THE GILLNETTERS WOULD SNARE YOU WITH THEIR NET OF MONOPOLY!!

MRS. HOUSEWIFE... when one small group gains control of a food product's source can you imagine what might happen to the price of that food product—and to your cost of living? Throwing out a net of high-sounding words about "resources, sports fishing and tourist dollars" the Gillnetters' Union have forgotten to tell you *one thing*.

The initiative bill for the elimination of fixed gear in the Columbia River gives to the gillnetters 90% of all the catch on the Columbia River—the remaining 10% being caught by the Indians at Celilo.

The Oregon Fish Commission in its June, 1948 report, the *Oregon Voter*, and Oregon State Planning Board, all say the same thing. Elimination of fixed gear on the Columbia River does not act as a salmon conservation project—but in reality only means that other gear catch more and the gillnets will be all that are left.

What could happen to your food budget under a virtual monopoly? What might happen to salmon prices? You have had experience with other monopolies—what is your answer?

And bear this fact in mind—if the gillnetters did not want to gain absolute control—why would they initiate this monopoly bill? Both the state legislature and the Oregon Fish Commission have the authority to regulate all gear for salmon fishing, if it were necessary.

The bill to "eliminate fixed appliances" is not necessary—it only puts monopolistic control in the hands of a minority group—the gillnetters.

- Vote against monopoly
- Vote against an unnecessary measure
- Vote against "high cost of living"

VOTE 319 X NO
