive.

The farmer's income, on the other hand, has not shown a comparable gain. Even in the best of times, the average farmer's profit is small—today it is too often close to the point of disappearance.

The drive now being conducted by farm groups, led by the marketing cooperatives, to attain equality for the farmer with labor and industry, deserves full support. We can't let the producers of our food live on a starvation diet.

Here's a Change—a 'Peace' Picture

Tired of war pictures? Here's one of peace. It shows Indian chiefs near Regina, Sask., Canada, smoking the pipe of peace with Mackenzie King, Canadian prime minister, who visited them. Both chiefs shown served in World War I and the two Indian lads in background are new recruits. Somebody say "peace" picture?
