## Attorney For City Would Deny Right Of Legal Publications

An ordinance which would put an end to the publication of proposed Sandy city ordinances and resolutions in the local newspaper and would force citizens of Sandy to keep a "vigilant eye" on un-named "public places" to learn when and what ordinances and resolutions are under consideration by the Sandy City Council was presented to the council as a surprise package by Attorney for the City, Ed Martin, at the regular meeting Tuesday night.

The proposed ordinance would void portions of section 36 of the Sandy city charter by removing the option of the council to give notice of its activities either by publication in the newspaper or by posting in public places.

The legislation came in the form of the ordinance, which according to the councilmen present, had not been ordered drafted by the council as a body, but by any one of them.

"It came out of the dark," councilmen said. "We have no idea where Ed (Martin) got it."

The council has, in the past, ordered in each ordinance how the legislation is to be brought before the public eye, legally. Usually the ordinances are posted, but occasionally the council uses its right to publish important, and controversial issues in the newspaper—a right denied them by the new ordinance.

The city has been allotted \$250 for legal advertising by the budget committee for the present year. Also in the budget for the legal department is \$75 for a city audit and \$600 for attorney's fees.

The ordinance, which received its first two readings Tuesday night reads, in part:

"Section 1. The council does hereby find, adjudge and declare that the charges for the publication in a newspaper of ordinances proposed by the council are excessive and out of proportion to the financial means of the city to pay therefor, and by reason thereof it hereby is ordered that all such publications of proposed ordinances, or resolutions, as the case may be, and as otherwise provided for under Section 36 of Chapter VI of the City Charter be dispensed with until further order of the council, and the council hereby orders that all proposed ordinances be posted in three public places by the city recorder as

provided in said Section 36 of Chapter VI of the Charter."

The charges which the ordinance refers to, are the rates prescribed by state law, for the publication of legal notices in newspapers qualified to carry them.

The ordinance if passed would make it illegal for the council to have proceedings published in the paper, even if the issue were important enough to warrant legal publication.

The council has not been purchasing legal advertising space in the newspaper for publication of ordinances.

"The ordinance was drafted," Mr. Martin said in a telephone conversation with The Sandy Post Wednesday, "to make sure that all the ordinances previously passed are legal in this respect."

The city charter says that ordinances shall be either published or posted—by order of the council.

The council must read the ordinance one more time before it can take action on it.

## Petition Forces City Council To Start Repeal Of Condemnation Activity

### New Survey Request Asked By Council; Engineer To Appear

Fifty-Seven Names Appear On Petition To Bring Condemnation Ordinance To Ballot

By Dick Revenaugh

The city fathers last week passed a resolution and heard two readings of an ordinance which will repeal the controversial property condemnation ordinance that became effective July 5.

The repealing ordinance was drafted under the order of the city council and sets the entire sewer proceedings back four months when the block-bisecting system of sewer lines was first proposed.

The order for the repealing ordinance was made after the council was presented with a petition that would have forced the condemnation ordinance to a referendum vote—which would be detrimental to the sewer proposition no matter which way the vote would go.

**Lose Both Ways**

If the people approved of the condemnation theory it would commit the council to the present plan of sewer lines—which the council considers only an experimental plan.

On the other hand, if the voters disapprove of the enabling ordinance, the council feels that it will be unable to use condemnations even if the necessity were apparent.

The resolution, passed last Wednesday evening at the regular city council meeting, is a climax to a series of animated discussions around the council table and in the back rooms and on the street corners.

**Changes Opinion**

At one time the council was of the opinion which was publicized that it was impossible for the sewers to go anywhere but down the middle of the blocks for service to dwellings and businesses on both sides of the lines.

Since, however, the council has become split over the possibilities, one faction of the council, represented by Ernie Harris, Tom Scales and Dick Maronay, believes the sewers should go on public streets wherever possible. A second faction, which believes that the council should have the right to direct the sewers along the most economical route—whether public or private, contains the rest of the council.

**57 Signatures**

The petition which brought the fight to a head last week contained 57 signatures of voters—15 more than necessary to force the referendum election.

The council has now directed the mayor to contact the city engineer and revise the sewer plans along different lines.

Some of the possibilities mentioned by the council for the revised layout includes lines through private property south of Main street and along Pleasant Avenue and lines on streets on Main street and the Loop highway. An extension system of laterals will pick up users not within 200 feet of the lines.

### Council To Draft Ordinance Banning A. M. Liquor Sales

The city council last Wednesday night, passed a resolution to have an ordinance drafted that will prohibit the sale and serving of beer and other alcoholic beverages between 1:00 a.m. and 7:00 a.m.

The council took the action after a report by the mayor and the chief of police that some trouble, and excessive boisterousness has resulted from one tavern in Sandy selling liquor after 1:00.

The tavern, council members understood, was drawing drinkers from the surrounding areas after taverns and bars had been closed. The Sandy tavern has a special license from the state allowing it to stay open later.

The motion for the resolution was made by Dick Maronay, seconded by Ronald Krebs, and received unanimous approval of the council.
