

THE LOW DOWN from HICKORY GROVE

Anybody with a little patch of ground no bigger than a barn door, he should have a garden. Sunshine and exercise, they make good health, and while you are home and in the garden versus hurrying elsewhere looking for some place to spend your money, you are getting ahead in 2 ways. You are getting food

that is fresh and delectable. You are saving extra mazuma that you can put into more war stamps.

A home grown tomato, or a muskmelon, or a half-dozen roasting ears right off the stalk, brother you got something worth while. And with the war stamps no place for money should come a head of them if we are to get this war over in any kind of pronto time. War stamps are not just for the other guy, they are for every one of us, old, handsome or other-

wise. And talking about being handsome, if I was a young woman and did not have a husband, and wanted one, I would not depend upon something in a bottle for my complexion, I'd get myself a garden.

Yours with the low down.
JOE SERRA

AND SOME WOULD CHANGE OUR SYSTEM

In reviewing the record of production reported by the War

Production Board up to May 25, last, the world has evidence of an industrial miracle wrought in the United States. B. M. Baruch puts the heart of the story in thirty-three words: "The war has been a crucible for all the economic systems of the world, for, our own for Communism, Fascism, Nazism—all the others. And the American system has outproduced the world."
