don herold says:

I suggest that all business in America close down for one month (all the same month) — say, January — each year. Then everybody can get his gripes, pouts, demands, ultimatums and bellyaches off his chest.

My system would take the place of the present method of having one group paralyze the nation for several months, then another group paralyze it for several months, then another, and so on.

Let's have complete paralysis by all complainers for one month each year—all at once. Strikes, blackouts, shut downs! America completely useless for one clean-cut month each year—instead of for six or eight months, as it now is.
