OREGON PUTS ITS OKAY ON THE '51 KAISER

Wherever you go ... in town, on the open road, along our scenic coastline, up in the mountains ... anywhere ... you'll see sleek, glamorous new '51 Kaiser cars with proud, happy owners at the wheel.

Yes ... everywhere you'll see people admiring the sensational "Anatomic Beauty" of the only car in its field that is **COMPLETELY NEW** in every respect!

- **ONE GLANCE** and you **KNOW** it's the newest car in America.
- **ONE MILE** behind the wheel and you, too, will want to own one.

NO WONDER that motorists of the West have caught the enthusiasm being shown toward '51 Kaisers throughout every state of the Union. You'll know **WHY** when you've really taken time to inspect and get behind the wheel of a new '51 Kaiser with its great 115 hp. Supersonic High Torque Engine.

The 1951 Kaiser was developed from a new kind of thinking, a new application of science, a new consideration for human needs and wants as they have changed with the growth of motor transportation.

It brings you the triumph of a great and needed thing, Anatomic Design -- the designing of the anatomy of the car to suit the anatomy and needs of the human being. Anatomic Design results in a car that meets the needs of your senses, your reflexes, your arms, legs, nerves, and muscles ... a car that is easier to control, more comfortable, safer for you and your family to ride in.
