An old maid caused a commotion in a pullman when she went to look under her bed for a man. She forgot she was in an upper berth.

The old bald-headed alderman decided to have firewomen so that when a fire broke out they could see the hose go up.

If a grass widow marries a grass widower will their children be grasshoppers or what?

A truck farmer turned his cucumber seeds inside out so the cucumbers would have dimples on instead of warts.

An old maid placed an ad in the daily paper as follows: "For sale a second hand bicycle by an old maid with a punctured tire."

What is your occupation? I was a botanist until the drought killed all the flowers so the fragrance was gone. Now I am a chambermaid in a livery stable.

Why do women have no mustache? Answer: They talk all the roots out on the inside.

devoted to the farm price, costs and demand situation and outlook.

Owing to reduction in hogs and chickens it is not expected that the total number of grain-consuming animals and poultry will be so great next January 1 as last, but the reduction in hay-consuming animals is not expected to be marked.

As of January 1, 1944 the total number of animals and poultry on hand was at a high level. The nation had 132 percent as many chickens per 1000 persons as the 1935-1939 average, milk cows 104 percent, all cattle combined 115, stock sheep 94 and hogs 178.

Any farmer in Oregon may obtain a copy of the eight page outlook circular free from the county agent or direct from the college.

MUCH CANNING MATERIAL SHORT THIS YEAR

As the canning season nears its peak Clackamas county home canners are finding fruits and vegetables scarce as compared to last year, according to county agent J. J. Inskeep. The county agent ascribes this shortage to several factors, including an extremely dry season, fewer victory gardens and fewer acres of commercial vegetables, because growers found in marketing last season's bumper crop of fall garden products.

The season for canning beans is nearing its end but the peach harvest will reach its peak during the last week in August. Peaches are plentiful but canners should not delay in placing orders if they expect to fill the old pantry shelf with this favorite fruit.

The sweet corn crop is definitely short and good irrigated corn is selling at a premium. "The tomato crop will be short unless rain comes soon," Inskeep says, "and tomato blossom end rot due to dry soil is prevalent."

Pears are expected to be some what short due also to dry weather and the prune crop is almost a failure with some large orchards producing nary a prune. The Canby and Barlow crop of the famous Spar melons is very short and with many hills bearing only one or two melons. Inskeep says this shortage is due to dry soil, fungus diseases and to lack of pollination. Melons and cucumbers depend on bees for pollinating blossoms and bees have been very inactive during the cold, cloudy days experienced in July and August.

Acid Indigestion

Relieved in 5 minutes or double your money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicine known for symptomatic relief—medicines like those in Bell-San Tablets. No inactive, fillers bring comfort in a half of double your money back on return of bottle to us. 25c at all druggists.

Strawberry Handbook Issued

Discussion of the symptoms and control of all the insect pests and diseases of strawberries that are important in Oregon have been combined in one bulletin designed as an all-season handbook for the grower. This is OSC station bulletin 419 written by Joe Schuh assistant entomologist and Dr. S. M. Zeller plant pathologist of the agricultural experiment station. Strawberries produce around two million dollars of Oregon's annual farm produce varying some what with changing acreage and price.

NEW! "BACTERIOSTATIC" FEMININE HYGIENE

now finding great favor among women...

Many doctors urge the regular use of douches for women who want to be refreshingly clean—for women troubled by offending odor, itching or discharge. Some products may be harmful germicides which burn, harden and damage sensitive tissues. But NOT Lydia E. Pinkham's Sanative Wash! Instead—Pinkham's Sanative Wash is an effective "bacteriostatic" (a new modern trend).

It not only discourages growth of the more vulnerable bacteria, but cleanses, deodorizes, relieves minor irritations and discharge. Despite its great strength—Pinkham's Sanative Wash has a beneficial effect on delicate membranes. Inexpensive!
