\$16 Million Paid By State to Cities

During the period 1917 to 1947 inclusive, the highway commission has advanced for right of way, construction and maintenance of these city streets a total of \$16,067,048, and now is being obligated under the mandate of these various legislative acts to the construction and maintenance of a continually lengthening mileage of city streets, and this in addition to that portion of the highway revenue under the 5 percent diversion of the 1945 and the 10 percent diversion of the 1947 legislative sessions.
As a result of the 5 and 10 percent allocations the cities received during 1944-48 a total of \$5,839,203. In 1949 an additional \$2,528,090 also for that purpose out of the 1948 calendar year revenue has been disbursed.
At its August meeting an additional distribution of \$1,205,534 will be made under the mandate of an amendment by the 1949 legislature providing for a semi-annual distribution of revenues. These sums which have been diverted from state highway construction by the legislature constitute, in practical effect, a state subsidy proportionate to and in lieu of local property taxes for street improvement.
