## American People Face Acid Test in Treasury's 2nd War Loan To Raise 13 Billion Dollars in Three Weeks

The Nation Dare Not Fail in This Greatest Financing Task in History—"They Give Their Lives—You Lend Your Money."

Washington, D. C.—Coming as it does upon the heels of income tax payments, the people of America will face an acid test this month when the Treasury's Second War Loan drive opens April 12 with an objective of thirteen billion dollars to be raised through sale of Government securities.

A substantial part of this huge financing, the most stupendous ever undertaken by any government in the world's history, must be loaned by people in ordinary walks of life.

High Government officials have pointed out that the nation must not fail in this duty to our men on the battle fronts who are now carrying the offensive to the enemy at every stage. It is obvious to every thinking man and woman that as the United Nations take this offensive against the dictators, the cost of war operations increases in proportion.

The American people must no longer think of war costs in terms of equipping a soldier, building a tank or plane or a ship. We must now think in terms of the cost of battles, invasions and new offensives. Attacking armies cost more money than equipping that army and we must meet that increased cost by buying more War Bonds and Second War Loan Securities.

## They Give Their Lives.

It is not only necessary that the American people left here at home assume this additional participation in the war effort—it is an honor to do so . . . for we here at home can do no less than attempt to approach the sacrifices of our brave men out on the fighting fronts to whom the last great measure of sacrifice is but a daily offering. They give their lives . . . we are asked only to lend our money.

And that is the theme of the Second War Loan, "They Give Their Lives—You Lend Your Money."

Financial experts who know monetary conditions in the nation point out that at the present time there is in liquid funds, cash and commercial bank deposits over and above taxes and present investment in Government Bonds, and over and

above what can be bought this year because of restrictions and rationing . . . approximately 40 billions of dollars which should go into Government Bonds.

It should be the objective of every American to invest these loose dollars, idle dollars, in Government securities, not only from a patriotic standpoint, but from the standpoint of their own financial security. There is available during the Second War Loan a type of Security to fit every pocketbook.

## Are Wild Dollars

Every dollar of these forty billions of dollars available, which is not invested in Government securities during this War Loan Drive is a "wild" dollar which, together with its mates, will tend to increase inflation. Uncontrolled inflation might raise the cost of living to a point where the dollar is worthless. It can happen. It happened in Germany after the last war when the price of a loaf of bread cost more than an annual wage.

Invested in Government securities, your dollar will work for you. It will hold down inflation because it is harnessed in war work; it will help buy food, transportation, munitions for our boys on the front lines and it will be earning interest that, together with your original loan, will come back to you later to help you buy the things you cannot buy today . . . to insure your peace of the future.

Remember those boys out there . . . in Tunisia . . . in the South Pacific . . . They give their lives—You lend your money.

## TIJUANA, MEXICO —

## A Trip Across the Border

If you are of the opinion that point rationing, tire checking and other ramifications of wartime economy are a bother, you should make a trip to our southern border and attempt to enter Mexico. I can assure you that all other troubles will seem trivial in comparison. You will end up with a headache and a few two-dollar bills.

Yesterday, for the first time since our entry into the war, I made my first attempt to leave the United States. Naturally I expected that our usual peace-time restrictions would be more stringent, but I was hardly prepared for the ordeal that was to follow. If Mr. Hitler or our friend Mr. Moto expect to pull any fast ones here on the Pacific coast they are due for many disappointments.

Arriving at the border we were stopped as usual by the customs officers who plied us with the usual questions as to our destination, length of stay, etc. We were then informed that no printed matter could be taken across the border. This necessitated a complete cleaning out of the car, and as we were only going to Tijuana, about a mile distant, we decided to play smart and leave the car and go on by cab. Ho-ho, said we, they can't get the best of us.

We put the car in a parking

lot to the tune of 50 cents and once more approached the customs office. Again we were stopped. How much money did we have and in what denominations? For once in my life I happened to have \$60. all in \$10 bills. I was politely informed that no money other than two-dollar bills could be taken across the border.

Now back in Wisconsin where I hail from a two-dollar bill is a mighty scarce article and among the better people, is associated with black cats and witches. Thinking the matter over I was not so sure that my going into Mexico was so important after all. But nobody loves a coward, so back we went again to find some two-dollar bills.

There is no bank at the border, just a few scrawny buildings of a third rate variety. One was a little store so we stopped in and asked the man if he had any two-dollar bills. He was very cooperative and after much searching managed to find five. This was a step in the right direction, but what to do with my other \$50. The store man told me he would be glad to check it for me until I came back. We completed that transaction and the man charged me 50 cents — one per cent. Not a bad deal, if you get what I mean. It cost my friend 65 cents to check his \$65.

Once more we approached the (continued in the next column)

border. This time they asked to see our purses. When we presented them filled with cards or identification papers, such as are normally carried by the average business man, we were told, "Sorry, but you'll have to check them at the store. Only your draft cards are allowed." So once more back to the store where this new transaction cost us 30 cents more. Things were getting better and better.

This time we made it. The cab ride into town and back cost us \$2, but that wasn't the payoff. When we came back we were stopped by the American custom and among other things our shoes were inspected. Then we asked why, the customs man explained that if we had bought a pair of shoes in Mexico we would have to turn in a stamp the same as if they had been purchased in the U. S. What do you know about that?
